

## CONTENTS

Preface	v
Organizing Committees	vii
Dedicated to The Three Great Professors	viii
Program	xii
Participants List	xx
<b>Part A Special Lectures</b>	<b>1</b>
Manabu Harada - The Man and His Work <i>K. Oshiro</i>	3
The Work of Tachikawa on Ring Theory in the World <i>M. Sato</i>	8
Professor Liu Shaoxue – His Live and Work <i>Z. Yingbo</i>	15
<b>Part B Invited Lectures</b>	<b>19</b>
The Realization Problem for Von Neumann Rregular Rings <i>P. Ara</i>	21
Some Progress on Clean Rings <i>J. Chen and Z. Wang</i>	38

Auslander-type Conditions <i>Z. Huang</i>	54
Koszul Differential Graded Algebras and Modules <i>J. W. He and Q. S. Wu</i>	69
Quasi-Continuous Rings Satisfying Certain Chain Conditions <i>J. Y. Kim, J. Doh and J. K. Park</i>	92
Morita Duality and Recent Development <i>K. Koike</i>	101
Remarks on Divisible and Torsionfree Modules <i>L. Mao and N. Ding</i>	116
On the Classification of Decomposable Quantum Ruled Surfaces <i>I. Mori</i>	126
Rings and Modules with $n$ -acc <i>P. F. Smith</i>	141
<b>Part C General Lectures</b>	<b>163</b>
On Generalized $(\alpha, \beta)$ -derivations in Rings and Modules <i>M. Ashraf, S. Ali and N. Rehman</i>	165
On Colocal Pairs <i>Y. Baba</i>	173
Some New Near-Rings from Old Rings <i>Y. U. Cho</i>	183
On Non- $\delta$ - $M$ -Cosingular Completely $\oplus$ - $\delta_M$ -Supplemented Modules <i>D. K. Tütüncü, F. Kaynarca and M. T. Koşan</i>	189
Commutative Rings and Zero-divisor Semigroups of Regular Polyhedrons <i>G. Tang, H. Su and Y. Wei</i>	200

Remarks On QF-2 Rings, QF-3 Rings and Harada Rings <i>K. Iwase</i>	210
On the Relative (Quasi-)Discreteness of Modules <i>D. K. Tütüncü and N. O. Ertaş</i>	225
Compatible Algebra Structures of Lie Algebras <i>F. Kubo</i>	235
On $\tau$ -coherent Rings <i>K. Masaïke</i>	240
Skew-Matrix Rings and Applications to QF-Rings <i>Y. Nagadomi, K. Oshiro, M. Uhara and K. Yamaura</i>	248
On $\mu$ -Essential and $\mu$ - $M$ -Singular Modules <i>A. Ç. Özcan</i>	272
