<i>Preface</i>	v
Bibliography	1
<i>Bibliography of Kai Lai Chung</i>	3
Comments on Selected Works	13
<i>Sums of independent random variables and Markov chains</i> by Naresh Jain	15
<i>Excursions, moderate Markov processes and probabilistic potential theory</i> by Ronald Gettoor	19
<i>Stopped Feynman-Kac functionals and the Schrödinger equation</i> by Ruth Williams	27
<i>Conditional Brownian motion and conditional gauge</i> by Michael Cranston	37
Selected Works of Kai Lai Chung	49
<i>On the probability of the occurrence of at least m events among n arbitrary events</i>	51
<i>On mutually favorable events</i>	63
<i>On the lower limit of sums of independent random variables (with P. Erdős)</i>	75
<i>On the maximum partial sums of sequences of independent random variables</i>	87
<i>On the zeros of $\sum_1^n \pm 1$ (with G. A. Hunt)</i>	117

<i>Fluctuations of sums of independent random variables</i>	133
<i>The strong law of large numbers</i>	145
<i>On the distribution of values of sums of random variables</i> <i>(with W. H. J. Fuchs)</i>	157
<i>Probability limit theorems assuming only the first moment (with P. Erdős)</i>	169
<i>On the application of the Borel-Cantelli lemma (with P. Erdős)</i>	189
<i>Contributions to the theory of Markov chains</i>	197
<i>Contributions to the theory of Markov chains, II</i>	203
<i>Some new developments in Markov chains</i>	227
<i>On a basic property of Markov chains</i>	243
<i>Continuous parameter Markov chains</i>	267
<i>On the Lipschitz's condition for Brownian motion</i> <i>(with P. Erdős and T. Sirao)</i>	275
<i>On last exit times</i>	287
<i>Some remarks on taboo probabilities</i>	299
<i>Probabilistic methods in Markov chains</i>	305
<i>On the recurrence of sums of random variables (with D. Ornstein)</i>	327
<i>On the boundary theory for Markov chains</i>	331
<i>The general theory of Markov processes according to Doeblin</i>	391
<i>Fields, optionality and measurability (with J. L. Doob)</i>	417
<i>On the boundary theory for Markov chains, II</i>	445
<i>To reverse a Markov process (with J. B. Walsh)</i>	499
<i>Boundary behavior of Markov chains and its contributions to</i> <i>general processes</i>	527
<i>Crudely stationary counting processes</i>	535
<i>On the fundamental hypotheses of Hunt processes</i>	547
<i>Probabilistic approach in potential theory to the equilibrium problem</i>	557
<i>Meyer's theorem on predictability (with J. B. Walsh)</i>	567

<i>Approximation of a continuous parameter Markov chain by discrete skeletons</i>	571
<i>Remarks on equilibrium potential and energy</i>	577
<i>Downcrossings and local time (with R. T. Durrett)</i>	585
<i>Excursions in Brownian motion</i>	589
<i>The condenser problem (with R. K. Getoor)</i>	613
<i>Left continuous moderate Markov processes (with J. Glover)</i>	619
<i>Equilibrium and energy (with K. M. Rao)</i>	631
<i>Kac functional and Schrödinger equation (with S. R. S. Varadhan)</i>	641
<i>On stopped Feynman-Kac functionals</i>	653
<i>A new setting for potential theory, I (with K. M. Rao)</i>	663
<i>Feynman-Kac functional and the Schrödinger equation (with K. M. Rao)</i>	697
<i>Extension of domains with finite gauge (with R. T. Durrett and Z. Zhao)</i>	727
<i>The lifetime of conditional Brownian motion in the plane</i>	735
<i>Duality under a new setting (with M. Liao and K. M. Rao)</i>	739
<i>The gauge and conditional gauge theorem</i>	755
<i>Gauge theorem for the Neumann problem (with P. Hsu)</i>	763
<i>Doubly-Feller process with multiplicative functional</i>	771
<i>General gauge theorem for multiplicative functionals (with K. M. Rao)</i>	787
<i>Paul Lévy's way to his local time (with A. A. Balkema)</i>	805
<i>Greenian bounds for Markov processes</i>	815
<i>Doebelin's big limit theorem</i>	825
