

Contents

Preface	v
1 Science Matters: A Unified Perspective	1
<i>Lui Lam</i>	
1.1 Introduction	2
1.2 What Is Science?	3
1.3 The Origin and Nature of the Two Cultures	5
1.3.1 Emergence of the Two Cultures	6
1.3.2 The Gap Today	8
1.4 Demarcation According to Human and Nonhuman Systems	11
1.5 Simple and Complex Systems	16
1.5.1 What It Means to be Complex	16
1.5.2 Complex Systems	18
1.6 Science Matters	21
1.6.1 Motivation	22
1.6.2 Concept	22
1.6.3 An Example: Histophysics	23
1.7 Implications of Science Matters	25
1.7.1 Clearing up Confusion in Terminology	25
1.7.2 The Science Matters Standard	27
1.7.3 There Is Always the Reality Check	29
1.7.4 The Needham Question	31

1.8 Discussion and Conclusion	32
References	36

PART I ART AND CULTURE

2 Culture THROUGH Science: A New World of Images and Stories	41
<i>Paul Caro</i>	
2.1 The Science/Society Dialogue	41
2.2 The Media in between Science and Society	42
2.3 Lessons from History	47
References	50
3 Physiognomy in Science and Art: Properties of a Natural Body Inferred from Its Appearance	52
<i>Brigitte Hoppe</i>	
3.1 What Physiognomy Means and Its Methodological Aims	52
3.2 Works of Fine Art Based on a Physiognomic Interpretation	53
3.3 Physiognomy in Science	54
3.3.1 Early Roots of Physiognomic Practice	54
3.3.2 The Fundamental Treatise of Aristotle and Its Legacy	55
3.3.3 The Impact of Aristotelian Physiognomy in Natural Science	57
3.3.4 The Renewal of Physiognomy for Characterizing a Human Being	65
3.3.5 The Physiognomy of Vegetation Characterizing a Landscape	68
3.4 Conclusion	70
References	72

4	Has Neuroscience Any Theological Consequence?	74
	<i>Alfredo Dinis</i>	
4.1	Neurotheology	74
4.1.1	Religious Experience Is Individual and Private	78
4.1.2	Religious Experiences Are Basically Connected to Out-of-This-World Entities	80
4.1.3	Religious Experiences Are Basically Emotional and Positive	82
4.1.4	Causation and Correlation	83
4.2	Self, Soul and Human Immortality	84
4.3	Theological Consequences	85
	References	87
5	SciComm, PopSci and The Real World	89
	<i>Lui Lam</i>	
5.1	Introduction	89
5.2	Science Communication	90
5.3	A New Concept for Science Museums	99
5.3.1	Possible Misconceptions Imparted to the Visitors	100
5.3.2	A Simple Remedy	101
5.4	Science Popularization in China	101
5.4.1	The Importance of Popular-Science Books	102
5.4.2	Popular-Science Book Authors in China	103
5.4.3	Recommendations	104
5.5	Education Reform: A Personal Journey	106
5.6	The Real World	109
5.6.1	Course Description	109
5.6.2	The Outcome	113
5.7	Conclusion	114
	Appendix 5.1: Popular-Science Books Selected in Classes	115
	References	116

PART II PHILOSOPHY AND HISTORY OF SCIENCE

6	The Tripod of Science: Communication, Philosophy and Education	121
	<i>Nigel Sanitt</i>	
6.1	Introduction	121
6.2	Change Is Part of Science	123
6.3	Apathy and Antipathy	125
6.4	Demarcation	126
6.5	Science Research	128
6.6	Black Holes	129
6.7	Communication	131
	6.7.1 Language	131
	6.7.2 Metaphor	132
	6.7.3 Getting the Message Across	133
6.8	Conclusion	133
	References	134
7	History and Philosophy of Science: Towards a New Epistemology	136
	<i>Maria Burguete</i>	
7.1	Introduction	136
7.2	Perspectives of Science	138
7.3	History of Contemporary Chemistry	139
7.4	Paradigm Replacement	141
7.5	Philosophy of Chemistry	142
	7.5.1 Transformation Reinforcement Provided by Improved Molecular Representation in Three Dimensions	143
	7.5.2 Methodologies of Computational Chemistry Provided by Computer-Aided Ligand Design	144
7.6	A Case Study: Functional Selectivity	147
7.7	Philosophy of Science and Epistemology	151

7.8	Conclusion	152
	References	154
8	Philosophy of Science and Chinese Sciences: The Multicultural View of Science and a Unified Ontological Perspective	155
	<i>Bing Liu</i>	
8.1	Recent Debates on “Chinese Sciences” in China	155
8.2	The Multicultural View of Science	156
8.3	Lessons from the Study of Art and Science	158
8.4	An Ontological Perspective on the Multiple View of Science	160
	References	164
9	Evolution of the Concept of Science Communication in China	165
	<i>Da-Guang Li</i>	
9.1	Introduction	165
9.2	Late Qing Dynasty and the New Culture Movement Period (Late 19th Century to Early 20 th Century)	166
9.3	Science Popularization by Science Organizations (1914-1949)	167
	9.3.1 The Early Period	168
	9.3.2 The Late Period	170
9.4	Science Popularization under the New Government of Modern China (1949-1994)	172
9.5	Boom of Science Popularization (1994-2006)	174
9.6	Conclusion	175
	References	176

10	History of Science in Globalizing Time	177
	<i>Dun Liu</i>	
10.1	Globalization Today and Globalization in History	177
10.2	History of Science as a Discipline and History of Science as Knowledge	179
10.3	History of Science in China	181
10.4	The Needham Question	185
10.5	The Snow Thesis and Conclusion	188
	References	189

PART III RAISING SCIENTIFIC LEVEL

11	Why Markets Are Moral	193
	<i>Michael Shermer</i>	
11.1	The Neurochemistry of Trust	193
11.2	Gaming the Market	195
11.3	Trust and Trade	199
11.4	The Evolution of Trust and Trade	202
11.5	The Evolution of Fairness, or Why We Are Moral	204
	References	205
12	Towards the Understanding of Human Dynamics	207
	<i>Tao Zhou, Xiao-Pu Han and Bing-Hong Wang</i>	
12.1	Introduction	207
12.2	Non-Poisson Statistics of Human Dynamics	209
12.3	The Task-Driven Model	217
12.4	The Interest-Driven Model and Beyond	223
12.5	Discussion and Conclusion	228
	References	230

13	Human History: A Science Matter	234
	<i>Lui Lam</i>	
13.1	What Is History?	234
13.2	Methods to Study History	236
	13.2.1 Statistical Analysis	237
	13.2.2 Computer Modeling	239
	13.2.3 Computer Simulation	243
	13.2.4 The Zipf Plot	244
13.3	History in the Future	247
13.4	Conclusion	251
	References	252
