

PREFACE

These are the proceedings of the Workshop on Exclusive Reactions at High Momentum Transfer, which was held 21–24 May, 2007 at the Thomas Jefferson National Accelerator Facility (Jefferson Lab) in Newport News, Virginia, USA. The workshop was sponsored by Jefferson Lab.

The workshop was open to all interested scientists, and embraced both theorists and experimentalists. The Organizing Committee thanks the speakers and participants at the conference for the stimulating atmosphere that prevailed. We trust the written versions of the talks presented in the volume will reproduce some of that feeling.

Thanks are also due to the people who worked hard to organize the conference and make it a success. The Conference group at Jefferson Lab was indispensable. Allow us to give special thanks to Ruth Bizot, Cynthia Lockwood, Marty Hightower, Mary Fox and Marti Bennett for all their efforts before, during and since the conference.
