

# CONTENTS

<i>Contributors</i>	xiii
<i>Preface</i>	xxiii
<b>Part I Stem Cells and Effects of Microenvironment</b>	<b>1</b>
<b>Chapter 1</b> MicroEngineering the Embryonic Stem Cell Environment <i>Yu-Shik Hwang, Bong Geun Chung, Alice Mira Chung and Ali Khademhosseini</i>	3
1. Embryonic Stem Cells and Tissue Engineering	3
2. Microenvironment	9
3. Microengineering to Control ESC Microenvironment	16
4. Conclusions	23
Acknowledgments	23
References	23
<b>Chapter 2</b> Stem Cells Therapy for Ischemic Cardiovascular Diseases: New Insights on Mechanisms and Fate of the Implanted Cells <i>Nicolas Noiseux, Jean-François Cailhier and Samer Mansour</i>	33

	1. Background: Ischemic Cardiovascular Diseases	35
	2. Myocardial Infarct: Pathophysiology	37
	3. Stem Cells for Myocardial Repair	39
	4. What is the Best Donor Cell Source for Cellular Therapy?	41
	5. Suspected Mechanisms of Stem Cell Repair	46
	6. Delivery and Homing of Stem Cells	57
	7. Optimizing the Reparative Biology of Stem Cells	59
	8. Examples of Stem Cells Clinical Applications in Acute MI	61
	9. Conclusion	66
	References	68
<b>Chapter 3</b>	<b>The Role of Mechanical Forces in the Cardiomyogenic Differentiation of Stem Cells</b>	<b>85</b>
	<i>Daniel Pelaez, Joshua M. Hare and Herman S. Cheung</i>	
	1. Introduction	86
	2. Cell-Based Therapies for Myocardial Regeneration	90
	3. Mechanical Forces and Cardiovascular Differentiation	97
	4. Current Models of Mechanotransduction	106
	5. Conclusions	110
	References	111
<b>Chapter 4</b>	<b>Aging and Stem Cell Therapy: A Review and Highlights of Current Controversies</b>	<b>119</b>
	<i>Madhur Nayan, Nina Nouraeyan, Wendy S. Chiu and Dominique Shum-Tim</i>	
	1. Introduction to Stem Cell Senescence	120
	2. Current Controversies	120
	3. Definitions of Age	122
	4. Differences in Aged Stem Cells	126
	5. Effects of Laboratory Manipulations	133
	6. Effects of the Aged Microenvironment	135

	7. From Bench to Bedside: Clinical Implications	136
	8. Conclusion	138
	References	140
<b>Chapter 5</b>	<b>Immunological Basis for Allogeneic Mesenchymal Stem Cell Therapy</b>	<b>149</b>
	<i>Rony Atoui and Ray C. J. Chiu</i>	
	1. Introduction	149
	2. The Proliferating Sources of Stem Cells	151
	3. MSCs: Their Unique Immunotolerant Properties	153
	4. <i>In Vitro</i> Immune Suppression by MSCs	156
	5. Immune Modulation of MSCs <i>in Vivo</i>	158
	6. Similarities with Tumor Evasion and “Maternal-Fetal Cell Microchimerism”	159
	7. Immune Tolerance of Embryonic, Fetal and Other Adult Stem Cells	161
	8. The Immune Tolerance After the Differentiation of Stem Cells	161
	9. Current Controversies	162
	10. Conclusion	163
	Acknowledgments	164
	References	164
<b>Chapter 6</b>	<b>Modulation of the Tissue Microenvironment to Enhance the Effects of Cell Transplantation</b>	<b>173</b>
	<i>Paul S. Lee and Terrence M. Yau</i>	
	1. Introduction	173
	2. Paracrine Mechanisms	175
	3. Enhancing the Paracrine Effects of Cell Transplantation	177
	4. Conclusion	192
	References	193

<b>Chapter 7</b>	Effect of Nanofibrous Scaffolding on Stem Cell Differentiation and Tissue Formation <i>Laura A. Smith and Peter X. Ma</i>	205
	1. Introduction	205
	2. Methods of Fabricating Biomimetic Nanofibrous Scaffolding	207
	3. Effect of Nanofibrous Scaffolding on Stem Cell Behavior	210
	4. Conclusion	214
	References	214
<b>Part II</b>	<b>Tissue Engineering and Bioengineering of Stem Cells</b>	<b>219</b>
<b>Chapter 8</b>	Genetic Engineering of Human Embryonic Stem Cells: Focusing on Targeted Modification <i>Katherine M. Ruby and Binhai Zheng</i>	221
	1. Introduction	221
	2. The Basics of Gene Targeting — Lessons from Mouse ES Cells	224
	3. Targeted Modifications in Human ES Cells	234
	4. Concluding Remarks	243
	Notes added in proof	244
	Acknowledgments	245
	Nomenclature	245
	References	246
<b>Chapter 9</b>	Bio-Artificial Myocardium for the Treatment of Ischemic Heart Disease: First Clinical Experience <i>Juan C. Chachques</i>	253
	1. Introduction	254
	2. Heart Failure	254
	3. From Latissimus Dorsi to Cellular Cardiomyoplasty	255
	4. Cell-Based Regenerative Therapy	256

5. Stem Cells: New Developments	258
6. Tissue Engineering: State of the Art	260
7. Development of Bio-Artificial Myocardium	263
8. New Developments	271
9. Conclusions and Perspectives	274
10. Translational Research	276
Acknowledgments	279
References	279
<b>Chapter 10</b> Stem Cell Bioengineering and Microencapsulation: Current Perspective and Future Potentials <i>Arghya Paul, Jasmine Bhatena and Satya Prakash</i>	287
1. Introduction	288
2. Currently Available Modes of Stem Cell Administration: Potential and Limitations	289
3. Traditional Cell Immobilization Techniques: Potential in Stem Cell Delivery	290
4. Introduction to Artificial Cell: A Promising Stem Cell Delivery System	294
5. Potential and Current Progress of Artificial Cells in Stem Cell Therapy	302
6. Conclusion and Future Works	305
Acknowledgments	307
References	307
<b>Part III Applications of Cell Therapy — From Bench to Bedside</b>	<b>315</b>
<b>Chapter 11</b> Fetal-Source Stem Cells <i>Pai-Jiun Ho, B. Linju Yen and Men-Luh Yen</i>	317
1. Stem Cells: Definition and Overview	317
2. Progenitor/Stem Cells from Fetal Sources	319
3. Term FSCs	321
4. Pre-term FSCs: Amniotic Fluid MSCs	325
5. Immunomodulatory Properties of FSCs	326

6. Conclusion	328
Acknowledgments	328
References	329
<b>Chapter 12</b> Cartilage Regeneration With and Without Cell Transplantation	339
<i>Avital Mendelson, Chang Hun Lee and Jeremy J. Mao</i>	
1. Introduction	340
2. Cell-Based Cartilage Tissue Engineering Approaches	340
3. Acellular Cartilage Tissue Engineering Approaches	343
4. Stem Cell Homing	344
5. Comparison of Tissue Regeneration by Cell Homing and Cell Delivery	348
6. Conclusions and Outlook	349
Acknowledgments	349
References	350
<b>Chapter 13</b> Transcriptional Regulation and Clinical Applications of Neural Stem Cells	355
<i>Yi-Chao Hsu and Ing-Ming Chiu</i>	
1. Introduction	356
2. Definition and Sources of Neural Stem Cells (NSCs)	357
3. Isolation and Characterization of NSCs	360
4. Transcriptional Regulation of NSCs	367
5. Therapeutic Potential and Clinical Application of NSCs	371
6. Patient-Specific NSCs from Induced Pluripotent Stem Cells	374
References	375

<b>Chapter 14</b>	Cellular Cardiomyoplasty: Evidence of Cellular Therapy, Mechanisms and Controversies <i>Adil Al-Kindi, Yin Ge and Dominique Shum-Tim</i>	385
	1. Introduction	386
	2. Transdifferentiation	391
	3. Cellular Fusion	401
	4. Paracrine Mechanism	412
	5. Closing Remarks	423
	References	425
<b>Chapter 15</b>	Enhanced Stem Cell Therapies for Cardio-Pulmonary Diseases <i>David W. Courtman</i>	441
	1. Introduction	441
	2. Cardiac Repair/Regeneration	442
	3. Cell Therapy for Pulmonary Diseases	445
	4. Enhancing Regenerative Potential	447
	5. Summary	450
	References	451
<b>Chapter 16</b>	Stem Cell Therapy for Myocardial Regeneration: The Chinese Experience <i>Race L. Kao, Tuanzhu Ha, Chuanfu Li, Xiang Gao, Fumin Zhang, Zhijian Yiang, Yijiang Chen and Wenzhu Ma</i>	457
	1. Introduction	458
	2. Patients and Methodology	460
	3. Results	463
	4. Discussion	468
	List of Abbreviations	472
	References	473

<b>Chapter 17</b>	<b>Surgical Autologous Peripheral Blood Stem Cell Implantation for Cardiomyopathy: Bangkok Heart Hospital Experience</b>	<b>481</b>
	<i>Kitipon V. Arom and Permyos Ruengsakulrach</i>	
	1. Introduction	482
	2. Types of Stem Cells	486
	3. Delivery Methods	494
	4. Bangkok Heart Hospital Experiences	495
	5. Future Developments	527
	References	528
