

CONTENTS

Preface	v
Index Theory for Wiener–Hopf Operators on Convex Cones	1
<i>A. Alldridge</i>	
A Variant of the Frobenius Reciprocity for Restricted Representations on Nilpotent Lie Groups	13
<i>A. Baklouti, H. Fujiwara and J. Ludwig</i>	
Mehler Hemigroups and Embedding of Discrete Skew Convolution Semigroups on Simply Connected Nilpotent Lie Groups	32
<i>P. Becker-Kern and W. Hazod</i>	
Transforms, Polynomials and Integrable Models Associated with Reflection Groups	47
<i>C. F. Dunkl</i>	
Positive and Negative Definite Functions on a Hypergroup and Its Dual	63
<i>H. Heyer</i>	
Symbolic Dynamics for the Geodesic Flow on Locally Symmetric Orbifolds of Rank One	97
<i>J. Hilgert and A. D. Pohl</i>	
Towards Projective Representations and Spin Characters of Finite and Infinite Complex Reflection Groups	112
<i>T. Hirai, E. Hirai and A. Hora</i>	
An Irreducible Homogeneous Non-Selfdual Cone of Arbitrary Rank Linearly Isomorphic to the Dual Cone	129
<i>H. Ishi and T. Nomura</i>	

Extensions of Commutative Hypergroups <i>S. Kawakami</i>	135
Real Hardy Space for Jacobi Analysis and Its Applications <i>T. Kawazoe</i>	149
A Remark on Random Groups of the Triangular Model <i>T. Kondo</i>	163
Asymptotic Behaviour of Quantum Markov Processes <i>B. Kümmerer</i>	168
On α -amenability of Commutative Hypergroups <i>R. Lasser</i>	184
Moments of Characteristic Polynomials of a Random Matrix Associated with Compact Symmetric Spaces <i>S. Matsumoto</i>	196
Semi-bounded Unitary Representations of Infinite-Dimensional Lie Groups <i>K.-H. Neeb</i>	209
A Note on the Capelli Identities for Symmetric Pairs of Hermitian Type <i>K. Nishiyama and A. Wachi</i>	223
Convolution Algebras for Multivariable Bessel Functions <i>M. Rösler</i>	255
Irreducible Decompositions of Unitary Representations and Extremal Decompositions of Positive-Definite Functions on Groups <i>H. Shimomura</i>	272
Ensembles of Hermitian Random Matrices Associated to Symmetric Spaces <i>M. Stolz</i>	291
Limit Theorems for Radial Random Walks on Homogeneous Spaces with Growing Dimensions <i>M. Voit</i>	308
