

CONTENTS

Foreword	vii
Preface	ix
Generating Sets for the Recursively Enumerable Turing Degrees <i>Klaus Ambos-Spies, Steffen Lempp and Theodore A. Slaman</i>	1
Coding into $H(\omega_2)$, Together (or Not) with Forcing Axioms. A Survey <i>David Asperó</i>	23
Nonstandard Methods in Ramsey's Theorem for Pairs <i>Chi Tat Chong</i>	47
Prompt Simplicity, Array Computability and Cupping <i>Rod Downey, Noam Greenberg, Joseph S. Miller and Rebecca Weber</i>	59
Lowness for Computable Machines <i>Rod Downey, Noam Greenberg, Nenad Mihailović and André Nies</i>	79
A Simpler Short Extenders Forcing — Gap 3 <i>Moti Gitik</i>	87
Limit Computability and Constructive Measure <i>Denis R. Hirschfeldt and Sebastiaan A. Terwijn</i>	131
The Strength of Some Combinatorial Principles Related to Ramsey's Theorem for Pairs <i>Denis R. Hirschfeldt, Carl G. Jockusch, Jr., Bjørn Kjos-Hanssen, Steffen Lempp and Theodore A. Slaman</i>	143

Absoluteness for Universally Baire Sets and the Uncountable II <i>Ilijas Farah, Richard Ketchersid, Paul Larson and Menachem Magidor</i>	163
Monadic Definability of Ordinals <i>Itay Neeman</i>	193
A Cuppable Non-Bounding Degree <i>Keng Meng Ng</i>	207
Eliminating Concepts <i>André Nies</i>	225
A Lower Cone in the wtt Degrees of Non-Integral Effective Dimension <i>André Nies and Jan Reimann</i>	249
A Minimal rK-Degree <i>Alexander Raichev and Frank Stephan</i>	261
Diamonds on $\mathcal{P}_{\kappa}\lambda$ <i>Masahiro Shioya</i>	271
Rigidity and Biinterpretability in the Hyperdegrees <i>Richard A. Shore</i>	299
Some Fundamental Issues Concerning Degrees of Unsolvability <i>Stephen G. Simpson</i>	313
Weak Determinacy and Iterations of Inductive Definitions <i>MedYahya Ould MedSalem and Kazuyuki Tanaka</i>	333
A tt Version of the Posner-Robinson Theorem <i>W. Hugh Woodin</i>	355
Cupping Computably Enumerable Degrees in the Ershov Hierarchy <i>Guohua Wu</i>	393
