

## CONTENTS

Preface	v
<b>Mesoscopic Effects in Superconductors</b>	<b>1</b>
Tunneling measurements of charge imbalance of non-equilibrium superconductors <i>R. Yagi</i>	3
Influence of magnetic impurities on Josephson current in SNS junctions <i>T. Yokoyama</i>	9
Nonlinear response and observable signatures of equilibrium entanglement <i>A. M. Zagoskin</i>	15
Stimulated Raman adiabatic passage with a Cooper pair box <i>Giuseppe Falci</i>	21
Crossed Andreev reflection-induced giant negative magnetoresistance <i>Francesco Giazotto</i>	27
<b>Quantum Modulation of Superconducting Junctions</b>	<b>33</b>
Adiabatic pumping through a Josephson weak link <i>Fabio Taddei</i>	35
Squeezing of superconducting qubits <i>Kazutomu Shiokawa</i>	41
Detection of Berry's phases in flux qubits with coherent pulses <i>D. N. Zheng</i>	47
Probing entanglement in the system of coupled Josephson qubits <i>A. S. Kiyko</i>	53
Josephson junction with tunable damping using quasi-particle injection <i>Ryuta Yagi</i>	59
Macroscopic quantum coherence in rf-SQUIDs <i>Alexey V. Ustinov</i>	65
Bloch oscillations in a Josephson circuit <i>D. Esteve</i>	71
Manipulation of magnetization in nonequilibrium superconducting nanostructures <i>F. Giazotto</i>	77

<b>Superconducting Qubits</b>	<b>83</b>
Decoherence and Rabi oscillations in a qubit coupled to a quantum two-level system	85
<i>Sahel Ashhab</i>	
Phase-coupled flux qubits: CNOT operation, controllable coupling and entanglement	91
<i>Mun Dae Kim</i>	
Characteristics of a switchable superconducting flux transformer with a DC-SQUID	97
<i>Yoshihiro Shimazu</i>	
Characterization of adiabatic noise in charge-based coherent nanodevices	103
<i>E. Paladino</i>	
 <b>Unconventional Superconductors</b>	 <b>109</b>
Threshold temperatures of zero-bias conductance peak and zero-bias conductance dip in diffusive normal metal/superconductor junctions	111
<i>Iduru Shigeta</i>	
Tunneling conductance in 2DEG/S junctions in the presence of Rashba spin-orbit coupling	118
<i>T. Yokoyama</i>	
Theory of charge transport in diffusive ferromagnet/ $p$ -wave superconductor junctions	124
<i>T. Yokoyama</i>	
Theory of enhanced proximity effect by the exchange field in FS bilayers	130
<i>T. Yokoyama</i>	
Theory of Josephson effect in diffusive $d$ -wave junctions	136
<i>T. Yokoyama</i>	
Quantum dissipation due to the zero energy bound states in high- $T_c$ superconductor junctions	143
<i>Shiro Kawabata</i>	
Spin-polarized heat transport in ferromagnet/unconventional superconductor junctions	149
<i>T. Yokoyama</i>	
Little-Parks oscillations in chiral $p$ -wave superconducting rings	155
<i>Mitsuaki Takigawa</i>	

Theoretical study of synergy effect between proximity effect and Andreev interface resonant states in triplet $p$ -wave superconductors <i>Yasunari Tanuma</i>	161
Theory of proximity effect in unconventional superconductor junctions <i>Y. Tanaka</i>	168
<b>Quantum Information</b>	<b>175</b>
Analyzing the effectiveness of the quantum repeater <i>Kenichiro Furuta</i>	177
Architecture-dependent execution time of Shor's algorithm <i>Rodney Van Meter</i>	183
<b>Quantum Dots and Kondo Effects</b>	<b>189</b>
Coulomb blockade properties of 4-gated quantum dot <i>Shinichi Amaha</i>	191
Order- $N$ electronic structure calculation of $n$ -type GaAs quantum dots <i>Shintaro Nomura</i>	197
Transport through double-dots coupled to normal and superconducting leads <i>Yoichi Tanaka</i>	203
A study of the quantum dot in application to terahertz single photon counting <i>Vladimir Antonov</i>	209
Electron transport through laterally coupled double quantum dots <i>T. Kubo</i>	215
Dephasing in Kondo systems: comparison between theory and experiment <i>F. Mallet</i>	221
Kondo effect in quantum dots coupled with noncollinear ferromagnetic leads <i>Daisuke Matsubayashi</i>	227
Non-crossing approximation study of multi-orbital Kondo effect in quantum dot systems <i>Tomoko Kita</i>	233
Theoretical study of electronic states and spin operation in coupled quantum dots <i>Mikio Eto</i>	239
Spin correlation in a double quantum dot-quantum wire coupled system <i>S. Sasaki</i>	245

Kondo-assisted transport through a multiorbital quantum dot <i>Rui Sakano</i>	251
Spin decay in a quantum dot coupled to a quantum point contact <i>Massoud Borhani</i>	256
<b>Quantum Wires, Low-Dimensional Electrons</b>	<b>263</b>
Control of the electron density and electric field with front and back gates <i>Masumi Yamaguchi</i>	265
Effect of the array distance on the magnetization configuration of submicron-sized ferromagnetic rings <i>Tetsuya Miyawaki</i>	271
A wide GaAs/GaAlAs quantum well simultaneously containing two dimensional electrons and holes <i>Ane Jensen</i>	277
Simulation of the photon-spin quantum state transfer process <i>Yoshiaki Rikitake</i>	282
Magnetotransport in two-dimensional electron gases on cylindrical surface <i>Friedland Klaus-Juergen</i>	288
Full counting statistics for a single-electron transistor at intermediate conductance <i>Yasuhiro Utsumi</i>	295
Creation of spin-polarized current using quantum point contacts and its detection <i>Mikio Eto</i>	301
Density dependent electron effective mass in a back-gated quantum well <i>S. Nomura</i>	307
The supersymmetric sigma formula and metal-insulator transition in diluted magnetic semiconductors <i>I. Kanazawa</i>	312
Spin-photovoltaic effect in quantum wires <i>A. Fedorov</i>	318
<b>Quantum Interference</b>	<b>325</b>
Nonequilibrium transport in Aharonov-Bohm interferometer with electron-phonon interaction <i>Akiko Ueda</i>	327

Fano resonance and its breakdown in AB ring embedded with a molecule <i>Shigeo Fujimoto, Yuhei Natsume</i>	333
Quantum resonance above a barrier in the presence of dissipation <i>Kohkichi Konno</i>	339
Ensemble averaging in metallic quantum networks <i>F. Mallet</i>	345
<b>Coherence and Order in Exotic Materials</b>	<b>351</b>
Progress towards an electronic array on liquid helium <i>David Rees</i>	353
Measuring noise and cross correlations at high frequencies in nanophysics <i>T. Martin</i>	359
Single wall carbon nanotube weak links <i>K. Grove-Rasmussen</i>	365
Optical preparation of nuclear spins coupled to a localized electron spin <i>Guido Burkard</i>	371
Topological effects in charge density wave dynamics <i>Toru Matsuura</i>	377
Studies on nanoscale charge-density-wave systems: fabrication technique and transport phenomena <i>Katsuhiko Inagaki</i>	383
Anisotropic behavior of hysteresis induced by the in-plane field in the $\nu = 2/3$ quantum Hall state <i>Kazuki Iwata</i>	389
Phase diagram of the $\nu = 2$ bilayer quantum Hall state <i>Akira Fukuda</i>	395
<b>Trapped Ions (Special Talk)</b>	<b>401</b>
Quantum computation with trapped ions <i>Hartmut Häffner</i>	403
<b>List of Participants</b>	<b>409</b>
