<i>Preface</i>	v
<i>Foreword</i>	vii
0. Elements of Differential Calculus over Commutative Algebras	1
0.1 Algebraic Tools . . . . .	1
0.2 Smooth Manifolds . . . . .	7
0.3 Vector Bundles . . . . .	23
0.4 Vector Fields . . . . .	41
0.5 Differential Forms . . . . .	52
0.6 Lie Derivative . . . . .	73
1. Basic Differential Calculus on Fat Manifolds	91
1.1 Basic Definitions . . . . .	92
1.2 The Lie Algebra of Der-operators . . . . .	98
1.3 Fat Vector Fields . . . . .	104
1.4 Fat Fields and Vector Fields on the Total Space . . . . .	110
1.5 Induced Der-operators . . . . .	114
1.6 Fat Trajectories . . . . .	117
1.7 Inner Structures . . . . .	130
2. Linear Connections	141
2.1 Basic Definitions and Examples . . . . .	141
2.2 Parallel Translation . . . . .	147
2.3 Curvature . . . . .	156
2.4 Operations with Linear Connections . . . . .	159
2.5 Linear Connections and Inner Structures . . . . .	164

3.	Covariant Differential	171
3.1	Fat de Rham Complexes . . . . .	171
3.2	Covariant Differential . . . . .	178
3.3	Compatible Linear Connections . . . . .	187
3.4	Linear Connections Along Fat Maps . . . . .	200
3.5	Covariant Lie Derivative . . . . .	208
3.6	Gauge/Fat Structures and Linear Connections . . . . .	224
4.	Cohomological Aspects of Linear Connections	233
4.1	An Introductory Example . . . . .	233
4.2	Cohomology of Flat Linear Connections . . . . .	238
4.3	Maxwell's Equations . . . . .	247
4.4	Homotopy Formula for Linear Connections . . . . .	253
4.5	Characteristic Classes . . . . .	257
	<i>Bibliography</i>	281
	<i>List of Symbols</i>	283
	<i>Index</i>	289
