

## CONTENTS

|  |     |
|--|-----|
| <b>Editors</b>   | v   |
| <b>Reviewers</b>   | vii |
| <b>Preface</b>   | ix  |
| <b>Preface to HS Volume</b>  | xi  |
| <b>Raingauge-Based Rainfall Nowcasting with Artificial Neural Network</b>  | 1   |
| <i>Shie-Yui Liong and Shan He</i>  |     |
| <b>Short-Term Rainfall Forecasting Using a Bayesian Stochastic Rainfall Burst Model</b>  | 11  |
| <i>Sri Srikanthan, Benjamin Renard, Lijie Cui and George Kuczera</i>   |     |
| <b>A Synoptic Weather Typing Approach to Assess Climate Change Impacts on Meteorological and Hydrological Risks at Local Scale in South-Central Canada</b> | 23  |
| <i>Chad Shouquan Cheng, Qian Li and Guilong Li</i>   |     |
| <b>Outline for Alternative Rainfall-Runoff Modeling Framework Under Uncertainty</b>  | 39  |
| <i>Lee Giha, Tachikawa Yasuto, Sayama Takahiro and Takara Kaoru</i>  |     |
| <b>A Simple Method for Incorporating Parameter Uncertainty in Stochastic Data Generation</b>   | 53  |
| <i>Sri Srikanthan, George Kuczera and Mark Thyer</i>   |     |

|   |     |
|---|-----|
| <b>Evaluation of Agriculture Activities on Groundwater of Al-Foah Area, North of Al-Ain, United Arab Emirates (Uae)</b>               | 65  |
| <i>Sameh Y. Suleiman, Ahmed A. Murad and Ahmed S. El Mahmoudi</i>   |     |
| <b>Numerical Simulation of Electric Conductivity Fluctuations due to Groundwater Pumping in a Coastal Aquifer</b>                     | 79  |
| <i>E. D. P. Perera, K. Jinno, Y. Hiroshiro and A. Tsutsumi</i>  |     |
| <b>Geochemistry of Arsenic in the Holocene Aquifer; South-Western Bangladesh</b>  | 89  |
| <i>Md. Tauhid-Ur-Rahman, Akira Mano, Keiko Udo and Yoshinobu Ishibashi</i>  |     |
| <b>An Extended Dynamical Model of a Geyser Induced by Inflow of Gas: Considering Effects of a Complicated Underground Watercourse</b> | 103 |
| <i>Hiroyuki Kagami</i>  |     |
| <b>An Extended Dynamical Model of a Geyser Induced by Inflow of Gas in Case of Plural Underground Gas Supply Sources</b>              | 113 |
| <i>Hiroyuki Kagami</i>  |     |
| <b>Sediment Delivery and Environmental Change in Asian Rivers: Linking Archives With Field Investigations</b>                         | 123 |
| <i>David L. Higgitt</i>   |     |
| <b>Characteristics of Backflow in Iwaki River Mouth</b>   | 135 |
| <i>Mikio Sasaki, Hitoshi Tanaka and Makoto Umeda</i>  |     |
| <b>How Remote Sensing Technology Contributes to Water Studies</b>   | 143 |
| <i>Mohamad Rukieh</i>   |     |
| <b>Water Balance Using Modis Satellite Data</b>   | 153 |
| <i>Preeyaphorn Kosa and Kobkiat Pongput</i>   |     |

|   |     |
|---|-----|
| <b>Analysis on the Relationship Between Vegetation Coverage and Soil Moisture in the Loess Plateau Region of China</b>                  | 165 |
| <i>Weiwei Shao and Dawen Yang</i>   |     |
| <b>The Effects of Temporal Resolution on Annual Interception Estimation</b>   | 179 |
| <i>Azinoor Azida Abu Bakar and Minjiao Lu</i>   |     |
| <b>Experiences on Water-Related Disaster Management in China</b>  | 191 |
| <i>Jinping Liu and Xiaohe Du</i>  |     |
| <b>Hydrological Model Comparison and Combination for Flood Forecast in the Three Gorges Region, China</b>                               | 203 |
| <i>Huan Ma and Dawen Yang</i>   |     |
| <b>Monitoring the 2004 Flood in the Meghna River Basin in Bangladesh Using Ground Data, Radarsat Imagery and GIS</b>                    | 217 |
| <i>Roxana Hoque, Daichi Nakayama, Hiroshi Matsuyama and Jun Matsumoto</i>   |     |
| <b>Recently Flood Events and Groundwater Relationship in Lower Namkam Basin Thailand</b>  | 237 |
| <i>Sombat Chuenchooklin, Tsutomu Ichikawa and Phattaporn Mekpruksawong</i>  |     |
| <b>Impact of Error Covariance on Flood Forecasting Using Ensemble Kalman Filter</b>   | 251 |
| <i>Sri Srikanthan and George Kuczera</i>  |     |
| <b>A Study on the Assessment of Multi-Factors Affecting Urban Floods Using Satellite Image; A Case Study in Nakdong Basin, S. Korea</b> | 265 |
| <i>Youngjoo Kwak and Akihiko Kondoh</i>   |     |
| <b>A Distributed-Lumped Model for Flood and Sediment Yield Predictions at the Catchment Scale</b>                                       | 279 |
| <i>Apip, Takahiro Sayama, Kaoru Takara and Yasuto Tachikawa</i>   |     |

|   |     |
|---|-----|
| <b>Influence of Typhoon Characteristics on Flood Forecasting</b>  | 295 |
| <i>Gwo-Fong Lin, Guo-Rong Chen and Pei-Yu Huang</i>   |     |
| <b>Estimation of Uncertainty in Prediction of a Flood Forecasting Model</b>                               | 307 |
| <i>Hadi Kardhana and Akira Mano</i>   |     |
| <b>Malaysia's Experience in the Monitoring of Investment and Results of Water Resources Management</b>    | 319 |
| <i>Salmah Binti Zakaria and Lee Jin</i>   |     |
| <b>Waste Load Allocation Modeling Based on a New Equity Measure</b>                                       | 329 |
| <i>S. Mohan and K. Pavan Kumar</i>  |     |
| <b>The Impact of Weather Variables on Summer Water use in the City of Toronto</b>                         | 349 |
| <i>Romila Verma</i>   |     |
| <b>An Application of Conditional Differential Evolution Algorithm for Searching Reservoir Rule Curves</b> | 359 |
| <i>Anongrit Kangrang and Rattana Hormwichian</i>  |     |
| <b>Water Resources Management in Turkey as a Case Study Southeastern Anatolia Project (GAP)</b>           | 369 |
| <i>Bülent Açma</i>  |     |
| <b>Ground Water Level Criteria for Supporting Lined Concrete Canal Design</b>                             | 387 |
| <i>Surasak Klungsupavipat and Suwatana Chittaladakorn</i>   |     |
| <b>Intelligent Model for Pipe Network Management</b>  | 407 |
| <i>Suwatana Chittaladakorn and Pakorn Ditthakit</i>   |     |
| <b>Decision Support Model for Optimal Management of Coastal Gate</b>                                      | 425 |
| <i>Pakorn Ditthakit and Suwatana Chittaladakorn</i>   |     |
