FOREWORD **xvii**

PLENARY SESSION PAPERS

Economic prosperity in Asia: implications for rice research **3**
M. Hossain

Establishing the Rockefeller Foundation's priorities for rice biotechnology
research in 1995 and beyond **17**
R.W. Herdt

High-density linkage map of rice with expressed sequence tags **31**
B.A. Antonio, A. Shomura, T. Shimano, Y. Kuboki, S.Y. Lin, T. Inoue, H. Kajiya,
Y. Harushima, K. Yamamoto, Y. Nagamura, N. Kurata, M. Yano, Y. Minobe,
and T. Sasaki

An integrated linkage map of rice **47**
O. Ideta, A. Yoshimura, and N. Iwata

Centromere mapping and orientation of the cytological, classical,
and molecular linkage maps of rice **57**
G.S. Khush, K. Singh, T. Ishii, A. Parco, N. Huang, D.S. Brar, and D.S. Multani

Rice as the pivotal genome in the new era of grass comparative genetics **77**
M.D. Gale, K.M. Devos, and G. Moore

Construction of a first-generation physical map of the rice genome **85**
I. Ashikawa, Y. Umehara, H. Tanoue, Z. Wang, S. Saji, T. Shimokawa,
K. Yoshino, J. Wu, B. Antonio, K. Koike, W. Van Houten, A. Idonuma,
M. Emoto, N. Kurata, and T. Sasaki

- Application of cDNA sequence information for characterization of the rice genome **97**
 A. Miyao, K. Yamamoto, C. Hamamatsu, H. Itadani, Y. Koga-Ban, K. Koike, S. Kojima, H. Nagasaki, T. Shimizu, Y. Shinozuka, J. Song, U. Yamanouchi, M. Yoshikawa, L. Monna, H. Sun Zhong, H. Ichimura, and T. Sasaki
- Structure and gene expression of the mitochondrial genome of rice **105**
 M. Nakazono, N. Tsutsumi, and A. Hirai
- Advances in rice chromosome research, 1990–95 **117**
 K. Fukui
- Stable inheritance of transgenes in rice plants transformed by *Agrobacterium tumefaciens* **131**
 Y. Hiei and T. Komari
- Agrobacterium*-mediated transformation of an elite cultivar of Texas rice **143**
 J.J. Dong, W.M. Teng, W.G. Buchholz, and T.C. Hall
- Biolistic transformation of rice: now efficient and routine for japonica and indica rices **153**
 C.M. Fauquet, S. Zhang, L. Chen, P. Marmey, A. de Kochko, and R.N. Beachy
- Transformation of rice for producing agronomically useful transgenic plants and/or analyzing gene expression, including the gibberellin-dependent signaling pathway **167**
 R. Wu, X. Chen, B. Wang, M. Chang, D. Xu, X. Duan, and P. Chen
- Transgenic indica rice for the benefit of less developed countries: toward fungal, insect, and viral resistance, and accumulation of β -carotene in the endosperm **179**
 I. Potrykus, G.A. Armstrong, P. Beyer, S. Bieri, P.K. Burkhardt, H. Ding Chen, G.C. Ghosh Biswas, S.K. Datta, J. Fütterer, A. Klöti, G. Spangenberg, R. Terada, J. Wünn, and H. Zhao
- Genetic engineering of rice for resistance to homopteran insect pests **189**
 J.A. Gatehouse, K. Powell, and H. Edmonds
- Construction of transgenic rice plants resistant to rice yellow stunt virus, a plant rhabdovirus **201**
 R.-X. Fang, H.-T. Zhu, Q. Wang, K.-Q. Mang, D.-M. Gao, W.-S. Qin, L. Zhang, S.-Y. Cao, W.-Z. Tian, and L.-C. Li
- FLP/*FRT*-mediated manipulation of transgenes in the plant genome **207**
 T.K. Hodges, L.A. Lyznik, K.V. Rao, H. Kononowicz, K.S. Rathore, and R. Su

- Introduction of multiple genes into elite rice varieties—evaluation of transgene stability, gene expression, and field performance of herbicide-resistant transgenic plants **223**
P. Christou, P. Vain, A. Kohli, M. Leech, J. Oard, and S. Linscombe
- Production and testing of insect-resistant transgenic rice plants **239**
Q. Xue, X. Duan, D. Xu, and R. Wu
- The rice disease resistance gene, *Xa21*, encodes a receptor kinase-like protein **247**
P. Ronald, W.-Y. Song, G.-L. Wang, L.-L. Chen, H.-S. Kim, L.-Y. Pi, T. Holsten, B. Wang, C. Williams, W.-X. Zhai, L.-H. Zhu, and C. Fauquet
- Molecular analysis of the interaction between *Xanthomonas oryzae* pv. *oryzae* and rice **255**
F.F. White, J.M. Chittoor, J.E. Leach, S.A. Young, and W. Zhu
- Exploring the application of molecular markers for improving resistance to bacterial blight **267**
R.J. Nelson, E. Ardales, M. Baraoidan, I. Yap, M.L.C. George, D.H. Chen, M. Finckh, A. Bordeos, C.M. Vera Cruz, T. Adhikari, C.C. Mundt, M. Bustamam, W. Cruz, H. Leung, N. Huang, A. Yoshimura, S. McCouch, T.W. Mew, and J.E. Leach
- Molecular analysis of repeated DNA sequences from the rice blast fungus *Magnaporthe grisea* **279**
P. Kachroo, S.A. Leong, and B.B. Chattoo
- Sequence-tagged sites and low-cost DNA markers for rice **293**
J.A. Robeniol, S.V. Constantino, A.P. Resurreccion, C.P. Villareal, B. Ghareyazie, B.-R. Lu, S.K. Katiyar, C.A. Menguito, E.R. Angeles, H.-Y. Fu, S. Reddy, W. Park, S.R. McCouch, G.S. Khush, and J. Bennett
- Marker-assisted prediction of agronomic traits using diverse rice germplasm **307**
P. Virk, B.V. Ford-Lloyd, M.T. Jackson, H.S. Pooni, T.P. Clemeno, and H.J. Newbury
- Relationships between molecular marker polymorphism and hybrid performance in rice **317**
Q. Zhang, M.A. Saghai Maroof, G.P. Yang, K.D. Liu, Z.Q. Zhou, K.A. Gravois, C.G. Xu, and Y.J. Gao
- Dominance as the major genetic basis of heterosis in rice **327**
J. Xiao, J. Li, L. Yuan, and S.D. Tanksley
- Genetic and molecular analysis of the anthocyanin pigmentation pathway in rice **341**
A.R. Reddy

Sorting of storage protein mRNAs on distinct endoplasmic reticulum membranes in developing rice endosperms **353**

D.G. Muench, Y. Zhang, Y. Wu, and T.W. Okita

CONCURRENT SESSION PAPERS

I. VARIETAL DIFFERENTIATION AND EVOLUTION

Phylogenetic relationships between cultivated and wild species of rice as revealed by DNA polymorphisms **367**

T. Ishii, T. Nakano, H. Maeda, O. Kamijima, and G.S. Khush

pRRD9, a repetitive DNA sequence that transfers from the chloroplast genome to the nuclear genome with diverse amplification across species **373**

A.D. Han, C.X. Wang, Z. Xiao, H. Yu, W.H. Liu, and L.S. Liu

Monitoring wild rice populations in permanent study sites in Thailand **377**

H. Morishima, Y. Shimamoto, Y.I. Sato, S. Chitrakon, Y. Sano, P. Barbier, T. Sato, and H. Yamagishi

Genetic dissection of crossability in rice **381**

Y. Sano and S. Kobayashi

II. GENETICS OF MORPHOLOGICAL AND PHYSIOLOGICAL TRAITS

Genetic analysis of morphological mutations in rice spikelets **387**

I. Takamure and T. Kinoshita

Allelic variation at the gametophyte gene (*ga2*) locus in rice

(*Oryza sativa* L.) **391**

Sobrizal, A. Yoshimura, and N. Iwata

The gametic lethal gene *gal*: activated only in the presence of the semidwarfing gene *d60* in rice **396**

M. Tomita

Differentiation of alleles at six loci for hybrid sterility in cultivated rice

(*Oryza sativa* L.) **404**

H. Ikehashi and J. Wan

Genetics of hybrid sterility and hybrid breakdown in an interspecific rice

(*Oryza sativa* L.) population **409**

Z. Li, S.R.M. Pinson, A.H. Paterson, W.D. Park, and J.W. Stansel

Genetics of F₁ pollen sterility in *Oryza sativa* **418**

G. Zhang and Y. Lu

Effects of three genes that control heading date (*Se1*, *E1*, and *Efl*)
in four varietal groups of japonica rice **423**
Y. Okumoto, H. Inoue, K. Ichitani, and T. Tanisaka

Identifying cold tolerance gene(s) in rice at the booting stage **428**
M. Maekawa

Genotypic variability in nitrate assimilation in rice **434**
E.A. Barlaan and M. Ichii

Introducing lodging resistance into long-culm rices **441**
T. Ookawa, T. Hirawasa, and K. Ishihara

III. GENETICS OF DISEASE RESISTANCE

Genetic analysis of blast resistance in tropical rice cultivars
using near-isogenic lines **447**

T. Inukai, R.J. Nelson, R.S. Zeigler, S. Sarkarung, D.J. Mackill,
J.M. Bonman, I. Takamure, and T. Kinoshita

Blast resistance genes from Teqing and Lemont **451**
R.E. Tabien, S.R.M. Pinson, M.A. Marchetti, Z. Li, W.D. Park, A.H. Paterson,
and J.W. Stansel

Monitoring race distribution and identification of genes
for resistance to bacterial leaf blight **456**
T. Ogawa

Molecular variation as a diverse source of disease resistance
in cultivated rice **460**
J.C. Glaszmann, T. Mew, H. Hibino, C.K. Kim, T.I. Vergel de Dios-Mew,
C.H. Vera Cruz, J.L. Notteghem, and J.M. Bonman

IV. CYTOGENETICS

Physical mapping of several genes in rice using fluorescent
in situ hybridization **467**
N. Ohmido, H. Ohtsubo, E. Ohtsubo, and K. Fukui

Chromosomal location of genes encoding glutelin polypeptides in rice **471**
Y.J. Uemura, H. Satoh, M. Ogawa, H. Suehisa, T.C. Katayama, and A. Yoshimura

Gene transfer and molecular characterization of introgression from wild rice
Oryza species into rice **477**
D.S. Brar, R. Dalmacio, R. Elloran, R. Aggarwal, R. Angeles, and G.S. Khush

V. TISSUE AND CELL CULTURE

Haploid, somaclone, and transformation studies in basmati rice **487**
S.K. Raina, H. Khanna, M.S. Bisht, K. Kumar, U. Kumar, S.T. Irfan, and V.P. Singh

Genetic variation of single pollen-derived doubled haploid population in rice **492**
H.-P. Moon, K.-H. Kang, S.-H. Choi, and S.-N. Ahn

Variation in some quantitative characters in doubled haploid lines derived from a heterotic rice hybrid **499**
B.B. Bong and M.S. Swaminathan

Gameto- and somaclonal variations in rice cultivars of the Russian Far East **505**
Y.N. Zhuravlev and V.N. Zmeeva

Anther culture as a rice breeding tool: a profitable investment **511**
L.R. Sanint, C.P. Martinez, and Z. Lentini

Effects of amino acids, carbohydrates, and water stress on plant regeneration from cell and protoplast cultures of indica and japonica rice varieties **519**
R.K. Jain, S. Jain, M.R. Davey, E.C. Cocking, and R. Wu

Changes of endogenous phytohormones during plant regeneration from rice callus **525**
L.-F. Liu and C.-H. Lee

Protoplast culture and genetic transformation of indica and basmati rice **532**
S.S. Gosal, AS. Sindhu, R. Sandhu-Gill, R. Gill, S. Kaur, G.S. Sidhu, and H.S. Dhaliwal

Protoplast regeneration and variation in protoclonal lines of indica rice **536**
N.M. Ramaswamy, S. Sukumar, D. Tamil Selvi, A. Selvi, and S.R. Sree Rangasamy

Transfer of cytoplasmic male sterility in rice using the donor-recipient method **540**
T. Kinoshita and Ko-ichi Mori

Interaction of rhizobia with rice for symbiotic nitrogen fixation **545**
E.C. Cocking, S.L. Kothari, C.A. Batchelor, S. Jain, G. Webster, J. Jones, J. Jotham, and M.R. Davey

VI. MOLECULAR MAPPING OF GENES

Development of microsatellite markers and characterization of simple sequence length polymorphism in rice (*Oryza sativa* L.) **549**
S. McCouch, O. Panaud, X. Chen, and Y. Xu

- Genetic mapping of resistance to rice tungro spherical virus (RTSV) and green leafhopper (GLH) in ARC11554 **560**
L.S. Sebastian, R. Ikeda, N. Huang, T. Imbe, W.R. Coffman, M. Yano, T. Sasaki, and S.R. McCouch
- Identification of DNA markers tightly linked to blast resistance genes in rice **565**
K.L. Zheng, J.Y. Zhuang, J. Lu, H.R. Qian, and H.X. Lin
- Molecular genetic analysis and sequence characterized amplified region-assisted selection of blast resistance in rice **570**
N.I. Naqvi and B.B. Chattop
- Analysis of pyramiding of bacterial blight resistance genes in rice by using DNA markers **577**
A. Yoshimura, J.X. Lei, T. Matsumoto, H. Tsunematsu, S. Yoshimura, N. Iwata, M.R. Baraoidan, T.W. Mew, and R.J. Nelson
- Development of diagnostic markers for the bacterial blight resistance gene, *xa5* **582**
M.W. Blair and S.R. McCouch
- Genetic analysis and tagging of gene for brown planthopper resistance in indica rice **590**
M. Mei, C. Zhuang, R. Wang, J. Wu, W. Hu, and G. Kochert
- Tagging and mapping the rice thermosensitive genic male sterile gene of rice with molecular markers **596**
B. Wang, W.W. Xu, J.Z. Wang, M.L. Weng, M.Y. Li, R.C. Yang, and H.T. Nguyen
- Inheritance and molecular mapping of the thermosensitive genic male sterility gene in rice **601**
P.K. Subudhi, R.P. Borkakati, S.S. Virmani, and N. Huang
- Genetics of seedling-stage submergence tolerance in rice **607**
D.J. Mackill and K. Xu
- Tagging an aromatic gene in lowland rice using bulk segregant analysis **613**
S. Tragoonrun, J.Q. Sheng, and A. Vanavichit
- Quantitative trait locus analysis using recombinant inbred lines and restriction fragment length polymorphism markers in rice **619**
H. Tsunematsu, A. Yoshimura, M. Yano, and N. Iwata
- Mapping of quantitative trait loci and quantitative-trait-modifying factors affecting three grain yield components (*Oryza sativa* L.) in rice **624**
Z. Li, S.R.M. Pinson, W.D. Park, A.H. Paterson, and J.W. Stansel

Using doubled haploid populations of rice for quantitative trait locus mapping **631**

L. Zhu, C. Lu, P. Li, L. Shen, Y. Xu, P. He, and Y. Chen

Molecular mapping of drought resistance traits in rice **637**

R. Chandra Babu, H.G. Zheng, M.S. Pathan, M.S. Ali, A. Blum, and H.T. Nguyen

RFLP mapping of genes controlling root morphology in an indica/japonica doubled haploid population **643**

R. Yadav, B. Courtois, and N. Huang

QTL analysis as an aid to tagging of genes that control heading time in rice **650**

M. Yano, H. Yoshiaki, Y. Kuboki, S.Y. Lin, N. Nagamura, N. Kurata, T. Sasaki, and Y. Minobe

Using quantitative trait locus analysis for studying genetic regulation of shattering **657**

Y. Fukuta, Y. Harushima, and M. Yano

RiceGenes, an international genome data base for rice **663**

E. Paul, M. Goto, and S.R. McCouch

VII. MAP-BASED GENE CLONING

Cloning a blast resistance gene by chromosome walking **669**

K.S. Wu, C. Martinez, Z. Lentini, J. Tohme, F.H.G. Chumley, P.A. Scolnik, and B. Valent

Positional cloning of rice blast resistance genes **675**

S. Kawasaki, K. Rybka, M. Miyamoto, Y. Tanaka, M. Kataoka, A. Saito, and I. Ando

Molecular cloning of a rice blast resistance gene and its genetic transformation **681**

M. Xie, H. Gu, R.N. Beachy, C. Fauquet, and Z.L. Chen

VIII. MOLECULAR GENETICS OF CYTOPLASMIC MALE STERILITY

Molecular genetic studies on the rice mitochondrial genome **689**

K.K. Narayanan, P. Senthilkumar, S. Venmadhi, G. Thomas, and J. Thomas

IX. TRANSFORMATION

Agrobacterium-mediated production of transgenic plants from mature embryos of commercial rice varieties **697**

J. Zhang, R.-J. Xu, M.C. Elliott, and D.-F. Chen

- Some factors influencing production of transgenic plants in polyethylene glycol-mediated transformation of rice protoplasts **703**
H. Chair, T. Legavre, and E. Guiderdoni
- Expression patterns of RCg2 and prolamine promoters in transgenic rice **710**
W.G. Buchholz, Y. Xu, K.C. Snowden, H. Yu, J. Ambler, J.P. Connell, D. Wallace, K. Tanaka, and T.C. Hall
- Transgenic rice plants obtained via the biolistic approach **717**
W. Tian, S. Dai, S. He, Y. Ding, M. Yang, L. Zhang, S. Cao, and L. Li
- Transgenic fertile rice plants obtained through biolistic transformation using reporter genes and the TR promoter **719**
J. Pauk, A. Nerlich, H. Pawelezyk, K. Schledzewski, J. Matuz, I.K. Simon, and R.R. Mendel
- Identification and use of specific promoters and synthetic *Bacillus thuringiensis* toxin genes in rice biotechnology **723**
R. Sardana and I. Altosaar
- Transformation of indica rice with Bt pesticidal genes **730**
S. Riazuddin, T. Husnain, E. Khan, S. Karim, F. Khanum, R. Makhdoom, and I. Altosaar
- Transfer of yellow stem borer resistance to indica rice cultivars **735**
P. Nayak, D. Basu, S. Das, D. Ghosh, A. Nandi, A. Basu, and S.K. Sen
- Synthetic *Bacillus thuringiensis* (*Bt*) toxin genes for insect resistance and their rapid bioassay using maize endosperm suspension cultures **737**
I. Altosaar, R. Sardana, S. Dukiandjiev, M. Giband, and H. Kaplan
- Potato proteinase inhibitor II gene that confers insect resistance in transgenic rice plants **743**
X. Duan, X. Li, Q. Xue, M. Abo-El-Saad, D. Xu, and R. Wu
- Resistance management strategies for *Bt* rice: what have we learned so far? **749**
M.B. Cohen, R.M. Aguda, A.M. Romena, G.K. Roderick, and F.L. Gould
- Mechanism of mannose-binding snowdrop lectin for use against brown planthopper in rice **753**
K.S. Powell and J.A. Gatehouse
- Evaluation of indica rice variety IR58 after its transformation with a synthetic *CryIA(b)* gene from *Bacillus thuringiensis* **759**
J. Wünn, A. Klöti, P.K. Burkhardt, G.C. Ghosh Biswas, S. Bieri, R. Terada, and I. Potrykus

- Toward genetically engineered resistance to rice tungro virus **763**
 A. Klöti, J. Fütterer, R. Terada, S. Bieri, J. Wünn, P. Burkhardt,
 G. Chen, Th. Hohn, G.C. Ghosh Biswas, and I. Potrykus
- Biological screening and analysis of transgenic rice lines expressing coat protein
 gene(s) of rice tungro spherical virus **768**
 E. Sivamani, P. Shen, C.A. Ong, G. Hamidah, G. Hassan,
 M.T. Mohamed Senawi, R.N. Beachy, and C.M. Fauquet
- Rice ragged stunt virus synthetic resistance genes
 and japonica rice transformation **773**
 N.M. Upadhyaya, K. Ramm, M. Yang, W. Kosiratana, and P.M. Waterhouse
- Genetic transformation of rice with viral genes for novel resistance
 against rice hoja blanca virus **780**
 Z. Lentini, L. Calvert, E. Tabares, I. Lozano, B.C. Ramirez, and W. Roca
- Genetic engineering of rice for resistance to sheath blight
 and other agronomic characters **785**
 S.K. Datta, C. Quimio, L. Torrizo, K. Datta, M.F. Alam, E. Abrigo,
 N. Oliva, M. Alejar, S. Biswas, S. Muthukrishnan, I. Potrykus,
 T. Setter, T. Mew, and G.S. Khush
- Antibacterial effects of *cecropin B* gene-transformed rice **792**
 B. Zhu, W. Yang, D. Huang, R. Xue, H. Xiao, S. Dai, W. Tian, and R. Wu
- Transformation of rice with agronomically useful genes toward production
 of insect-resistant, and water stress-tolerant plants **796**
 D. Xu, X. Duan, Q.-Z. Xue, B. Wang, and R. Wu
- Plant regeneration with high efficiency and production
 of herbicide (PPT)-resistant transgenic rice plants from protoplasts
 of wide compatibility rice strain 02428 **804**
 C. Wu and Y. Fan
- Molecular approaches to enhance rice productivity through manipulations
 of starch metabolism during seed development **809**
 Y. Zhang, S.E. Chantler, S. Gupta, Y. Zhao, D. Leisy, L.C. Hanna
 H.C. Meyer, J. Westor, M.-X. Wu, J. Preiss, and T.W. Okita
- Genetic modification of a rice glutelin cDNA and expression of the engineered
 glutelin gene in transgenic rice plants **814**
 E. Moon and R. Wu
- Genetic engineering of provitamin A biosynthesis in rice endosperm **818**
 P.K. Burkhardt, P. Beyer, R. Terada, A. Klöti, J. Wünn,
 J.v. Lintig, G.A. Armstrong, and I. Potrykus

- Transfer of *rol* genes to increase panicle-bearing tillers and induce early flowering in indica rice cultivars **822**
P. Nayak, N.S. Banerjee, S. Mishra, and S.K. Sen
- Cytosine methylation implicated in silencing of β -glucuronidase genes in transgenic rice **825**
A. Kohli, B. Ghareyazie, H.S. Kim, G.S. Khush, and J. Bennett
- Integrated sequence array and genome structure of integration sites in transgenic rice **829**
K. Wakasa and M. Takano
- X. GENE ISOLATION, CHARACTERIZATION, AND EXPRESSION
Isolation and characterization of lipoxygenases from rice induced by incompatible infection of rice blast fungus, *Magnaporthe grisea* **835**
Y.L. Peng, Y. Qin, Y. Yang, and J. Huang
- Preliminary studies on cloning blast resistance genes **842**
Z.H. He, Y.L. Wu, J.Q. Lin, S.J. Chen, and D.B. Li
- Genetic and molecular analysis of a cultivar specificity locus from the rice blast fungus *Magnaporthe grisea* **846**
S.A. Leong, M.L. Farman, and N. Nitta
- Rice tungro spherical virus: expression of the 3' nonstructural proteins **853**
V. Thole and R. Hull
- Investigation of the leader sequence and upstream genes of rice tungro spherical virus **857**
A. Druka, S. Zhang, Y. Yan, T.M. Burns, and R. Hull
- Negative regulation of an elicitor-responsive *cis*-element by a labile repressor **863**
Q. Zhu, T. Dabi, and C. Lamb
- Isolation of a 35-kDa chitinase from suspension-cultured rice cells and its potential in the development of sheath blight-resistant transgenic rice plant **868**
P. Vidhyasekaran, R. Velazhahan, R. Samniyappan, T. Ruby Ponmalar, and S. Muthukrishnan
- Post-transcriptional regulation of the rice waxy gene **873**
Z.Y. Wang, F.Q. Zheng, G.Z. Shen, J.P. Gao, D.P. Snustad, M.G. Li, J.L. Zhang, and M.M. Hong

- Glutelin genes in rice species **877**
H.-K. Wu, T.-C. Chen, and M.-C. Chung
- Molecular analysis of genes that control flowering in rice **884**
G. An
- Isolation and characterization of genes that control inflorescence **888**
K. Kushalappa, M.B. Suresh Kumar, L. Patwardhan, and U. Vijayraghavan
- High-molecular weight proteins associated with response of rice to various abiotic stresses **894**
A. Grover, S.L. Singla, and A. Pareek
- Rice proteasome: multicatalytic proteinase complex involved in cell proliferation **899**
M. Umeda, Y. Manabe, and H. Uchimiya
- Isolation and characterization of Tnr 1, a mobile genetic element in rice **903**
H. Ohtsubo, T. Tenzen, and E. Ohtsubo
- Genetic and molecular analysis of sporulation and pathogenesis in the rice blast fungus **910**
H. Leung, Z. Shi, Y. Shi, D. Fujimoto, J. Barroga, and D. Christian
- Mapping avirulence genes in the rice blast fungus *Magnaporthe grisea* **916**
W. Diah, D. Tharreau, R. Gomez, E. Roumen, M. Orbach, J.L. Notteghem, and M.H. Lebrun
- A giant gene cluster for an antifungal antibiotic and its potential relevance to rice biotechnology **921**
Z. Deng, Z. Hu, M. Tao, K. Bao, X. Zhou, Q. Zhou, D.A. Hopwood, and T. Kieser
- XI. GENETIC DIVERSITY IN PATHOGEN POPULATIONS
- Biological and molecular characteristics of rice dwarf and tungro viruses in Nepal **929**
G. Dahal, R. Hull, A. Druka, K. Murao, and I. Uyeda
- Detection and analysis of genetic polymorphism in *Xanthomonas oryzae* pv. *oryzicola* using repetitive sequence-based polymerase chain reaction **934**
A.K. Raymundo, M.T. Perez, and J.E. Leach
- Molecular genetic studies of the bacterial leaf blight pathogen of rice in India **939**
L. Rajagopal, Y. Jamir, S. Dharmapuri, M. Karunakaran, R. Ramanan, A.P.K. Reddy, and R.V. Sonti

Assessment of genetic diversity of *Xanthomonas oryzae* pv. *oryzae* in Nepal **945**
T. Adhikari, R.J. Nelson, T.W. Mew, and J.E. Leach

Population structure of *Pyricularia grisea* in two IRRI blast nurseries:
implications and applications **950**
D.H. Chen, R.S. Zeigler, and R.J. Nelson

Studies on the genetic diversity of *Pyricularia grisea*: a molecular approach
for management of rice blast **958**
R. Sivaraj, S.S. Gnanamanickam, and M. Levy

Population structure of *Magnaporthe grisea* in the traditional
Himalayan rice system **963**
J. Kumar, R.J. Nelson, and R.S. Zeigler

XII. RICE RESEARCH PRIORITIES

Rice recommendation domains and implications for biotechnology
initiatives in Nepal **971**
H.K. Upadhyaya

Priority setting for rice research in southern India **978**
C. Ramasamy

REPORT OF THE COMMITTEE ON GENE SYMBOLIZATION, NOMENCLATURE,
AND LINKAGE **985**

COMMITTEE ASSIGNMENTS, 1996–2000 **986**

PARTICIPANTS **987**
