

## Contents

Editorial Preface .....	v
Early Milestones in the Evolution of Accelerators	
<i>E. D. Courant</i> .....	1
Electron Linacs for High Energy Physics	
<i>Perry B. Wilson</i> .....	7
The Development of High Power Hadron Accelerators	
<i>G. H. Rees</i> .....	43
Cyclotrons and Fixed-Field Alternating-Gradient Accelerators	
<i>M. K. Craddock and K. R. Symon</i> .....	65
Particle Colliders for High Energy Physics	
<i>D. A. Edwards and H. T. Edwards</i> .....	99
Synchrotron Radiation	
<i>A. Hofmann</i> .....	121
Medical Applications of Accelerators	
<i>Hartmut Eickhoff and Ute Linz</i> .....	143
Industrial Accelerators	
<i>Robert W. Hamm</i> .....	163
The Development of Superconducting Magnets for Use in Particle Accelerators: From the Tevatron to the LHC	
<i>Alvin Tollestrup and Ezio Todesco</i> .....	185
Development of Superconducting RF Technology	
<i>Takaaki Furuya</i> .....	211
Cooling Methods for Charged Particle Beams	
<i>V. V. Parkhomchuk and A. N. Skrinsky</i> .....	237
The Supercollider: The Pre-Texas Days — A Personal Recollection of Its Birth and Berkeley Years	
<i>Stanley Wojcicki</i> .....	259
Accelerators and the Accelerator Community	
<i>Andrew Sessler and Ernest Malamud</i> .....	303
<i>Book Review: Panofsky on Physics, Politics, and Peace: Pief Remembers</i>	
<i>Gregory Loew</i> .....	319
A Brief History of Particle Accelerators (poster)
