Foreword	xiii
K. J. Lampe	
Opening remarks	xv
K.J. Lampe	
International cooperation in rice genetics	xix
G.S. Khush	
Abbreviations and acronyms	xxv

Session 1 VARIETAL DIFFERENTIATION AND EVOLUTION

Association between <i>Pox-1</i> variation and seed productivity potential in wild rice	1
H. Morishima	
Evolutionary significance of differential regulation at the <i>wx</i> locus of rice	11
Y. Sano, H.-Y. Hirano, and M. Nishimura	
Cytogenetic, electrophoretic, and root studies of javanica rices	21
T.T. Chang, Yongbao Pan, Qiren Chu, Ranjani Peiris, and G.C. Loresto	
Screening and analysis of wide compatibility loci in wide crosses of rice	33
H. Ikehashi, H. Araki, and S. Yanagihara	
How was rice differentiated into indica and japonica?	45
Y.-I. Sato	
Genetic diversity and intervarietal relationships in rice (<i>Oryza sativa</i> L.) in Africa	55
J.-L. Pham	
Traditional highland rices originating from intersubspecific recombination in Madagascar	67
N. Ahmadi, J.C. Glaszmann, and E. Rabary	
Prospective use of <i>Oryza longistaminata</i> for rice breeding	81
M. Causse and A. Ghesquiere	
Discussion	91

Session 2 GENETIC MARKERS, LINKAGE GROUPS, AND ANEUPLOIDS

- Analysis of genes for stigma coloration in rice **97**
H.I. Oka
- Gene mapping of some morphological traits and chlorophyll deficiency in rice **111**
M. Maekawa, I. Takamura, and T. Kinoshita
- Linkage relationships between genetic male sterile and marker genes in rice **121**
H.S. Suh, J.D. Kim, M.H. Heu, and G.S. Chung
- Linkage analysis and application of isozyme genes in rice **127**
R. Ishikawa, H. Morishima, and T. Kinoshita
- Genetic mapping in rice using isozyme and RFLP markers **137**
D.S. Brar, B.G. de los Reyes, O. Panaud, A. Sanchez, and G.S. Khush
- Production of monosomic alien addition lines of *Oryza sativa* having a single *O. punctata* chromosome **147**
H. Yasui and N. Iwata
- Discussion **157**

Session 3 GENETICS OF STRESS TOLERANCE

- Genetics of leaf rolling under drought stress **159**
B.N. Singh and D.J. Mackill
- Genetic analysis for salt tolerance in rice **167**
K.K. Narayanan and S.R. Sree Rangasamy
- Inheritance of panicle exertion in *Oryza sativa* under low temperature **175**
D.M. Mahishi, M. Mahadevappa, and P. Gopala Reddy
- Discussion **179**

Session 4 GENETICS OF MORPHOLOGICAL AND PHYSIOLOGICAL TRAITS

- Inheritance of grain size and its implications for rice breeding **181**
K. Takeda
- Genetics and biochemistry of in vitro-selected lysine mutants **191**
G.W. Schaeffer
- Mutants for rice storage proteins **201**
T. Kumamaru, M. Ogawa, and H. Satoh
- Genes for late heading and their interaction in the background of Taichung 65 **211**
Kuo-Hai Tsai
- Photoperiod-conditioned male sterility and its inheritance in rice **217**
Wang Xiangming, Wang Mingquan, Mei Guozhi, Wu Hongyu,
Duan Wenjie, and Wang Weijian

Thermosensitive genetic male sterility induced by irradiation **227**
K. Maruyama, H. Araki, and H. Kato

Discussion **233**

Session 5 GENETICS OF DISEASE AND INSECT RESISTANCE

Transfer of blast and bacterial blight resistance from *Oryza minuta* to *O. sativa* **237**
A.D. Amante-Bordeos, R.J. Nelson, N.P. Oliva, R.D. Dalmacio, H. Leung, and L.A. Sitch

Inheritance of resistance to rice tungro spherical virus in rice (*Oryza sativa* L.) **247**
M. Shahjahan, T. Imbe, B.S. Jalani, A.H. Zakri, and O. Othman

Genetics of rice resistance to brown planthopper *Nilaparvata lugens* (Stål) and relative contribution of genes to resistance mechanisms **255**
M. Bharathi and S. Chelliah

Genetic analysis of resistance to whitebacked planthopper *Sogatella furcifera* Horvath in rice **263**
Min Shaokai, Li Ximing, Xiong Zhenmin, and Hu Guowen

Discussion **269**

Session 6 TISSUE AND CELL CULTURE

Application of somaclonal variation and in vitro selection to rice improvement **271**
J. Bouharmont, A. Dekeyser, V. Van Sint Jan, and Y.S. Dogbe

Diallel analysis of callus growth and plant regeneration in rice **279**
T. Abe and Y. Futsuhara

Genetic analysis for salt tolerance of in vitro regenerant progenies of rice **289**
K.K. Narayanan and S.R. Sree Rangasamy

Somaclonal male sterile mutants and their expression in indica rice **295**
D.H. Ling, Z.R. Ma, M.F. Chen, C.Y. Liang, and B.S. Ho

Regeneration and transformation of protoplasts in indica rice **305**
Xiang-hui Li, A.P. Aryan, Cheng-bin Xiang, and T.W. Okita

Isolated microspore culture of rice at the International Rice Research Institute **311**
F.J. Zapata, R.R. Aldemita, E.S. Ella, and Moon Soo Cho

Cryopreservation: a method for maintaining plant regeneration capability of rice cell suspension cultures **321**
P.T. Lynch and E.E. Benson

Discussion **333**

Session 7 MOLECULAR GENETICS OF CYTOPLASMIC GENOMES

Structure of cytoplasmic genomes in rice **337**

A. Hirai, M. Iwahashi, K. Sugino, A. Kanno, and T. Ishibashi

Rice mitochondrial genes **343**

C. André, E.K. Kaleikau, and V. Walbot

Organization of mitochondrial DNA in male sterile and fertile lines of rice **355**

N.M. Saleh, H.S. Gupta, R. Finch, E. Rech, E.C. Cocking, and B.J. Mulligan

Genetic analysis of nuclear DNAs homologous to small mitochondrial plasmid-like DNAs in cultivated rice **365**

W. Sakamoto, K.-I. Kadowaki, N. Kishimoto, M. Yano, A. Saito, and S. Tano

Discussion **373**

Session 8 MOLECULAR GENETICS OF NUCLEAR GENOMES

A rice DNA sequence that resembles the maize Mu 1 transposable element **377**

Yong Xie, Yixin Wang, and Ray Wu

Genetic variation in tissue culture-derived rice plants **389**

P.T.H. Brown, E. Müller, K. Shimamoto, and H. Lörz

Characterization of repeated DNA sequences specific to different rice genomes **401**

F. Cordesse, A.S. Reddy, A. De Kochko, M. C. Kiefer, and M. Delseny

Species-specific repetitive DNA sequences as markers in rice backcross breeding programs **409**

H. Aswidinnoor, J.F. Dallas, C.L. McIntyre, and J.P. Gustafson

Organization, structure, and expression of the rice α -amylase multigene family **417**

R.L. Rodriguez, N. Huang, T. Sutliff, S. Ranjhan, E. Karrer, and J. Litts

Discussion **431**

Session 9 RFLP ANALYSIS OF RICE GENOMES

RFLP mapping of the rice genome **435**

S.D. Tanksley, N. Ahn, M. Causse, R. Coffman, T. Fulton, S.R. McCouch, G. Second, T. Tai, Z. Wang, K. Wu, and Z. Yu

Tagging genes for disease and insect resistance via linkage to RFLP markers **443**

S.R. McCouch, G.S. Khush, and S.D. Tanksley

RFLP tagging of blast resistance genes in rice **451**

Zhihong Yu, D.J. Mackill, J.M. Bonman, and S.D. Tanksley

Toward the integration of a restriction fragment length polymorphism map and conventional genetic map of rice *Oryza sativa* L. **459**

M. Yano, A. Saito, N. Kishimoto, M. Kawase, K. Saito, T. Nagamine, M. Katsuta, M. Nakagahra, S. Kuhara, S. Yoshimura, O. Ideta, A. Yoshimura, and N. Iwata

Intraspecific variation and genetic differentiation based on restriction fragment length polymorphism in Asian cultivated rice, *Oryza sativa* L. **467**

M. Kawase, N. Kishimoto, T. Tanaka, A. Yoshimura, S. Yoshimura, K. Saito, A. Saito, M. Yano, N. Takeda, T. Nagamine, and M. Nakagahra

Cytoplasmic DNA markers, phylogeny, and systematics in *Oryzae* **475**
G. Second

Biology and genetics of *Pyricularia oryzae* and *P. grisea* populations: current situation and development of RFLP markers **487**

M.-H. Lebrun, M.-P. Capy, N. Garcia, M. Dutertre, Y. Brygoo, J.-L. Notteghem, and M. Valès

Discussion **499**

Session 10 MOLECULAR GENETICS OF RICE PROTEINS

Rice endosperm proteins and their accumulation signals **503**

N. Mitsukawa and K. Tanaka

Genetic manipulation of storage proteins in rice **513**

V.S. Gupta, Y.R. Mawal, M.N. Sainani, and P.K. Ranjekar

Glutelin genes in wild rices **521**

Hsin-Kan Wu and Tien-Chin Chen

Discussion **527**

Session 11 MOLECULAR GENETICS OF DISEASE RESISTANCE

Defense gene regulation **529**

C.J. Lamb, Qun Zhu, R.T. Yamamoto, A. Beeche, A.J. Nelson, and M.A. Lawton

Molecular biology of rice tungro viruses: evidence for a new reovirus **539**

R. Hull, M.C. Jones, I. Dasgupta, J.M. Cliffe, C. Mingins, G. Lee, and J.W. Davies

Recent advances in genetic analysis of rice-blast fungus interaction **549**

H. Leung, D. Skinner, P. Tooley, M. Bernardo, A. Amante-Bordeos, R. Karjalainen, and S. Leong

Discussion **561**

Session 12 TRANSFORMATION TECHNIQUES

Co-transformation of indica rice via polyethylene glycol-mediated DNA uptake **563**

Jianyong Peng, L.A. Lyznik, and T.K. Hodges

Efficient transformation of rice cells and production of transgenic rice plants **575**

Y. Tada, M. Sakamoto, M. Matsuoka, and T. Fujimura

Rice transformation, vectors, and expression of transferred genes **585**

L.A.M. Hensgens, E.G.M. Meijer, P.E. Van Os-Ruygrok, S. Rueb, B.S. de Pater, and R.A. Schilperoort

- Evaluation of transformation techniques for monocots **597**
A.P. Aryan, K.A. Roberti, Xiang-hui Li, and T.W. Okita
- Transgenic rice plants produced by direct uptake of the *d*-endotoxin protein gene from *Bacillus thuringiensis* into rice protoplasts **605**
H. Yang, S.D. Guo, J.X. Li, X.J. Chen, and Y.L. Fan
- Inheritance of a foreign gene in transgenic indica rice plants **613**
S.K. Datta, K. Datta, A. Peterhans, and I. Potrykus
- Polygenic transformation of rice using microprojectile-delivered DNA **625**
M.B. Sticklen, R.K. Hajela, N. Hajela, D. McElroy, J. Cao, and R. Wu
- State of the art in gene transfer to cereals **637**
I. Potrykus
- Discussion **647**

Posters

- Characterization of a repetitive hypermutable region in *Oryza sativa* **649**
T.E. Bureau, G.S. Khush, and S.R. Wessler
- Isolation and characterization of rice CC genome-specific sequences **650**
A.S. Reddy, F. Cordesse, and M. Delseny
- Comparative studies of the structure of chloroplast DNA from four *Oryza* species: cloning and physical maps **651**
A. Kanno, K. Hattori, and A. Hirai
- Evolution of the intergenic spacer region of ribosomal DNA in cultivated and wild rice species **653**
Y. Sano, R. Sano, and H.-Y. Hirano
- Cytoplasmic and nuclear DNA differentiation in cultivated rice species **655**
T. Ishii, T. Terachi, N. Mori, and K. Tsunewaki
- Physical mapping of rice restriction fragment length polymorphism clones **658**
J.P. Gustafson, C.L. McIntyre, and J.E. Dillé
- Efficient introduction of foreign gene into partially digested small cell groups of rice by polyethylene glycol **660**
Jinshui Yang, Koulin Ge, Yunzhu Wang, and C.C. Tan
- Introduction of exogenous DNA directly into rice **663**
Chen Shanbao, Duan Xiaolan, Yan Changsheng, Xing Guandang, and Zhang Yan
- Isolation of rice phytochrome genes from Nongken 58 and Nongken 58s **665**
B. Wang, H.G. Zheng, Q.F. Xu, J.Z. Wang, D.D. Li, S.T. Li, and Z.T. Zhang
- Restriction fragment length polymorphism for characterizing monosomic alien addition lines of *Oryza sativa* having a single chromosome of *O. brachyantha* **667**
O. Panaud, G. Magpantay, E. Galinato, D. Mahapatra, L.A. Sitch, and G.S. Khush

- Restriction fragment length polymorphism analysis of size of chromosomal segments retained around bacterial blight resistance genes in near-isogenic lines of rice **668**
S.Yoshimura, A. Yoshimura, N. Iwata, A. Saito, N. Kishimoto, M. Kawase, M. Nakagahra, and M. Yano
- Accumulation signals of rice endosperm proteins **671**
N. Mitsukawa and K. Tanaka
- Assessment of protoclonal variation in seed progeny of transgenic plants regenerated from rice protoplasts **673**
E.C. Cocking, S.L. Kothari, H. Zhang, P.T. Lynch, P.S. Eyles, E.L. Rech, and M.R. Davey
- Tissue culture and somatic hybridization of indica and japonica rices **675**
I.H. Slamet
- Somatic hybridization studies between rice and *Porteresia coarctata* **678**
R.P. Finch
- Stress tolerance in rice cell lines **680**
K.-I. Mori and T. Kinoshita
- Novel proteins involved in dedifferentiation and redifferentiation in rice *Oryza sativa* L. **682**
A. Tanaka and S. Tano
- Cytohistological observations on plantlet regeneration from rice calli **685**
A.B. Mendoza, Y. Futsuhara, and Y. Takeoka
- Production of aneuploids (2n=13) in rice *Oryza sativa* L. by anther culture of trisomic plants **687**
Wang Zixuan and N. Iwata
- Assessment of gametic selection in indica/upland japonica rice anther cultures by isozyme markers **689**
E. Guiderdoni
- Salt tolerance in rice callus cultures **693**
P.B. Kavi Kishor and G.M. Reddy
- Regeneration of plants from cultured anthers of salt-tolerant CSR-1 rice **695**
N.R. Yadav, D.R. Sharma, and J.B. Chowdhury
- Chromosome studies and multiplication of embryonic cells derived from anther culture of indica rice **697**
Wu Jiadao, Huang Zhongxiang, Liu Zuling, Zheng Leya, Yan Jianbo, and Chen Yan
- Current linkage maps in rice **699**
T. Kinoshita
- Characterization of rice chromosomes by imaging methods **703**
K. Fukui and K. Iijima

- Chromosome constitution of diploid-like plants derived from gamma-irradiated tetraploids **706**
H. Fukuoka, Y. Kageyama, K. Yamamoto, and G. Takeda
- Genetic analysis of heading time by using linkage relationship with isozyme gene Pgl-2 in rice **708**
I. Imuta, F. Kikuchi, I. Watanabe, and M. Yusa
- Effects of dwarfing genes on cell characteristics in rice internodes **710**
O. Kamijima
- Effects of dwarf genes on rice root elongation **712**
H. Kitano and Y. Futsuhara
- Genetic aspects of organ differentiation during rice embryogenesis **714**
Y. Nagato, H. Kitano, O. Kamijima, S. Kikuchi, and H. Satoh
- Genetic identification of mutant genes for reduced culm number **716**
I. Takamura
- Grain-shattering gene linked with semidwarfing gene *sd-1* **718**
S. Oba and F. Kikuchi
- Semidwarfing genes influencing morphological traits and physiological ability of rice roots **720**
M. Ichii, Shui Shan Li, and H. Hasegawa
- Eating quality of rice cultivars in reference to chemical components **722**
A. Matsuzaki, T. Takano, and G. Takeda
- Genetic analysis of grain size in rice **724**
T. Kato
- Core collections: providing access to wild *Oryza* germplasm **726**
D.A. Vaughan
- Monosomic alien addition lines of *Oryza australiensis* and alien gene transfer **728**
K.K. Jena, D.S. Multani, and G.S. Khush
- Reexamination of genetic control of the reproductive barrier between *Oryza longistaminata* and *O. sativa*, and relationship to rhizome expression **729**
A. Ghesquiere
- Relatedness of annual and perennial strains of *Oryza rufipogon* investigated with nuclear DNA sequences **731**
P. Barbier and A. Ishihama
- Increasing cold and drought tolerance in rice with a new phytohormone analogue **734**
A.A. Flores-Nimedez, K. Dörffling, and B.S. Vergara
- Genetic control of chilling injury in rice seedlings detected by low-temperature treatment **737**
T. Nagamine and M. Nakagahra

- Simple, rapid procedure for analyzing polypeptide pattern of thylakoid membrane in rice **740**
K. Hattori, K. Watanabe, T. Nishimura, and Y. Futsuhara
- Breeding of near-isogenic lines for resistance to rice bacterial blight **742**
T. Ogawa, R.E. Tabien, T. Yamamoto, G.A. Busto, Jr., and R. Ikeda
- Variation in resistance to bacterial blight between and within wildrice populations **744**
C. Hamamatsu, Y.-I. Sato, and H. Morishima
- Genetic analysis of rice blast resistance using doubled haploids, single seed descent lines, and isozyme marker genes **746**
J. Abadassi, J.C. Glaszmann, J.L. Notteghem, E. Guiderdoni, and B. Courtois
- Induced mutations for rice improvement in Malaysia **749**
O. Mohamad, M.Z. Abdullah, O. Othman, K. Hadzirn, J. Mahmud, and O. Ramli
- Mutagen-induced male sterility in rice **752**
J.L. Minocha, J.S. Sidhu, and R.K. Gupta
- Induction of inheritable dwarfism in rice by DNA demethylation **754**
H. Sano, S. Youssefian, I. Kamada, and M. Itoh
- Mutagenic effects of accelerated argon ion irradiation in rice **755**
M.T. Mei, Q.F. Zuo, Y.G. Lu, H. Deng, and T.C. Yang
- Exploitation of useful semidwarfing genes by mutation **758**
T. Tanisaka and H. Yamagata
- Combining ability and heterosis for yield and yield components related to reproductive-stage salinity and sodicity tolerance in rice *Oryza sativa* L. **761**
B. Mishra
- Genetics of quantitative traits in rice in mid-altitude swamps of Burundi **762**
J.P. Tilquin, J.P. Chapeaux, and J.F. Detry
- Genetic studies on intercalary elongation **764**
Yi-Shin Chen and Chia-Yi Aes
- Some quantitative characters of rice *Oryza sativa* L. studied by triple testcross analysis **766**
Bui Chi Buu and Thai Thi Hanh
- Genetic analysis of wide compatibility varieties of rice *Oryza sativa* L. **768**
Minghong Gu, Aiqing You, and Xuebiao Pan
- An approach to the genetic pattern of compatibility in an *O. sativa* indica/japonica cross **770**
Qi Zu-bai, Cai Ye-Tong, and Li Bao-jian
- Does hybrid sterility isolate indicas from japonicas? **771**
T. Nomura, Y.-I. Sato, and K. Yonezawa
- Effects of genotype \times environment interaction on late-heading Japanese rice **773**
T. Sato

- Variation in chlorophyll proteins between wet and dry season rice varieties **775**
N. Watanabe, R.B. Austin, and C.L. Morgan
- Genotypic difference in response to light interruption in Japanese rice varieties **778**
Y. Okumoto, T. Tanisaka, and H. Yamagata
- Differentiation between populations of wild rice (*Oryza rufipogon*) coexisting with *Leersia hexandra* and *Ipomoea aquatica* **781**
Y. Shimamoto and H. Morishima
- Rice aroma: methods of evaluation and genetics **783**
Shih-Cheng Lin
- Application of computer image analysis to characterization of plant type in rice—
response to spacing **785**
K. Hinata and M. Oka
- Genetic analysis of embryo length in rice *Oryza sativa* L. **787**
M.P. Pandey, D.V. Seshu, and M. Akbar
- Induced mutations for identifying and characterizing genes in rice: I. Three useful
mutants and their characteristics **788**
Moo Young Eun, Yong Gu Cho, Yong Kwon Kim, and Tae Young Chung
- Reliable, simple method for producing rice plants through anther culture **791**
Gun-Sik Chung, Sae-Jun Yang, and Byeong-Geun Oh
- Internode elongation system of Nepalese rice **794**
G.L. Shrestha
- Inheritance of high-density rice grain and its relation to other panicle characters **797**
S. Mallik, A.M. Aguilar, and B.S. Vergara
- Restriction fragment length polymorphism analysis of wide-cross progenies having
brown planthopper resistance gene(s) introgressed from *Oryza officinalis* into
O. sativa **800**
K.K. Jena, G.S. Khush, and G. Kochert
- Amplification of chloroplast DNA fragment from a single ancient rice seed **802**
I. Nakamura and Y.-I. Sato
-
- Overview of the Second International Rice Genetics Symposium **807**
K.J. Frey
- Closing remarks **809**
F.A. Bernardo
- Committee reports **813**
- Participants **820**
- Index of varieties and lines **836**
