

PREFACE

The 6th International Conference on Dynamical Aspects of Nuclear Fission was held from 2 to 6 October, 2006 at Smolenice Castle, Slovakia. It was organized by Institute of Physics, Slovak Academy of Science (Slovakia) and Flerov Laboratory of Nuclear Reactions, Joint Institute for Nuclear Research (Russia).

The scientific programme of the Conference covered a wide range of problems in the field of nuclear fission dynamics. The main discussed topics were: dynamics of fission, fusion-fission, superheavy elements, nuclear fragmentation, exotic modes of fission, structure of fission fragments and neutron rich nuclei and development in experimental techniques.

Around 40 scientists from 13 countries took part in the conference. We are especially pleased that the conference attracted young participants and speakers.

We wish to thank all the participants for their contributions to the conference and for lively and fruitful discussions. We would like to express our sincere gratitude to the International Advisory Committee for their excellent recommendations on speakers, invaluable remarks and suggestions. We are also grateful to the members of the Organizing Committee and to everyone who contributed to organizing the Conference.
