

Contents

<i>Preface</i>	vii
1. Programming in C	1
1.1 Basic C programs	3
1.1.1 Basic data types	7
1.1.2 Arithmetic expressions	12
1.1.3 Control statements	18
1.1.4 Complex data types	25
1.2 Functions	34
1.3 Input/output	44
1.4 Pointers and dynamic memory management	58
1.5 Important C compiler options	63
1.6 Preprocessor directives and macros	64
1.7 <i>Make</i> files	70
1.8 Scripts	74
2. Software Engineering	79
2.1 How to manage a (simulation) project	79
2.1.1 Definition of the problem and solution strategies	80
2.1.2 Designing data structures	81
2.1.3 Defining small tasks	82
2.1.4 Distributing work	83
2.1.5 Implementing the code	84
2.1.6 Testing	84
2.1.7 Writing documentation	86
2.1.8 Using the code	87

2.2	Programming style	88
2.3	Version management with <i>subversion</i>	93
3.	Object-oriented Software Development	103
3.1	Object-orientation principles	104
3.2	A sample using C	107
3.3	Introduction to C++ and an example	111
4.	Algorithms and Data Structures	125
4.1	\mathcal{O} notation	126
4.2	Iteration and recursion	128
4.3	Divide-and-conquer approach	131
4.4	Dynamic programming	134
4.5	Backtracking	136
4.6	Lists	140
4.7	Trees	148
4.7.1	Heaps	160
4.8	Graphs	167
5.	Debugging and Testing	183
5.1	<i>gdb</i>	183
5.2	<i>ddd</i>	187
5.3	Memory checker	188
5.4	Profiling with <i>gprof</i>	193
6.	Libraries	201
6.1	Standard C library	202
6.2	Standard Template Library	204
6.3	GNU scientific library	212
6.4	Creating your own libraries	219
7.	Randomness and Statistics	223
7.1	Introduction to probability	224
7.1.1	Discrete random variables	229
7.1.2	Continuous random variables	233
7.2	Generating (pseudo) random numbers	239
7.2.1	Uniform (pseudo) random numbers	240
7.2.2	Discrete random variables	245

7.2.3	Inversion method	246
7.2.4	Rejection method	247
7.2.5	The Gaussian distribution	250
7.3	Basic data analysis	252
7.3.1	Estimators	252
7.3.2	Confidence intervals	255
7.3.3	Histograms	258
7.3.4	Resampling using bootstrap	263
7.4	Data plotting	269
7.4.1	<i>gnuplot</i>	270
7.4.2	<i>xmgrace</i>	275
7.5	Hypothesis testing and (in-)dependence of data	286
7.5.1	Chi-squared test	290
7.5.2	Kolmogorov-Smirnov test	293
7.5.3	Statistical (in-)dependence	297
7.6	General estimators	304
7.6.1	Maximum likelihood	305
7.6.2	Data fitting	311
8.	Information Retrieval, Publishing and Presentations	323
8.1	Searching for literature	324
8.2	Visualization	326
8.2.1	Drawing figures using <i>xfig</i>	327
8.2.2	Drawing graphs	327
8.2.3	Three-dimensional figures with <i>Povray</i>	334
8.3	Preparing publications	336
8.3.1	\LaTeX	336
8.3.2	Beamer class	345
Appendix A	The Book CD	351
	<i>Bibliography</i>	353
	<i>Index</i>	359
