

Contents

Preface.....	v
Acknowledgments.....	vii
1 Introduction.....	1
1.1 Basic Considerations.....	1
1.2 Some Specific Examples	2
2 Semiconductor Fundamentals	9
2.1 Fundamental Concepts.....	9
2.2 p-n Junctions	23
2.3 Fabrication and Material Issues	33
2.4 Power Applications.....	36
2.5 Summary	38
3 Transistor Technologies	41
3.1 Junction Field-Effect Transistors.....	42
3.2 Modulation-Doped Field-Effect Transistors.....	47
3.3 MOS Transistors	55
3.4 Bipolar Transistors.....	58
3.5 Noise	68
3.6 Summary	71
4 Optoelectronics	75
4.1 Critical Semiconductor Properties for Light Emission	75
4.2 Material Considerations	81

4.3	Light-Emitting Diodes	85
4.4	Laser Diodes	91
4.5	Detectors	106
4.6	Summary	112
5	Reliability Fundamentals	117
5.1	Reliability Requirements	118
5.2	Acceleration Mechanisms	126
5.3	Basic Failure Mechanisms	132
5.4	Analysis of Reliability Test Data	135
5.5	Summary	140
6	Compound Semiconductor Reliability	143
6.1	MESFETs and HFETs: Mature Technologies	144
6.2	GaAs Heterojunction Bipolar Transistors.....	155
6.3	SiGe Heterojunction Bipolar Transistors.....	158
6.4	Wide Bandgap Semiconductors: SiC and GaN.....	160
6.5	Summary	166
7	Optoelectronic Device Reliability.....	171
7.1	Basic Considerations.....	171
7.2	Reliability of Light-Emitting Diodes	176
7.3	Laser Diode Reliability	183
7.4	VCSELs	194
7.5	Tunable and Frequency Stabilized Lasers	196
7.6	Optical Detectors	199
7.7	Summary	201
8	Radiation Environments.....	205
8.1	Particle Types	205
8.2	Radiation Environments Near the Earth	213
8.3	Energy Distributions in the Earth's Trapped Belts	215
8.4	Radiation Environment in a Geosynchronous Orbit	217
8.5	Protons from Solar Flares	218
8.6	Galactic Cosmic Rays	223
8.7	Heavy Particles in Solar Flares	225

8.8	Terrestrial Environments	229
8.9	Summary	232
9	Interactions of Radiation with Semiconductors	235
9.1	Fundamental Interactions.....	235
9.2	Effects of Damage on Semiconductor Properties	246
9.3	Radiation Effects in Heterostructures	253
9.4	Energy Dependence of Displacement Damage.....	254
9.5	Summary	259
10	Displacement Damage in Compound Semiconductors.....	263
10.1	JFETs	265
10.2	HFETs.....	266
10.3	Advanced Bipolar Transistors.....	269
10.4	Wide-Bandgap Devices	273
10.5	Summary	279
11	Displacement Damage in Optoelectronic Devices.....	283
11.1	Light-Emitting Diodes with Amphoteric Doping.....	284
11.2	Heterojunction LEDs	292
11.3	Edge-Emitting Laser Diodes.....	296
11.4	VCSELs	303
11.5	Photodetectors.....	305
11.6	Summary	307
12	Radiation Damage in Optocouplers	311
12.1	Introduction.....	311
12.2	Damage in Basic Phototransistor Optocouplers.....	313
12.3	Optocouplers with High-Speed Internal Amplifiers	324
12.4	Optocouplers with MOSFET Output Stages.....	327
12.5	Summary	330
13	Effects from Single Particles.....	333
13.1	Basic Concepts.....	334
13.2	Single-Event Upset in Logic Devices	339
13.3	Optocouplers.....	343

13.4 Optical Receivers 348
13.5 Single-Event Upset Effects from Neutrons..... 351
13.6 Permanent Damage from Particle-Induced Transients 352
13.7 Summary 355

Index 357
