

CONTENTS

An introduction to discrete holomorphic local dynamics in one complex variable <i>M. Abate</i>	1
Notes in transference of bilinear multipliers <i>O. Blasco</i>	28
Generating functions of Lebesgue spaces by translations <i>J. Bruna</i>	39
A new look at compactness via distances to function spaces <i>C. Anosto and B. Cascales</i>	49
Spaces of smooth functions <i>E. Harboure</i>	67
Domination by positive operators and strict singularity <i>F. L. Hernández</i>	86
The Hahn–Banach Theorem and the sad life of E. Helly <i>L. Narici and E. Beckenstein</i>	97
The Banach space L_p <i>E. Odell</i>	111
Problems on hypercyclic operators <i>H. N. Salas</i>	139
Operator spaces: Basic theory and applications <i>B. M. Schreiber</i>	154

Mathematics and markets: Existence and efficiency of competitive equilibrium	170
<i>A. Villar</i>	
Ideals in F -Algebras	184
<i>W. Żelazko</i>
