

# Contents

<i>Dedication</i>		v
<i>Acknowledgements</i>		vi
<i>Prologue</i>		vii
<b>Chapter 1</b>	Introduction — The Evolution of Our Understanding of the Immune System	1
<b>Chapter 2</b>	Molecular Immunology	13
<b>Chapter 3</b>	The Problem — Understanding How Molecules Direct the Behavior of Cells Comprising the Immune System	19
<b>Chapter 4</b>	The Quantal Theory of Immunity	23
<b>Chapter 5</b>	The Variability of Cell Cycle Progression and the Competence and Progression Phases of the Cell Cycle	27
<b>Chapter 6</b>	The Quantal Nature of IL-2-Promoted T Cell Cycle Progression	35
<b>Chapter 7</b>	The Molecular Basis for Quantal IL-2/IL-2R Signaling of Cell Cycle Progression — The IL-2/Receptor Interaction	47

<b>Chapter 8</b>	The Molecular Basis for Quantal IL-2/IL-2R Signaling of Cell Cycle Progression — IL-2 and IL-2 Receptor Metabolism	57
<b>Chapter 9</b>	The Molecular Basis for Quantal IL-2/IL-2R Signaling of Cell Cycle Progression — IL-2 Receptor Signaling via the Jak/Stat Pathway	65
<b>Chapter 10</b>	The Molecular Basis for Quantal IL-2/IL-2R Signaling of Cell Cycle Progression — IL-2 Receptor Signaling via Phosphorylation of IL-2R $\beta$ Chain Y338	77
<b>Chapter 11</b>	The T Cell Antigen Receptor Complex and the Quantal Regulation of the IL-2 and IL-2R Genes	87
<b>Chapter 12</b>	Digital Signaling via the T Cell Antigen Receptor Complex	99
<b>Chapter 13</b>	Negative Feedback Regulation of T Cell Antigen Receptor Complex Signaling — Attenuation of IL-2 Gene Expression	109
<b>Chapter 14</b>	The Paradox of the IL-2 (-/-) Mouse	121
<b>Chapter 15</b>	The <i>Scurfy</i> Mouse	127
<b>Chapter 16</b>	Lymphopenia, Autoimmunity and the Regulatory T Cell (Treg)	131
<b>Chapter 17</b>	Treg-mediated "Active Suppression" of T Cell Proliferation	137
<b>Chapter 18</b>	FOXP3, A Better ID-Tag for Tregs?	149

<b>Chapter 19</b>	Mice Versus Men	157
<b>Chapter 20</b>	Active Versus Passive Suppression and IL-2 Metabolism	161
<b>Chapter 21</b>	FOXP3 Restricts But Does Not Suppress IL-2 Production	169
<b>Chapter 22</b>	Both the TCR and IL-2 Regulate Foxp3 Expression	175
<b>Chapter 23</b>	The Effects of FOXP3 Expression	179
<b>Chapter 24</b>	The Role of IL-2 in the Generation of Immune Responses <i>In Vivo</i>	185
<b>Chapter 25</b>	The Role of the IL-2r Chains in IL-2 Signaling, Consumption and Suppression of T Cell Proliferation	195
<b>Chapter 26</b>	T Cell Tissue-specific Autoimmunity	205
<b>Chapter 27</b>	Type 1 Diabetes Mellitus (T1DM), a Prototypic Genetic Autoimmune Disease with a Tie to IL-2	213
<b>Chapter 28</b>	The Pathogenesis of Leukemia — Loss of Normal Quantal Growth Control	223
	<i>Epilogue</i>	231
	<i>Index</i>	233
