<i>Contributors</i>	xiii
<i>Preface</i>	xix
Part I: Hematopoietic Stem Cells (HSCs)	1
1 Hematopoietic Stem and Progenitor Cells in Umbilical Cord Blood <i>Claudia Lengerke and Suzanne Kadereit</i>	3
Introduction	4
Frequency of HSCs in UCB	5
<i>In Vitro</i> Colony Assays	6
<i>In Vivo</i> Xenogeneic Mouse Models	7
Phenotyping the Human HSC	9
Specifics of UCB-Derived HSCs	11
Homing and Engraftment	12
HSC Differentiation and Self-Renewal	14
Conclusions	16
2 Cord Blood and Cancer <i>Mary J. Laughlin and R. Patrick Weitzel</i>	27
Introduction	28
History of Cord Blood Transplantation	28

	Advantages of Cord Blood as a Source of Allogeneic Stem Cells	29
	Clinical Trials to Date — Pediatric Recipients	32
	Clinical Trials to Date — Adult Recipients	35
	Double UCB Transplantation	37
	Non-Myeloablative UCB Transplantation in Adults	38
	Cellular and Molecular Observations Underlying Clinical Advantages	39
	Current Indications	41
	Summary and Conclusions	43
3	Self-Renewal of Primitive Hematopoietic Cells: A Focus on Asymmetric Cell Division	51
	<i>Andre Görgens and Bernd Giebel</i>	
	Introduction	51
	Principal Mechanisms for Controlling the Decision “Self-Renewal Versus Differentiation” of Somatic Stem Cells	53
	Stem Cell Niches and Asymmetric Cell Division are Not Mutually Exclusive	57
	The Hematopoietic Stem Cell Compartment	58
	Asymmetric Cell Division of Primitive Hematopoietic Cells	59
4	<i>Ex Vivo</i> Expansion of Cord Blood Hematopoietic Cells	77
	<i>Ian K. McNiece</i>	
	Introduction	78
	<i>Ex Vivo</i> Expanded Cells Provide Rapid Engraftment	79
	Immunomagnetic Selection of UCB Products for <i>Ex Vivo</i> Expansion	79
	Availability of Clinical Grade Reagents	81
	Clinical Experience with <i>Ex Vivo</i> Expanded Cells	81
	Summary	85

Part II Mesenchymal Stem Cells (MSCs)	89
5 Mesenchymal Stem Cells	91
<i>Mark F. Pittenger</i>	
Introduction	92
Tissue Repair and Regeneration	92
MSCs Across Species and Tissues	93
Characterization of MSCs	95
Functional Characteristics of MSCs	97
Umbilical Cord MSCs	97
6 Bone Tissue Engineering	105
<i>Johannes C. Reichert, Travis J. Klein, Kunnika Kuaha, Bart Rijckaert, Ulrich Nöth and Dietmar W. Hutmacher</i>	
Introduction	106
Bone Structure and Osteogenesis	107
Bone Marrow Stromal and Human Umbilical Cord Perivascular Cells for Bone Tissue Engineering	109
Bone Tissue Engineering	120
Bioreactors	122
Clinical Bone Engineering	124
Conclusion	130
7 Neural Differentiation of Umbilical Cord Blood Derived Cells and Applications in Neurological Disorders	145
<i>Gerald Udolph</i>	
Introduction	145
How It All Began: <i>In Vitro</i> Differentiation Into the Neural Lineage of Bone Marrow Mesenchymal Cells	146
<i>In Vitro</i> Differentiation of Human Cord Blood Derived Cell Types Into the Neural Lineage	147
Is Neural Differentiation of Cord Blood Cells an Artifact?	153

	Cord Blood Cells in Preclinical Studies of Neurological Diseases	154
	Neuroprotective Effects of Cord Blood Stem Cells <i>In Vitro</i>	160
	Clinical Studies Using Cord Blood Cells in Neurological Diseases	161
	Concluding Remarks and Further Questions	162
8	Immunological Properties of Mesenchymal Stem Cells Isolated from Bone Marrow and Umbilical Cord <i>Mark F. Pittenger and Katarina LeBlanc</i>	173
	Introduction	174
	Lack of Immune Response to Allogeneic MSCs	175
	MSCs From Cord Blood or Umbilical Cord Tissue	176
	Immune Modulatory Activity of MSCs	177
	MSCs and T-Lymphocytes	178
	MSCs and B-Lymphocytes	182
	MSCs and Dendritic Cells (DCs)	183
	MSCs and Natural Killer (NK) Cells	184
	Nitric Oxide Produced by MSCs	184
	Galectin-1 Expression by MSCs	185
	HLA-G Expression by MSCs	185
	MSCs as Universal Donor Cells	186
	Preclinical Studies Using Allogeneic UC-, UCB- and BM-MSCs	187
	Clinical Experience of MSC Infusion	193
	Conclusions	197
9	Expansion of Mesenchymal Stem Cells (MSCs) for Clinical Use <i>Marie Prat-Lepesant, Marie-Jeanne Richard and Jean-Jacques Lataillade</i>	207
	Introduction	208
	Technical Prerequisites for <i>In Vitro</i> MSC Expansion	209
	Regulatory Recommendations for Clinical-Scale Production of MSCs	214

MSC Culture Process: An Innovative Serum-Free Medium Suited for Clinical Applications	218
Preparation of Clinical-Grade Platelet Lysate for GMP-Compliant MSC Production	219
Large Scale GMP-Compliant MSC Production	220
Conclusions	221
Part III Other Stem and Progenitor Cells in Cord Blood and Surrounding Tissue	227
10 The Unrestricted Somatic Stem Cell (USSC) <i>Gesine Kögler, Teja F. Radke and Rüdiger V. Sorg</i>	229
Introduction	230
Isolation, Expansion and Characterization of USSCs from Fresh Cord Blood	232
Generation and Culture of GMP-Grade USSCs	234
Isolation, Expansion and Characterization of USSCs from Cryopreserved Cord Blood Samples	236
Differentiation of USSCs Towards the Mesenchymal Lineage	237
Differentiation of USSCs into Cardiomyocytes and Myocardial Applications	239
Neural Differentiation of USSCs	241
Endodermal Differentiation of USSCs	242
Hematopoiesis Supporting Activity of USSC	243
Comparison of USSCs and MSCs from Cord Blood	244
11 Endothelial Precursor Cells <i>Marcie R. Finney and Mary J. Laughlin</i>	251
Introduction	252
Angiogenesis and Endothelial Progenitor Cells	253
EPC Phenotype	254
Isolation and Culture of EPCs	255
Animal Models of Neovascularization	257
EPCs from UCB	260
Conclusions	261

12	Mesenchymal Stromal Cells Derived from Wharton's Jelly <i>Mark L. Weiss and Kiranbabu Seshareddy</i>	267
	Introduction	268
	Characteristics of WJCs	270
	Comparison of WJCs with Other Stem Cells	270
	WJCs Isolated from Other Species	274
	Isolation Methods For WJCs	274
	<i>In Vitro</i> Expansion Conditions	275
	<i>In Vitro</i> Differentiation of WJCs	277
	Preclinical Work Using WJCs	277
	Unresolved Issues of WJC Characterization	278
	Translation of WJCs from the Laboratory Bench to the Clinic	279
	Part IV Future Outlook	289
13	Banking of Cord Blood <i>Shin Y. Ong and William Y. K. Hwang</i>	291
	Introduction	292
	First Public Cord Blood Bank and Unrelated Donor Transplants	294
	Sibling Donor Cord Blood Banks	296
	Private Cord Blood Banks	297
	Worldwide Cord Blood Banking Networks	298
	Current Opinion on Cord Blood Banks	300
	Cord Blood Collection Process	301
	Selection and Release	310
	Quality Assurance, Accreditation and Licensing	311
	Future for Cord Blood Banking	313
14	Commercialization of Cord Blood <i>Vivek M. Tanavde</i>	321
	Introduction	322
	Is Private Banking Necessary?	322
	Can Cord Blood Banks Generate Profits?	326
	What Does It Take to be a Successful Cord Blood Bank?	329

Hurdles to Private Banking	329
Other Commercial Uses of Cord Blood Stem Cells	331
Why Commercialization of Cord Blood May Become Feasible in the Future	332
Closing Remarks: Cord Blood Stem Cells: A Future for Regenerative Medicine? <i>Suzanne Kadereit and Gerald Udolph</i>	335
<i>Index</i>	339
