

Contents

<i>Preface</i>	v
1. From Kuru to Nucleation, Aggregation, Polymerization and Crystallization in Biology and Medicine <i>D. Carleton Gajdusek</i>	1
2. Gels Mimicking Antibodies in Their Selective Recognition of Proteins and Its Potential Use for Protein Crystallization <i>Jan Sedzik, Nasim Ghasemzadeh, Fred Nyberg and Stellan Hjertén</i>	11
3. Bioinformatics of Myelin Membrane Proteins <i>Gunnar von Heijne and Jan Sedzik</i>	35
4. Biomolecular Mass Spectrometry: Applications to Proteins and Peptides <i>Leopold L. Ilag and Gianluca Maddalo</i>	55
5. Myelin: A One-Dimensional Biological “Crystal” for X-Ray and Neutron Scattering <i>Hideyo Inouye and Daniel A. Kirschner</i>	75

Contents

6. Two-Dimensional Crystallization of Biological Macromolecules 95
Hans Hebert
7. Crystallization of Proteins: Principles and Methods 113
Lata Govada
8. The Role of Oil in Protein Crystallization 129
Naomi E. Chayen
9. Introduction to Crystallization of Fine Chemicals and Pharmaceuticals 145
Åke C. Rasmuson
10. Myelin Basic Protein, A Saucy Molecule With High Responsiveness to the Environment or Just an Unusual Membrane Protein? 173
Paolo Riccio
11. The Use of a Magnetic Field and Magnetic Force as a Means to Improve the Quality of Protein Crystals 195
Mitsuo Ataka
12. Interactive Crystallomic 225
Jan Sedzik
13. Virtual Molecule: P0 Myelin Glycoprotein. I. Homology Modeling and Prediction of the Secondary and Tertiary Structure 237
Jan Pawel Jastrzebski and Jan Sedzik

Contents

14.	<i>In meso</i> Approaches to Membrane Protein Crystallization	259
	<i>Valentin I. Gordeliy and Ekaterina S. Moiseeva</i>	
15.	Amyloid, The Amyloid β -Peptide and Alzheimer's Disease: Structural Considerations	283
	<i>Lars O. Tjernberg</i>	
16.	Recent Advances in Structural Basis for Molecular Mimicry in Inflammatory Autoimmune Demyelinating Polyneuropathy	305
	<i>Xin Yang</i>	
17.	Fresh Water Pearls of Wisdom on Protein Crystallization	331
	<i>Jan Sedzik</i>	
	<i>Glossary</i>	345
	<i>Index</i>	349
