

## CONTENTS

Preface	v
Photographs	xv
 <b>High Energies and Field Theories</b>	
Developing Creativity and Innovation in Engineering and Science <i>M. L. Perl</i>	3
Knots as Possible Excitations of the Quantum Yang-Mills Fields <i>L. D. Faddeev</i>	18
A Torsional Topological Invariant <i>H. T. Nieh</i>	29
Knot Topology of Classical Vacuum Space-Time <i>Y. M. Cho</i>	38
Some Thoughts on the Cosmological QCD Phase Transition <i>W.-Y. P. Hwang</i>	55
Analytic Scattering Amplitudes for QCD <i>D. Vaman and Y.-P. Yao</i>	79
Neutrino Oscillation and the Daya Bay $\theta_{13}$ Experiment <i>B.-L. Young</i>	90
Scattering and Production at High Energies <i>T. T. Wu</i>	112
Gravity and its Mysteries: Some Thoughts and Speculations <i>A. Zee</i>	131
Geometric Phase and Chiral Anomaly; their Basic Differences <i>K. Fujikawa</i>	147

Consequences of a Minimal Length <i>L. N. Chang</i>	161
Model Kinetic Equations with Non-Boltzmann Properties <i>B. H. J. McKellar, I. Okuniewicz and J. Quach</i>	171
Rigid Limit in $\mathcal{N} = 2$ Supergravity and Weak-Gravity Conjecture <i>T. Eguchi and Y. Tachikawa</i>	183
Five Decades After the Revolution: How Much Do We Know About the Neutrino? <i>N.-P. Chang</i>	198
Interacting Multi-Component Fermions and the Yang-Baxter Equation: Future Prospects* <i>M. T. Batchelor</i>	203
Free Electron Laser Developments in China* <i>Z.-T. Zhao</i>	204
Prospect of Particle Physics in China <i>H. S. Chen</i>	205
<b>Statistical Physics, Condensed Matter and Biophysics</b>	
Nearsightedness of Electronic Matter* <i>W. Kohn</i>	217
Complex Cooperative Behaviour in Range-Free Frustrated Many-Body Systems <i>D. Sherrington</i>	218
Asymmetric Heat Conduction in Nonlinear Systems* <i>B. Hu</i>	234
The Spin-Charge Gauge Approach to the Theory of Doped Mott Insulators* <i>L. Yu</i>	235

---

\*Abstract.

Direct and Non-Demolition Optical Measurement of Pure Spin Currents in Semiconductors	236
<i>J. Wang, B.-F. Zhu and R.-B. Liu</i>	
From BCS to HTS and RTS	247
<i>C. W. Chu</i>	
The Fibonacci Model and the Temperley-Lieb Algebra	277
<i>L. H. Kauffman and S. J. Lomonaco, Jr.</i>	
Yang-Baxter Equation and Quantum Periodic Toda Lattice*	296
<i>L. Takhtajan</i>	
Atomic-Scale Structure: From Surfaces to Nanomaterials*	297
<i>M. A. Van Hove</i>	
Topological Quantum Numbers and Phase Transitions in Matter*	298
<i>D. Thouless</i>	
Professor C. N. Yang and Statistical Mechanics	299
<i>F. Y. Wu</i>	
A Few Pieces of Mathematics Inspired by Real Biological Data	311
<i>B. L. Hao</i>	
Spin Precession and Interference in Two-Dimensional Electron Gas	323
<i>C.-R. Chang and J.-S. Yang</i>	
Atoms and Ions; Universality, Singularity and Particularity: On Boltzmann's Vision a Century Later*	335
<i>M. Fisher</i>	
Insights from Computer Simulation*	336
<i>E. G. Wang</i>	
Fifty Years of Hard-Sphere Bose Gas: 1957–2007	337
<i>K. Huang</i>	
<b>Quantum Physics</b>	
Quantum Phenomena Visualized by Electron Waves	357
<i>A. Tonomura</i>	

Phase Separation of Atoms in Optical Lattices*	377
<i>H.-Q. Lin</i>	
Ultracold Atoms Achievements and Perspectives†	378
<i>C. Cohen-Tannoudji</i>	
Quantum Spin Hall Effect*	394
<i>S. C. Zhang</i>	
Berry Phase in Yang–Baxter Systems and Bogoliubov Hamiltonian as a Derivative of Dirac Hamiltonian via Braid Relation	395
<i>M.-L. Ge, K. Xue and J.-L. Chen</i>	
Hierarchical Quantum Search	409
<i>V. E. Korepin and Y. Xu</i>	
Spin Hall Effect in Ultracold Atomic Gas	430
<i>X.-J. Liu and C. H. Oh</i>	
Magnetic Coupling and Quantum Well States*	446
<i>Z. Q. Qiu</i>	
Quantum Information Processing: Present Status and Perspectives*	447
<i>I. Cirac</i>	
Degradable Channels in Quantum Information Theory*	448
<i>M. B. Ruskai</i>	
<b>Other Topics</b>	
Prof. Yang and Prof. Steinberger†	451
<i>W.-M. Wu</i>	
“Almost Every Problem He Touched Eventually Turned into Gold”	457
<i>L.-L. Chau</i>	
Kidney-Boojum-Like Solutions and Exact Shape Equation of Lipid Monolayer Domains	477
<i>M. Iwamoto, F. Liu and Z.-C. Ou-Yang</i>	

---

† Abstract and slides.

Revisiting the Hydrodynamic Boundary Condition: New Results on an Old Problem*	485
<i>P. Sheng</i>	
Recent Progress in Atomic Ionisation Theory*	486
<i>I. Bray, D. V. Fursa, A. S. Kadyrov and A. T. Stelbovics</i>	
Chen Ning Yang and the Formation of AAPPS (Association of Asia Pacific Physical Societies)	498
<i>M. Konuma</i>	
The Modeling and Functional Connectivity of the Brain*	510
<i>S. Kim</i>	
Symmetry Effects in Computation*	511
<i>A. C.-C. Yao</i>	
Applications of Nanotechnology to the Development of Energy-Related Technologies*	512
<i>M.-K. Wu</i>	
Chen-Ning Yang and My Student Days at Stony Brook	513
<i>A. Chao</i>	
<b>Contributed Talks*</b>	
Quasicrystals and Partial Differential Equations	519
<i>T. Y. Fan</i>	
Prepotential Approach to Exact and Quasi-Exact Solvabilities of Hermitian and Non-Hermitian Hamiltonians	520
<i>C.-L. Ho</i>	
Prof. C. N. Yang and Quantum Entanglement in Particle Physics	521
<i>Y. Shi</i>	
Is Non-Abelian Gauge Theory Relevant to the Technology of Spintronics	522
<i>S. G. Tan, M. B. A. Jalil, X.-J. Liu and T. Fujita</i>	
A Two-Parametric Graded $R$ -Matrix Satisfying the Yang-Baxter Equation	523
<i>T. C. Vo, A. K. Nguyen and T. H. V. Nguyen</i>	

A New Two-Parametric Deformation of $U[osp(1/2)]$ <i>A. K. Nguyen and L. B. Nam</i>	524
The Kontsevich Integral and Covering Spaces <i>A. Kricker</i>	525
Byers and Yang's Theorem on Flux Quantization <i>K. N. Shrivastava</i>	526
Voltage-Controlled Berry Phases in Two Coupled Quantum Dots <i>K.-D. Zhu</i>	527
A Comment on the Wave Function of Neutrino and P-Nonconservation <i>V. V. Thuan</i>	528
Theoretical Modeling of B-Z Deoxyribonucleic (DNA) Transition <i>W. Lim</i>	529
Application of Gauge Theory to Acoustic Fields — Revolutionizing and Rewriting the Whole Field of Acoustics <i>W. S. Gan</i>	530
Bonding Electronics and Energetics: An Approach Crossing the Barriers of Classical and Quantum Approximations <i>C. Q. Sun</i>	531
Topological Quantum Phase Transitions of the Kitaev Model <i>G.-M. Zhang</i>	532
Worldline Instantons and Pair Production <i>Q.-H. Wang</i>	533
Exact Ground States and Correlation Functions of Interacting Spinless Fermions on Two-Legged Ladder <i>S. A. Cheong</i>	534
Nonlinear Supersymmetric General Relativity and Unity of Nature <i>K. Shima and M. Tsuda</i>	535
Novel Nano-Device and Symmetry Role in Chemical Event of C60 and Carbon Nanotube Composite <i>H.-B. Su</i>	536

Singular Gauge Transformation and Wu-Yang Singular-Free Monopole	537
<i>J.-Q. Liang</i>	
Laboratory Plasma Astrophysics Research with Intense Lasers	538
<i>H. Takabe, T. Kato, Y. Kuramitsu and Y. Sakawa</i>	
New RF Helicon-Plasma Devices for Various Applications	539
<i>T. Tanikawa, S. Shinohara, T. Motomura, K. Tanaka, K. Toki and I. Funaki</i>	
THz Radiation Generation via Laser Plasma Interaction Experiments	540
<i>N. Yugami and T. Higashiguchi</i>	
Non-Maxwellian Velocity Distribution: A Characteristic of Space Plasma	541
<i>L.-N. Hau</i>	
Dynamo Mechanism by Transport Flow	542
<i>C.-M. Ryu</i>	
Degradable Channels in Quantum Information Theory	543
<i>R. S. Rawat</i>	
Plasma Nanoscience: From Astronucleosynthesis to Origin of Life and Industrial Nanomanufacturing	544
<i>K. Ostrikov and S.-Y. Xu</i>	
Plume Dynamics in TEA CO <sub>2</sub> Laser Ablation of Polymers and Graphite	545
<i>T. Y. Tou and O. H. Chin</i>	
Plasma Hole — A Singular Vortex in a Magnetized Plasma	546
<i>M. Y. Tanaka</i>	
Quantum Plasmas — Space Charge Limited Electron Flows	547
<i>L. K. Ang</i>	
Generation and Application of High Density Low-Frequency Inductively Coupled Plasmas	548
<i>S.-Y. Xu and K. Ostrikov</i>	
List of Participants	549
