

Contents

<i>Preface</i>	vii
1. The Fundamental Theorem of Arithmetic	1
1.1 Least Integer Axiom and Mathematical Induction	1
1.2 Division Algorithm	2
1.3 Greatest common divisors	4
1.4 The Euclidean Algorithm	7
1.5 Congruences	8
1.6 Fundamental Theorem of Arithmetic	10
1.7 Exercises	11
2. Arithmetical Functions and Dirichlet Multiplication	13
2.1 The Möbius function	13
2.2 The Euler totient function	15
2.3 Dirichlet product	20
2.4 Dirichlet inverses and the Möbius inversion formula	22
2.5 Multiplicative functions and Dirichlet products	23
2.6 Exercises	25
3. Averages of Arithmetical Functions	29
3.1 Introduction	29
3.2 Partial summation and the Euler-Maclaurin summation formula	30
3.3 Some elementary asymptotic formulas	33
3.4 The divisor function and Dirichlet's hyperbola method	35
3.5 An application of the hyperbola method	37

3.6	Exercises	39
4.	Elementary Results on the Distribution of Primes	41
4.1	Introduction	41
4.2	The function $\psi(x)$	42
4.3	The functions $\theta(x)$ and $\pi(x)$	44
4.4	Merten's estimates	46
4.5	Prime Number Theorem and $M(\mu)$	49
4.6	The Bertrand Postulate	54
4.7	Exercises	59
5.	The Prime Number Theorem	63
5.1	The Prime Number Theorem	63
5.2	The Riemann zeta function	63
5.3	Euler's product and the product representation of $\zeta(s)$. .	64
5.4	Analytic continuation of $\zeta(s)$ to $\sigma > 0$	67
5.5	Upper bounds for $ \zeta(s) $ and $ \zeta'(s) $ near $\sigma = 1$	68
5.6	The non-vanishing of $\zeta(1 + it)$	70
5.7	A lower bound for $ \zeta(s) $ near $\sigma = 1$	73
5.8	Perron's Formula	76
5.9	Completion of the proof of the Prime Number Theorem .	80
5.10	Exercises	84
6.	Dirichlet Series	85
6.1	Absolute convergence of a Dirichlet series	85
6.2	The Uniqueness Theorem	86
6.3	Multiplication of Dirichlet series	87
6.4	Conditional convergence of Dirichlet series	88
6.5	Landau's Theorem for Dirichlet series	91
6.6	Exercises	92
7.	Primes in Arithmetic Progression	95
7.1	Introduction	95
7.2	Dirichlet's characters	96
7.3	The orthogonal relations	98
7.4	The Dirichlet L -series	100
7.5	Proof of Dirichlet's Theorem	101
7.6	Exercises	106
