

# Contents

<i>Preface</i>	vii
1. WHY STATISTICS?	1
1.1 Introduction . . . . .	1
1.2 Representation of Data . . . . .	2
2. PROBABILITY ON DISCRETE SAMPLE SPACES	5
2.1 Introduction . . . . .	5
2.2 Probability . . . . .	6
2.3 Conditional Probability . . . . .	19
2.4 Independence . . . . .	23
2.5 Exercises . . . . .	24
3. DISCRETE PROBABILITY DISTRIBUTIONS	27
3.1 Introduction . . . . .	27
3.2 Discrete Random Variables . . . . .	27
3.3 Discrete Probability Distributions . . . . .	30
3.4 Probability Generating Function . . . . .	41
3.5 Exercises . . . . .	43
4. CONTINUOUS PROBABILITY DISTRIBUTIONS	45
4.1 Introduction . . . . .	45
4.2 Distribution Function . . . . .	45
4.3 Probability Density Function . . . . .	54
4.4 Expectation and Variance . . . . .	60
4.5 Moments . . . . .	65

4.6	Moment Generating Function . . . . .	68
4.7	Functions of a Random Variable . . . . .	71
4.8	Standard Continuous Probability Distributions . . . . .	77
4.9	Exercises . . . . .	89
5.	MULTIVARIATE PROBABILITY DISTRIBUTIONS	99
5.1	Introduction . . . . .	99
5.2	Bivariate Probability Distributions . . . . .	99
5.3	Conditional Distributions . . . . .	109
5.4	Independence . . . . .	114
5.5	Expectation of a Function of a Random Vector . . . . .	118
5.6	Correlation and Regression . . . . .	123
5.7	Moment Generating Function . . . . .	130
5.8	Multivariate Probability Distributions . . . . .	134
5.9	Exercises . . . . .	139
6.	FUNCTIONS OF RANDOM VECTORS	147
6.1	Introduction . . . . .	147
6.2	Functions of Two Random Variables . . . . .	147
6.3	Functions of Multivariate Random Vectors . . . . .	159
6.4	Sampling Distributions . . . . .	161
6.5	Exercises . . . . .	174
7.	APPROXIMATIONS TO SOME PROBABILITY DIS- TRIBUTIONS	179
7.1	Introduction . . . . .	179
7.2	Chebyshev's Inequality . . . . .	180
7.3	Weak Law of Large Numbers . . . . .	182
7.4	Poisson Approximation to Binomial Distribution . . . . .	184
7.5	Central Limit Theorem . . . . .	187
7.6	Normal Approximation to the Binomial Distribution . . . . .	189
7.7	Approximation of a Chi-square Distribution by a Normal Distribution . . . . .	191
7.8	Convergence of Sequences of Random Variables . . . . .	191
7.9	Exercises . . . . .	193
8.	ESTIMATION	197
8.1	Introduction . . . . .	197

8.2	Estimation . . . . .	199
8.3	Some Methods of Estimation . . . . .	208
8.4	Cramer-Rao Inequality and Efficient Estimation . . . . .	218
8.5	Sufficient Statistics . . . . .	226
8.6	Properties of a Maximum Likelihood Estimator . . . . .	233
8.7	Bayes Estimation . . . . .	238
8.8	Estimation of a Probability Density Function . . . . .	241
8.9	Exercises . . . . .	243
9.	INTERVAL ESTIMATION AND TESTING OF HYPOTHESES	247
9.1	Introduction . . . . .	247
9.2	Interval Estimation (Confidence Interval) . . . . .	248
9.3	Testing of Hypotheses . . . . .	255
9.4	Chi-square Tests . . . . .	268
9.5	Exercises . . . . .	278
10.	LINEAR REGRESSION AND CORRELATION	283
10.1	Introduction . . . . .	283
10.2	Simple Linear Regression Model . . . . .	284
10.3	Multiple Linear Regression Model . . . . .	296
10.4	Correlation . . . . .	297
10.5	Exercises . . . . .	299
Appendix A	REFERENCES	303
Appendix B	ANSWERS TO SELECTED EXERCISES	305
Appendix C	TABLES	307
C.1	Table for Standard Normal Probability Distribution . . .	308
C.2	Table for t-Distribution . . . . .	310
C.3	Table for Chi-square Distribution . . . . .	311
C.4	Table for F-Distribution . . . . .	312
