

CONTENTS

Preface	v
Organizing Committees	xi
Charge transport and determinants <i>S. Bachmann & G.M. Graf</i>	1
The integrated density of states in strong magnetic fields <i>P. Briet & G.R. Raikov</i>	15
Geometrical objects on matrix algebra <i>C. Ciupală</i>	22
Self-adjointness via partial Hardy-like inequalities <i>M.J. Esteban & M. Loss</i>	41
Interlaced dense point and absolutely continuous spectra for Hamiltonians with concentric-shell singular interactions <i>P. Exner and M. Fraas</i>	48
Pointwise existence of the Lyapunov exponent for a quasi- periodic equation <i>A. Fedotov & F. Klopp</i>	66
Recent advances about localization in continuum random Schrödinger operators with an extension to underlying De- lonne sets <i>F. Germinet</i>	79
The thermodynamic limit of quantum Coulomb systems: A new approach <i>C. Hainzl, M. Lewin & J.P. Solovej</i>	97

Spectral properties of the BCS gap equation of superfluidity <i>C. Hainzl & R. Seiringer</i>	117
Spectral gaps for periodic Schrödinger operators with hyper- surface magnetic wells <i>B. Helffer & Y.A. Kordyukov</i>	137
Asymptotic entanglement in open quantum dynamics <i>A. Isar</i>	155
Repeated interactions quantum systems: Deterministic and random <i>A. Joye</i>	169
The mathematical model of scattering in stepwise waveguides <i>A.V. Lebedev & I.A. Shereshevskii</i>	190
Schrödinger operators with random δ magnetic fields <i>T. Mine & Y. Nomura</i>	203
Mean field limit for bosons and semiclassical techniques <i>F. Nier</i>	218
Variational principle for Hamiltonians with degenerate bottom <i>K. Pankrashkin</i>	231
Vortices and spontaneous symmetry breaking in rotating Bose gases <i>R. Seiringer</i>	241
The model of interlacing spatial permutations and its relation to the Bose gas <i>D. Ueltschi</i>	255
Boson gas with BCS interactions <i>V. Zagrebnov</i>	273
Author Index	297
