

CONTENTS

Preface	v
Chapter 1. Ultimate CMOS, Novel MOSFETS, and Alternative Transistors	
Challenges and Progress in III-V MOSFETs for CMOS Circuits <i>S. Oktyabrsky, M. Yakimov, V. Tokranov, R. Kambhampati, H. Bakhru, S. Koveshnikov, W. Tsai, F. Zhu and J. Lee</i>	3
Short Channel, Floating Body, and 3D Coupling Effects in Triple-Gate MOSFET <i>K.-I. Na, J.-H. Lee S. Cristoloveanu, Y.-H. Bae, P. Patruno and W. Xiong</i>	15
Analog and Digital Performance of the Screen-Grid Field Effect Transistor (SGrFET) <i>K. Fobelets, P. W. Ding, Y. Shadrokh and J. E. Velazquez-Perez</i>	25
Analytical Characterization and Modeling of Shielded Test Structures for RF-CMOS <i>E. Torres-Rios, R. Torres-Torres, R. Murphy-Arteaga and E. A. Gutiérrez-D.</i>	35
Germanium on Sapphire <i>H. S. Gamble, P. T. Baine, H. Wadsworth, Y. H. Low, P. V. Rainey, F. H. Ruddell, B. M. Armstrong, D. W. McNeill and S. J. N. Mitchell</i>	47
Single Event Effects in the Nano Era <i>M. L. Alles, L. W. Massengill, R. D. Schrimpf, R. A. Weller and K. F. Galloway</i>	57
An Efficient Numerical Method of DC Modeling for Power MOSFET, MESFET and AlGaIn/GaN HEMT <i>T. Rahman, M. A. Huque and S. K. Islam</i>	67
Nanocomponents: A Designer's Point of View <i>H. Fanet</i>	83
Chapter 2. Nano Materials, Structures and Devices	
Silicon Spintronics <i>I. Appelbaum</i>	95

Nano Characterization of Materials <i>D. K. Schroder</i>	103
Biomolecular Sensing Using Carbon Nanotubes: A Simulation Study <i>G. B. Abadir, K. Walus, R. F. B. Turner and D. L. Pulfrey</i>	121
Large Area Nanoscale Patterning by Interferometric Lithography – Nanophotonics and Nanofluidics <i>S. R. J. Brueck</i>	131
The Deposition and Control of Self Assembled Silicon Nano Islands on Crystalline Silicon <i>R. Kiebach, Z. Yu, M. Aceves-Mijares, D. Bian and J. Du</i>	143
Chapter 3. Ultra High Speed Devices and Concepts	
AlGaN/GaN HEMTs: Recent Developments and Future Directions <i>S. Rajan, U. K. Mishra and T. Palacios</i>	155
Fluctuations and Ultrafast Processes in Voltage-Biased Two-Dimensional Channels <i>A. Matulionis</i>	165
Non-Ideal Current Transport in Heterostructure Field Effect Transistors <i>A. Koudymov and M. Shur</i>	177
THz Detection by Field-Effect Transistors in Magnetic Fields: Shallow Water vs Deep Water Mechanism of Electron Plasma Instability <i>M. Sakowicz, J. Lusakowski, K. Karpierz, M. Grynberg, W. Knap, K. Köhler, G. Valušis, K. Golaszewska, E. Kamińska and A. Piotrowska</i>	191
Cyclotron Resonance Vanishing Effect and THz Detection <i>A. Chebotarev and G. Chebotareva</i>	201
Chapter 4. Optoelectronics and Advanced Lasers, Detectors and Imagers	
Impregnated Semiconductor Scintillator <i>S. Luryi</i>	215
Terahertz Quantum Cascade Lasers and Real-Time T-Rays Imaging at Video Rate <i>Q. Hu</i>	225

Proposal of Novel Structure Light Emitting Devices Consisting of InN/GaN MQWs with Ultrathin InN Wells in GaN Matrix <i>A. Yoshikawa and S.-B. Che</i>	235
Recent Developments in Broadband Terahertz Spectroscopy <i>N. Karpowicz, J. Dai, X.-C. Zhang, L. Zhang and C. Zhang</i>	247
Hot-Electron Transport in Quantum-Dot Photodetectors <i>L. H. Chien, A. Sergeev, N. Vagidov and V. Mitin</i>	255
Scalable Single Photon Detector for Terahertz and Infrared Applications <i>D. H. Wu, B. R. Matis and K. Bussman</i>	265
Optical MEMS Technologies for Electrically Tunable Multi-Spectral Short-Wave Infrared Sensors and Arrays <i>J. S. Milne, J. M. Dell, A. J. Keating and L. Faraone</i>	277
Microbolometers Fabricated with Surface Micromachining with a-Si-Ge:H Thermo-Sensing Films <i>M. Moreno, A. Kosarev, A. Torres and R. Ambrosio</i>	287
Nanocrystalline Silicon Thin Film Transistors for High Performance Large Area Electronics <i>M. R. Esmacili-Rad, H. J. Lee, A. Sazonov and A. Nathan</i>	297
