<i>Preface</i>	vii
1. Introduction	1
2. Basic Stochastic Ostrowski Inequalities	3
2.1 Introduction	3
2.2 One Dimensional Results	4
2.3 Multidimensional Results	7
2.4 Applications	10
2.5 Addendum	12
3. Multidimensional Montgomery Identities and Ostrowski type Inequalities	15
3.1 Introduction	15
3.2 Results	16
3.3 Application to Probability Theory	29
4. General Probabilistic Inequalities	31
4.1 Introduction	31
4.2 Make Applications	31
4.3 Remarks on an Inequality	35
4.4 $L_q, q > 1$, Related Theory	36
5. About Grothendieck Inequalities	39
5.1 Introduction	39
5.2 Main Results	40
6. Basic Optimal Estimation of Csiszar's f -Divergence	45
6.1 Background	45
6.2 Main Results	46

7.	Approximations via Representations of Csiszar's f -Divergence	55
7.1	Background	55
7.2	All Results	56
8.	Sharp High Degree Estimation of Csiszar's f -Divergence	73
8.1	Background	73
8.2	Results Based on Taylor's Formula	74
8.3	Results Based on Generalized Taylor–Widder Formula	84
8.4	Results Based on an Alternative Expansion Formula	92
9.	Csiszar's f -Divergence as a Measure of Dependence	101
9.1	Background	101
9.2	Results	102
10.	Optimal Estimation of Discrete Csiszar f -Divergence	117
10.1	Background	117
10.2	Results	119
11.	About a General Discrete Measure of Dependence	135
11.1	Background	135
11.2	Results	137
12.	Hölder-Like Csiszar's f -Divergence Inequalities	155
12.1	Background	155
12.2	Results	156
13.	Csiszar's Discrimination and Ostrowski Inequalities via Euler-type and Fink Identities	161
13.1	Background	161
13.2	Main Results	164
14.	Taylor-Widder Representations and Grüss, Means, Ostrowski and Csiszar's Inequalities	173
14.1	Introduction	173
14.2	Background	174
14.3	Main Results	176
15.	Representations of Functions and Csiszar's f -Divergence	193
15.1	Introduction	193
15.2	Main Results	194

16.	About General Moment Theory	215
16.1	The Standard Moment Problem	215
16.2	The Convex Moment Problem	220
16.3	Infinite Many Conditions Moment Problem	224
16.4	Applications – Discussion	226
17.	Extreme Bounds on the Average of a Rounded off Observation under a Moment Condition	227
17.1	Preliminaries	227
17.2	Results	228
18.	Moment Theory of Random Rounding Rules Subject to One Moment Condition	239
18.1	Preliminaries	239
18.2	Bounds for Random Rounding Rules	240
18.3	Comparison of Bounds for Random and Deterministic Rounding Rules	244
19.	Moment Theory on Random Rounding Rules Using Two Moment Conditions	249
19.1	Preliminaries	249
19.2	Results	251
19.3	Proofs	257
20.	Prokhorov Radius Around Zero Using Three Moment Constraints	263
20.1	Introduction and Main Result	263
20.2	Auxiliary Moment Problem	265
20.3	Proof of Theorem 20.1.	267
20.4	Concluding Remarks	268
21.	Precise Rates of Prokhorov Convergence Using Three Moment Conditions	269
21.1	Main Result	269
21.2	Outline of Proof	273
22.	On Prokhorov Convergence of Probability Measures to the Unit under Three Moments	277
22.1	Main Result	277
22.2	An Auxiliary Moment Problem	282
22.3	Further Auxiliary Results	288
22.4	Minimizing Solutions in Boxes	291

22.5	Conclusions	296
23.	Geometric Moment Methods Applied to Optimal Portfolio Management	301
23.1	Introduction	301
23.2	Preliminaries	302
23.3	Main Results	305
24.	Discrepancies Between General Integral Means	331
24.1	Introduction	331
24.2	Results	331
25.	Grüss Type Inequalities Using the Stieltjes Integral	345
25.1	Motivation	345
25.2	Main Results	345
25.3	Applications	352
26.	Chebyshev-Grüss Type and Difference of Integral Means Inequalities Using the Stieltjes Integral	355
26.1	Background	355
26.2	Main Results	356
26.3	Applications	368
27.	An Expansion Formula	373
27.1	Results	373
27.2	Applications	377
28.	Integration by Parts on the Multidimensional Domain	379
28.1	Results	379
	<i>Bibliography</i>	395
	<i>List of Symbols</i>	413
	<i>Index</i>	415
