<i>Preface</i>	vii
<i>List of Figures</i>	xv
<i>List of Tables</i>	xix
1. Introduction	1
1.1 Robot-Assisted Intervention: Benefits and Applications . . . . .	1
1.2 Robotics Technology for Surgery and Therapy . . . . .	2
1.2.1 Augmenting devices and systems . . . . .	2
1.2.2 Supporting devices and systems . . . . .	7
1.3 Haptics for Robotic Surgery and Therapy . . . . .	9
1.3.1 Haptic user interface technology . . . . .	9
1.3.2 Haptic surgical teleoperation . . . . .	11
1.4 Technological Challenges of the Future . . . . .	12
2. Sensorized Surgical Effector (Slave)	13
2.1 Introduction . . . . .	13
2.1.1 Limitations of endoscopic surgery . . . . .	13
2.1.2 The need for robot-assisted surgery . . . . .	14
2.1.3 Significance of haptic perception in master-slave operation . . . . .	15
2.1.4 Perceptual-motor skills study . . . . .	17
2.2 Methods, Materials and Results . . . . .	18
2.2.1 Force reflection methods . . . . .	19
2.2.2 Design requirements . . . . .	20
2.2.3 Twist and tip motions . . . . .	21

2.2.4	Interaction measurement . . . . .	24
2.3	Discussion . . . . .	27
2.4	Concluding Remarks . . . . .	29
3.	Haptic User Interface (Master)	31
3.1	Introduction . . . . .	31
3.1.1	Computer-assisted endoscopic surgery training . . . . .	31
3.2	Haptic User Interface Architecture . . . . .	33
3.2.1	Force reflection in pitch, yaw and insertion . . . . .	34
3.2.2	Force reflection in roll and gripping . . . . .	35
3.3	Analysis of the Haptic Interface . . . . .	37
3.3.1	Sensitivity . . . . .	39
3.3.2	Workspace . . . . .	40
3.3.3	Force reflection capability . . . . .	43
3.4	Concluding Remarks . . . . .	46
4.	Unilateral Teleoperation Control	47
4.1	Introduction . . . . .	47
4.1.1	Direct inverse dynamics control . . . . .	48
4.1.2	Feedback error learning control . . . . .	48
4.2	PHANToM Inverse Dynamics Identification . . . . .	49
4.3	Adaptive Inverse Dynamics Trajectory Control of the PHANToM . . . . .	51
5.	Bilateral Teleoperation Control	55
5.1	Introduction . . . . .	55
5.2	Stability and Transparency in Haptic Teleoperation . . . . .	55
5.2.1	2-channel architectures . . . . .	58
5.2.2	4-channel architecture . . . . .	62
5.3	Haptic Teleoperation Experiments . . . . .	69
5.3.1	Experimental setup . . . . .	69
5.3.2	Master-slave communication . . . . .	69
5.3.3	Observation of hand forces . . . . .	70
5.3.4	Observer and controller gains . . . . .	72
5.3.5	Soft-tissue palpation tests . . . . .	72
5.4	Concluding Remarks . . . . .	78
6.	Substitution for Haptic Feedback	81

6.1	Introduction . . . . .	81
6.2	Graphical Substitution for Haptic Feedback . . . . .	84
6.2.1	Case study: Lump localization task . . . . .	84
6.3	Multi-Modal Contact Cues . . . . .	89
6.3.1	Case study: Tissue stiffness discrimination Task . . . . .	90
6.4	Concluding Remarks . . . . .	95
7.	Bilateral Teleoperation Control Under Time Delay . . . . .	97
7.1	Introduction . . . . .	97
7.2	Passivity and Absolute Stability . . . . .	99
7.2.1	Passivity-based time delay compensation . . . . .	99
7.3	2-Channel Architectures . . . . .	102
7.3.1	Admittance-type configurations . . . . .	102
7.3.2	Hybrid-type configurations . . . . .	105
7.4	4-Channel Architecture . . . . .	106
7.4.1	Delay-free case . . . . .	106
7.4.2	Wave-based 4-channel architecture . . . . .	108
7.4.3	Transparency considerations . . . . .	110
7.4.4	3-channel architecture . . . . .	112
7.5	Experimental Performance Evaluation . . . . .	112
7.6	Concluding Remarks . . . . .	118
Appendix A	Mechanical Description of the Slave . . . . .	121
A.1	Fulcrum . . . . .	121
A.2	Laparoscopic instrument assembly . . . . .	121
A.3	The motor and encoder for the roll direction . . . . .	122
A.4	2-DOF gimbals assembly . . . . .	122
A.5	PHANToM haptic device . . . . .	122
Appendix B	Mechanical Description of the Master . . . . .	125
B.1	Fulcrum . . . . .	125
B.2	Instrument shaft . . . . .	125
B.3	Force-reflecting finger loops . . . . .	126
B.4	Force reflection in the roll direction . . . . .	126
B.5	PHANToM haptic device . . . . .	126
Appendix C	Kinematics and Dynamics of the PHANToM Haptic Device . . . . .	131

C.1	Forward kinematics . . . . .	131
C.2	Inverse kinematics . . . . .	131
C.3	Manipulator Jacobian . . . . .	132
C.4	Dynamics . . . . .	133
Appendix D	1-DOF Master System Modeling and Identification	135
D.1	Dynamic modeling . . . . .	135
D.2	Parametric identification . . . . .	136
Appendix E	Virtual Reality Peripheral Network	139
Appendix F	t-Test and ANOVA	143
	<i>Bibliography</i>	145
	<i>Index</i>	157
