

# CONTENTS

Preface	v
<hr/>	
<b>Direct and Indirect Search for Cold Dark Matter</b>	<b>1</b>
<hr/>	
Results and Developments with Large Mass Highly Radiopure NaI(Tl) at LNGS <i>R. Bernabei, P. Belli, F. Montecchia et al.</i>	3
The Dark Connection Between the EGRET Excess of Diffuse Galactic Gamma Rays, the Canis Major Dwarf, the Monoceros Ring, the Integral 511 keV Annihilation Line, the Gas Flaring and the Galactic Rotation Curve <i>W. de Boer</i>	18
Density Wave Theory Applied to the Spiral Arms in the Milky Way Predicts a Massive Outer Galactic Disk <i>B. Fuchs</i>	40
New Constraints on Spin-Dependent WIMP-Neutron Interactions from HDMS with Natural Ge and $^{73}\text{Ge}$ <i>H.V. Klapdor-Kleingrothaus, I.V. Krivosheina and V.A. Bednyakov</i>	42
Neutrinos from WIMP Annihilations <i>T. Ohlsson</i>	51
Underground Commissioning and Prospects for ZEPLIN-III, a Two-Phase Xenon Detector for Dark Matter WIMPs <i>H. Araújo (for the ZEPLIN-III Collaboration)</i>	60

CDMS Experiment: Current Status and Future <i>J. Yoo (for the CDMS Collaboration)</i>	67
Status of XMASS Experiment <i>M. Nakahata (for the XMASS Collaboration)</i>	75
Dreams and Reality of Using Naked Ge Detectors in Liquid Nitrogen, Status (Long-Term Stability) of GENIUS-TF <i>I.V. Krivosheina and H.V. Klapdor-Kleingrothaus</i>	87
Dark Matter Search with Noble Liquids: The ArDM Experiment <i>S. Navas</i>	95
The DRIFT Directional Dark Matter Detector and First Studies of the Head-Tail Effect <i>N.J.C. Spooner and P. Majewski (for the DRIFT II Collaboration)</i>	104
Direct Search for Spin-Dependent WIMPS with CaF <sub>2</sub> Detector <i>R. Hazama, I. Ogawa, K. Mukaida et al.</i>	113
Search for Neutralino Dark Matter with the AMANDA Neutrino Telescope and Prospects for IceCube <i>A. Rizzo (for the IceCube Collaboration)</i>	122
Prospects for the Search for Dark Matter with GLAST <i>B.L. Winer (for the LAT Dark Matter and New Physics Working Group)</i>	132
Constraints on Machos with the EROS-2 Project <i>P. Tisserand</i>	142
Annihilating Dark Matter <i>N.F. Bell</i>	150
Dark Matter: Smooth or Compact? Limits from Gravitational Microlensing <i>G.F. Lewis</i>	155

---

<b>SUSY/SUGRA Phenomenology in Dark Matter, New Symmetries</b>	<b>165</b>
--	------------

---

Leptonic CP Violation and Leptogenesis <i>M.N. Rebelo</i>	167
Towards Dark Energy from String-Theory <i>A. Krause</i>	181
Dark Matter and Dark Gauge Fields <i>D.V. Ahluwalia, C.-Y. Lee, D. Schrott et al.</i>	198
Standard Supersymmetry from a Planck-Scale Statistical Theory <i>R.E. Allen, Z. Wadiasingh and S. Yokoo</i>	209
On the Origin of Families and their Mass Matrices with the Approach Unifying the Spin and the Charges, Prediction for the Dark Matter Family <i>N.S. Mankoč Borštnik</i>	217
Constraints on Gauss-Bonnet Cosmologies <i>I.P. Neupane</i>	228

---

<b>Structure Formation and Gamma-Ray Sources</b>	<b>243</b>
--	------------

---

The Galaxy Profile of Clusters in the COSMOS Field <i>J.B. James and J.A. Peacock</i> <i>(for the COSMOS Collaboration)</i>	245
Shedding Light on Dark Matter: Seeing the Invisible with the Bullet Cluster 1E0657-56 <i>M. Bradač (for the Bullet Cluster Collaboration)</i>	254

Cosmological Weak Lensing and Dark Matter Mapping with the Hubble Space Telescope <i>T. Schrabback, P. Simon, T. Erben et al.</i>	260
Can Massive Dark Haloes Destroy the Disks of DWARF Galaxies? <i>B. Fuchs and O. Esquivel</i>	274
Nonextensive Statistical Theory of Dark Matter and Plasma Density Distributions in Clustered Structures <i>M.P. Leubner</i>	283
Dark Matter Halo Profiles in Scale-Free Cosmologies <i>S.R. Knollmann, C. Power and A. Knebe</i>	290
Effects of Primordial Magnetic Field on CMB and Matter Power Spectrum <i>D.G. Yamazaki, K. Ichiki, T. Kajino et al.</i>	299
Reissner–Nordström Expansion <i>E.M. Prodanov, R.I. Ivanov and V.G. Gueorguiev</i>	304
Galaxy-Galaxy Lens Reconstruction: Einstein Rings and Lensed QSOS <i>B.J. Brewer</i>	310
Dark Haloes of Fossil Galaxy Groups and Clusters: Observations and Simulations <i>H.G. Khosroshahi, A. Dariush, T.J. Ponman et al.</i>	317
Small Scale Structure in Dark Matter Models and Consequences for Galaxy Formation <i>C. Power</i>	327
Highlights from INTEGRAL & a Synthetic View of $\gamma$ -Ray Sources <i>A. Bodaghee</i>	340

---

**Dark Matter and Dark Energy** **355**

---

Non-linear Matter Power Spectrum to 1% Accuracy Between  
Dynamical Dark Energy Cosmologies

*M.J. Francis, G.F. Lewis and E.V. Linder* 357

General Relativity (Plus Dark Matter and Dark Energy) or  
Alternative Theories of Gravity

*A.F. Zakharov, V.N. Pervushin, F. De Paolis et al.* 366

---

**Galaxy Clusters, Low Mass Stellar Evolution** **385**

---

Low Mass Stellar Evolution with WIMP Capture and  
Annihilation

*P.C. Scott, J. Edsjö and M. Fairbairn* 387

The Wedding of Modified Dynamics and Non-Exotic Dark Matter  
in Galaxy Clusters

*B. Famaey, G.W. Angus, G. Gentile et al.* 393

---

**Massive Black Holes** **403**

---

The Dark Mass at the Center of the Milky Way: NIR and X-Ray  
Flare Emission from SGR A\*

*A. Eckart, L. Meyer, M. Zamaninasab et al.* 405

Sterile Neutrinos and the Rapid Formation of Supermassive Black  
Holes

*M.C. Richter, G.B. Tupper and R.D. Viollier* 419

<b>Search for Hot and Warm Dark Matter</b>	<b>433</b>
<hr/>	
The Karlsruhe Tritium Experiment on the Neutrino Mass (KATRIN)	
<i>E. Otten</i>	435
Hot Dark Matter and Neutrinoless Double Beta Decay: World Status of the Field	
<i>H.V. Klapdor-Kleingrothaus</i>	442
Structure of Background in the Heidelberg–Moscow Experiment on Search for and Investigation of Double Beta Decay of $^{76}\text{Ge}$	
<i>K.Ya. Gromov, V.A. Bednyakov, V.I. Fominykh et al.</i>	468
Dark Matter’s X-Files	
<i>A. Kusenko</i>	482
SN 1987A — 20th Anniversary of Registration of the Neutrino Signal with Baksan, Kamiokande II and IMB Detectors	
<i>I.V. Krivosheina</i>	491
Cosmological Constraint on “Neutrino Mass” from CMB Anisotropies with Primordial Magnetic Field	
<i>K. Kojima, D.G. Yamazaki and T. Kajino</i>	510
<hr/>	
<b>Axion and Axino, Exotics</b>	<b>515</b>
<hr/>	
Axion and Axino Contribution to Dark Matter	
<i>J.E. Kim</i>	517
Neutrino Dark Energy, $\Lambda$ Dominance and Resolution of the Fifth Force Problem	
<i>E.I. Guendelman and A.B. Kaganovich</i>	531

The First Results of the GammeV Axion-Like Particles Search Experiment <i>J. Yoo (for GammeV Collaboration)</i>	536
Negatively-Charged Massive Particles as Progenitors for CDM, and Solution to the $^6\text{Li}$ and $^7\text{Li}$ Problem in Big Bang Nucleosynthesis <i>M. Kusakabe, T. Kajino, R.N. Boyd et al.</i>	544
Dark Electric Matter Objects: History of Discovery, Modes of Interaction with Matter, Some Inferences and Prospects <i>E.M. Drobyshevski and M.E. Drobyshevski</i>	549
<hr/> <b>Cosmological Variations and Fundamental Constants</b> <hr/>	<b>563</b>
Dark Energy Without Dark Energy <i>D.L. Wiltshire</i>	565
<hr/> <b>Underground Laboratories</b> <hr/>	<b>597</b>
ILIAS and the European Deep Laboratories <i>N.J.C. Spooner (on behalf of ILIAS)</i>	599
SNOLAB: A New International Facility for Underground Astroparticle Physics <i>A. Noble</i>	606
List of Participants	615
Author Index	629
