

Contents

Preface

<i>Zhien Ma</i> : Some Recent Results on Epidemic Dynamics Obtained by Our Group	1
<i>Fred Brauer, Jianhong Wu</i> : Modeling SARS, West Nile Virus, Pandemic Influenza and Other Emerging Infectious Diseases: A Canadian Team's Adventure	36
<i>Julien Arino</i> : Diseases in Metapopulations	64
<i>Fred Brauer</i> : Modeling the Start of a Disease Outbreak	123
<i>Troy Day</i> : Mathematical Techniques in the Evolutionary Epidemiology of Infectious Diseases	136
<i>Zhilan Feng, Dashun Xu, Haiyun Zhao</i> : The Uses of Epidemiological Models in the Study of Disease Control	150
<i>John W. Glasser, Maureen Birmingham</i> : Assessing the Burden of Congenital Rubella Syndrome and Ensuring Optimal Mitigation via Mathematical Modeling	167
<i>Thanate Dhirasakdanon, Horst R. Thieme</i> : Persistence of Vertically Transmitted Parasite Strains which Protect against More Virulent Horizontally Transmitted Strains	187
<i>Ying-Hen Hsieh</i> : Richards Model: A Simple Procedure for Real-time Prediction of Outbreak Severity	216

<i>James Watmough: The Basic Reproduction Number and the Final Size of an Epidemic</i>	237
<i>K.P. Hadeler: Epidemic Models with Reservoirs</i>	253
<i>Hongbin Guo, Michael Y. Li, Zhisheng Shuai: Global Stability in Multigroup Epidemic Models</i>	268
<i>Wendi Wang: Epidemic Models with Time Delays</i>	289
<i>Shenghai Zhang: A Simulation Approach to Analysis of Antiviral Stockpile Sizes for Influenza Pandemic</i>	315
<i>Peter Buck, Rongsong Liu, Jiangping Shuai, Jianhong Wu, Huaiping Zhu: Modeling and Simulation Studies of West Nile Virus in Southern Ontario Canada</i>	331
