

CONTENTS

Preface	v
Overview	
Progress and Challenges of a Hydrogen Economy <i>M. S. Dresselhaus</i>	3
Hydrogen Production	
A New Solar Metal Sulfate – Ammonia based Thermochemical Water Splitting Cycle for the Production of Hydrogen <i>Ali t-raissi, C. Huang, L. Mao and N. Muradov</i>	15
Development of Photocatalysts for Solar Hydrogen Production <i>A. Kudo</i>	46
Direct Production of Pressurized Hydrogen from Waste Aluminum Without Gas Compressor <i>T. Hiraki, N. Okinaka, H. Uesugi, and T. Akiyama</i>	54
Hydrogen Production from Hydrocarbons by using Oxygen Permeable Membranes <i>H. Takamura</i>	62
Hydrogen Production <i>via</i> Water Splitting in Solar Reactors: The Hydrosol Process <i>A. G. Konstandopoulos, C. Sattler, P. Stobbe, and A.M. Steele</i>	70
Hydrogen Storage	
H ₂ Binding and Reactivity on Transition Metal Complexes Underlying Biomimetic H ₂ Production and New Materials for H ₂ Storage <i>Gregory J. Kubas</i>	83

Nanostructuring Impact on the Enthalpy of Formation of Metal Hydrides <i>V. Berube, M. S. Dresselhaus, and G. Chen</i>	92
Dehydrogenation Mechanism from Titanium-Activated Sodium Alanate <i>S. Li and P. Jena</i>	102
Comparison of the Dehydrogenation Chemistry of Carborane and Decaborane on the Pt(111) Surface <i>A. Tillekaratne and M. Trenary</i>	116
Single- and Double-Cations Borohydrides for Hydrogen Storage Applications <i>S.-I. Orimo, Y. Nakamori, H.-W. Li, M. Matsuo, T. Sato, N. Ohba, K. Miwa, and S.-I. Towata</i>	124
Low Temperature Transmission IR Spectra of Sodium and Lithium Borohydride <i>P. Jash and M. Trenary</i>	130
Synthesis and Modification of Light Metal and Complex Hydrides by High-Energy Ball Milling <i>I. Llamas-Jansa, C. Rongeat, S. Doppiu, and O. Gutfleisch</i>	138
Development of Metal Hydrides for High-Pressure MH Tank <i>T. Matsunaga, T. Shinozawa, K. Washio, D. Mori, and M. Ishikikiyama</i>	144
Synthesis of Novel Metal-Coordinated Fullerenes for Vehicular Hydrogen Storage <i>E. Whitney, C. Engtrakul, C. J. Curtis, Y. Yan, P. A. Parilla, K. J. O'Neill, L. J. Simpson, M. J. Heben, Y. Zhao, Y.-H. Kim, S. B. Zhang, and A. C. Dillon</i>	155
Trends in the Properties of Selected Metal-Organic Framework Structures: A Theoretical Study <i>A. Kuc, J.-O. Joswig, A. Enyashin, and G. Seifert</i>	173
Experimental Techniques to Measure of the Equilibrium Plateau Pressures of Metal Hydrides <i>A. Borgschulte, S. Kato, M. Biemann, and A. Züttel</i>	184

Characterization of Complex Metal Hydrides by High-Resolution Solid State NMR Spectroscopy <i>R. C. Bowman, Jr., J. W. Reiter, S.-J. Hwang, C. Kim, and H. Kabbour</i>	192
Study on the Structure and Electrochemical Properties of Novel Nd-Mg-Ni-Co Hydrogen Storage Alloys <i>C.C. Pan and R. Yu</i>	203
Analysis and Modelling of the Burst Pressure of High Pressure Hydrogen Tanks <i>D. Chapelle, F. Thiebaud, and D. Perreux</i>	211
Hydrogen Behavior and Coloration of Tungsten Oxide Films Prepared by Magnetron Sputtering and Pulsed Laser Deposition <i>S. Nagata, B. Tsuchiya, T. Shikama, A. Inouye, and S. Yamamoto</i>	221
High Hydrogen Absorption in Titanium Ethylene Complexes at Room Temperature <i>A. Phillips and B.S. Shivaram</i>	229
A Comparative Study of Dehydrogenation Energetics of B ₂ H ₆ , Al ₂ H ₆ and Ga ₂ H ₆ based on Density Functional Theory <i>J. Liu, J. Aeschleman, L. M. Rajan, C. Che, and Q. Ge</i>	234
Computational Design of Nanomaterials for Hydrogen Storage <i>Q. Sun, Q. Wang, and P. Jena</i>	244
 Fuel Cells	
Enhancement of Protonic Conductivity in the Near Surface Regions of Radiation Induced Polymer Electrolyte Membranes <i>B. Tsuchiya, S. Nagata, K. Saito, T. Shikama</i>	263
New PEM Fuel Cell Membranes for Higher Temperature, Drier Operating Conditions based on the Heteropolyacids <i>A. M. Herring, N. V. Aieta, M.-C. Kuo, J. L. Horan, S. F. Dec, M. H. Frey, A. Genupur, L. Ren, S. J. Hamrock, M. A. Yandrasits, and G. M. Haugen</i>	273

Alternative Materials to Pd Membranes for Hydrogen Purification <i>Thad M. Adams and Paul S. Korinko</i>	282
---	-----

Safety and Education

Structural-Metals Considerations for the Containment of High-Pressure Hydrogen Gas <i>C. S. Marchi, B. P. Somerday, K. A. Nibur and M. Yip</i>	299
--	-----

A National Agenda for Hydrogen Codes and Standards <i>Chad Blake</i>	309
---	-----

Preliminary Performance Assessment of Commercially-available Hydrogen Sensors <i>N. D. Marsh and T. G. Cleary</i>	317
---	-----

Panel Summary <i>S. W. Jorgensen, R. Chahine, J. P. Meyers, G. D. Parks, A. A. Pundt, and Y. Filinchuk</i>	325
---	-----
