<i>Preface</i>	v
1. Virtual Reality and Telexistence	1
1.1. What is Telexistence and What is Virtual Reality	1
1.2. Telexistence in the Real World and in Virtual Worlds	2
1.2.1. Telexistence in the Real World	3
1.2.2. Telexistence in Virtual Worlds	5
1.2.3. Applications of Telexistence	6
1.3. Organization of Telexistence and/or Virtual Reality Systems	7
1.4. Virtual Reality as a Human Tool for 3Cs and 3Es	9
1.4.1. Control	9
1.4.2. Communication	10
1.4.3. Creation	11
1.4.4. Experience/Education	11
1.4.5. Elucidation	11
1.4.6. Entertainment	11
1.5. Virtual Reality Convergence	12
2. Generations and Design Philosophies of Robots	15
2.1. Generations of Robots	15
2.2. Design Philosophies in Robotics	19
3. Telexistence	24
3.1. Short History of Telexistence	24
3.2. Augmented Telexistence	29

3.3.	R-Cubed	31
3.4.	Humanoid Robotics Project: HRP	34
4.	Fundamental Technologies for Telexistence	42
4.1.	Telexistence Visual Display	42
4.1.1.	Design Concept of Telexistence Visual Display	42
4.1.2.	Design Method and Procedures of Telexistence Visual Display	45
4.1.3.	Visual Display Prototypes	49
4.1.3.1.	Visual Display Unit	49
4.1.3.2.	Experimental Visual Display System	49
4.1.4.	Evaluation of the Visual Display	53
4.1.4.1.	Horopters and Their Expression	53
4.1.4.2.	Experiment	57
4.1.5.	Summary	61
4.2.	Mobile Telexistence System	61
4.2.1.	System Configuration	62
4.2.2.	Experiments	64
4.2.3.	Summary	70
4.3.	Design and Quantitative Evaluation of Telexistence Manipulation System	70
4.3.1.	Telexistence Manipulation System	70
4.3.2.	Manipulation Experiments	75
4.3.3.	Summary	82
4.4.	Construction of Virtual Haptic Space	82
4.4.1.	Construction Method for Encounter-Type Virtual Haptic Space	83
4.4.1.1.	Active Environment Display	85
4.4.1.2.	Shape Approximation Device	86
4.4.2.	Test Hardware	87
4.4.3.	Summary	90
5.	Retroreflective Projection Technology (RPT)	92
5.1.	Principle of Retroreflective Projection Technology	93
5.2.	RPT-Based Head Mounted Projector	97
5.3.	RPT Applications	99

6. Mutual Telexistence Using RPT	104
6.1. Mutual Telexistence	104
6.2. Experimental Hardware System	107
6.2.1. Preliminary Mutual Telexistence Hardware System	108
6.2.2. Summary	112
6.3. Mutual Telexistence Master–Slave System for Communication	113
6.3.1. Telexistence Surrogate Anthropomorphic Robot II	117
6.3.1.1. Slave Robot Arm	117
6.3.1.2. Slave Robot Hand	119
6.3.2. Telexistence Cockpit	121
6.3.2.1. Master Arm	121
6.3.2.2. Master Hand	123
6.3.2.3. 3D Display System	128
6.3.3. RPT Viewer System	128
6.3.4. Feasibility Experiments	129
6.3.5. Summary	135
7. Telexistence Communication Using TWISTER: Telexistence Wide-angle Immersive STEReoscope	137
7.1. Face-to-Face Communication	137
7.2. Concept of Mutual Telexistence Using TWISTER	139
7.3. Development of TWISTER	140
7.4. Principles of TWISTER	141
7.4.1. Movable Parallax Barrier	141
7.4.2. Rendering	144
7.4.3. Image Capture	145
7.4.4. Capture and Display	147
7.4.5. Robotic Mutual Telexistence Using TWISTER	152
7.4.6. Omnistereo Camera System for TWISTER	153
7.5. Summary	159

8. Future Perspective	160
8.1. Out-of-the-Body Experience	160
8.2. Impact of Telexistence on Daily Life	162
8.3. Open Problems of Telexistence	164
8.4. Telexistence in the Future	167
8.5. Telexistence and Society	170
Appendix A. Color Figures	173
Bibliography	181
About the Author	189
Index	191
