
Table of Contents

Foreword	vii
Foreword	ix
Preface	xi
List of Figures and Tables	xix
A Principles of Biosafety	1
A.1 Categories of Biosafety	2
A.2 Biohazard Materials	3
A.3 Recommended Work Practices	3
A.4 General Hygiene	4
A.4.1 Pipettes	5
A.4.2 Syringes and Scalpels	5
A.4.3 Biosafety Cabinets	5
A.4.4 Chemicals	6
A.4.5 Ultraviolet Light	7
A.4.6 General Housekeeping	7
A.5 Handling Biological Specimens	8
A.5.1 Checklist	10
B Introduction to the Cell Culture Laboratory	11
B.1 The Laminar Flow Workbench — Biosafety Cabinet	12
B.2 The Centrifuge	12
B.3 The Waterbath	15
B.4 The Sink/Wet Space	16
B.5 The Autoclave	16

B.6	The Refrigerator/Freezer	18
B.7	The Incubator	19
B.8	The Microscope	21
	Notes	22
C	Protocols for Human Cell Culture	23
C.1	Cell Isolation	25
C.2	Mesenchymal Cells	27
C.2.1	Adipose Cells	27
	<i>Enzymatic Digestion</i>	28
C.2.2	Chondrocytes	29
	<i>Enzymatic Digestion</i>	29
C.2.3	Endothelial Cells	31
	<i>HUVEC (Human Umbilical Vein</i>	
	<i>Endothelial Cells) Isolation</i>	31
C.2.4	Fibroblasts	32
	<i>Explant Method</i>	33
	<i>Enzymatic Digestion</i>	33
	<i>Subculturing</i>	34
C.2.5	Myocytes	35
	<i>Skeletal Muscle Cells</i>	35
	<i>Enzymatic Digestion</i>	35
	<i>Subculturing</i>	36
	<i>Smooth Muscle Cells</i>	36
	<i>Enzymatic Digestion</i>	37
	<i>Subculturing</i>	38
C.2.6	Osteoblasts	38
	<i>Osteoblasts</i>	40
	<i>Periosteal Cells</i>	40
	<i>Wash-out Method</i>	42
	<i>Explant Method</i>	43
	<i>Enzymatic Digestion</i>	44
C.2.7	Dental Cells (Periodontal Ligament	
	Fibroblasts and Alveolar Osteoblasts)	44
	<i>Explant Culture</i>	45
	Notes	48
C.3.	Epithelial Cells	51
C.3.1	Respiratory Epithelial Cells	51
	<i>Enzymatic Digestion</i>	52

C.3.2	Oral Mucosa Cells	53
	<i>Explant Method</i>	54
	<i>Subculturing</i>	55
C.3.3	Keratinocytes	56
	<i>Separating the Epidermis from Dermis</i>	56
	<i>Isolating Single Cells from the Epidermis</i>	57
	<i>Culturing on a Fibroblast Feeder Layer</i>	57
	<i>Culturing in Serum-Free Medium</i>	58
	<i>Subculturing for Both Feeder-Layer and Serum-Free</i>	59
C.3.4	Hepatocytes	59
	<i>Enzymatic Digestion</i>	60
C.3.5	Kidney Cells	61
	<i>Renal Cortical Cells</i>	62
	<i>Proximal Tubuli Cells</i>	63
	<i>Glomerula Mesangial Cells</i>	64
	Notes	66
C.4	Bone Marrow Derived Cells	69
	C.4.1 Bone Marrow Stromal Cells	69
	C.4.2 Peripheral Blood Mononuclear Cells	71
	Notes	74
C.5	Stem Cells	77
	C.5.1 Embryonic Stem Cells	77
	<i>Culturing Embryonic Stem Cells Using Mouse Embryonic Fibroblasts as Feeders</i>	77
	<i>Culturing Embryonic Stem Cells Using Human Placenta Cells as Feeders</i>	83
	C.5.2 Adult Stem Cells	85
	<i>Human Adipose Tissue Derived Stem Cells</i>	85
	<i>Human Bone Marrow Derived Stem Cells</i>	90
	<i>Human Amniotic Epithelial Stem Cells</i>	92
	Notes	96
D	Reagents and Techniques for Cell Culture	97
	D.1 Selection of Cell Culture Media	98
	D.1.1 Classical Media	98
	D.1.2 Serum-Free and Speciality Media	102
	Notes	105

D.2 Cell Culture Reagents and Media Supplements	108
D.2.1 Sera	108
<i>Protocol for Isolation of Serum from a Blood Sample</i>	108
D.2.2 Antibiotics (AB) and Antimycotics (AM)	109
D.2.3 Biological Buffers	112
D.2.4 Supplements	113
Notes	115
D.3 Cell Dissociation Products	118
D.3.1 General Considerations	118
D.3.2 Basic Strategy	119
D.3.3 Trypsin	120
D.3.4 Other Proteases	121
Notes	124
E Techniques for Manipulating Cell Cultures and Studying Cellular Behaviour	127
E.1 Cryopreservation and Thawing of Cells	128
E.2 Transfection	131
E.2.1 Lipofection	133
E.2.2 Electroporation	135
E.2.3 Calcium Phosphate Precipitation	137
E.2.4 Viral Vectors	137
E.2.5 Generation of Stable Lines	139
E.3 Quantitative Cell Proliferation Assays	140
E.3.1 Cell Counting with the Haemocytometer	141
E.3.2 MTS Cell Proliferation Assay	144
E.3.3 AlamarBlue® Proliferation Assay	145
E.3.4 WST-1 Proliferation Assay	146
E.3.5 [³ H]-Thymidine Labelling Proliferation Assay	147
E.3.6 PicoGreen® DNA Cell Proliferation Assay	148
E.3.7 Use of Cell Proliferation Assays for High Cell Numbers and 3D Cultures	149
E.3.8 Colony Forming Unit Fibroblast Assay (CFU-F)	150
E.3.9 Growth Kinetics of Cell Populations	151

E.4 Assessment of Gene Expression	153
E.4.1 Transcript Expression	153
<i>Total RNA Extraction</i>	153
<i>Genomic DNA Digestion (20 μl Reaction)</i>	154
<i>Reverse Transcription (20 μl Reaction)</i>	155
<i>Polymerase Chain Reaction</i>	155
<i>Detection of PCR Products</i>	159
E.4.2 Protein Expression	160
<i>Western Blotting</i>	160
<i>Immunocytochemistry</i>	166
F Troubleshooting	171
Notes	175
Suggested Readings	179
Abbreviations	181
Index	183
