

CONTENTS

Preface	v
Adsorption of cyclopentene on GaAs(001) and InP(001), a comparative study by synchrotron-based core level spectroscopy <i>R. Passmann, T. Bruhn, B.O. Fimland, W. Richter, M. Kneissl, N. Esser, P. Vogt</i>	1
Time resolved energy dispersive X-ray reflectometry as a tool for material science studies: The case of organic solar cells <i>B. Paci, A. Generosi, V. Rossi Albertini, P. Perfetti, R. De Bettignies, C. Sentein</i>	12
Novel oxidation process on chiral silicon nanowires <i>P. De Padova, B. Aufray, G. Le Lay, C. Quaresima, P. Perfetti, B. Olivieri</i>	24
From Bequerel to nanotechnology <i>G. Margaritondo</i>	34
High-resolved fluorescence imaging of X-ray micro-radiographics on novel LiF detectors <i>F. Bonfigli, S. Almaviva, G. Baldacchini, F. Flora, A. Lai, R.M. Montereali, M.A. Vincenti, A. Cricenti, C. Oliva, A. Ustione, A. Faenov, T. Pikuz, L. Reale, P. Gaudio, S. Martellucci, M. Richetta</i>	40
Growth mechanisms of tin oxide and zinc oxide nanostructures from vapour phase <i>L. Zanotti, M. Zha, D. Calestani, R. Mosca, A. Zappettini</i>	48
Broken-symmetry states at surfaces: The (tr)ARPES view <i>L. Perfetti, M. Grioni</i>	56

Nanostructuring through laser manipulation <i>F. Tantussi, N. Porffido, F. Prescimone, F. Fuso, E. Arimondo, M. Allegrini</i>	68
Localization and diffusive processes in the electronic transport in quasi one-dimensional nanostructures <i>F. Flores, B. Biel, P. Sundqvist, F.J. Garcia-Vidal</i>	76
Optical and electron energy loss spectra of liquid water: An <i>ab-initio</i> study <i>O. Pulci, V. Garbuio, R. Del Sole</i>	90
Electronic confinement of silver nanocluster in Er ³⁺ -activate silicate and phosphate glasses <i>L. Minati, G. Speranza, A. Chiappini, A. Chiasera, M. Ferrari, S. Berneschi, S. Pelli, G.C. Righini</i>	102
Dynamics at metal/semiconductor interfaces and exotic phenomena through the looking glass <i>G. Le Lay</i>	110
Supramolecular interaction of chiral molecules at the surface <i>G. Contini, N. Zema, P. Gori, A. Palma, F. Ronci, S. Colonna, S. Turchini, D. Catone, A. Cricenti, T. Prospero</i>	115
Microradiology imaging of the biodistribution of polyethylene glycol (PEG) modified gold nanoparticles in cancer bearing mice <i>C.-C. Chien, C.-J. Liu, H.-S. Chen, C.-H. Wang, S.-T. Chen, W.-H. Leng, Y. Hwu</i>	132
The Frascati experiment <i>G. Faraci</i>	147
AFM and SNOM techniques at ISM: An overview <i>M. Girasole, G. Longo, G. Pompeo, A. Cricenti</i>	155

α -Sn/Ge(111) and α -Sn/Si(111) surfaces studied by STM measurements and <i>ab-initio</i> calculations <i>S. Colonna, A. Cricenti, P. Gori, F. Ronci, O. Pulci, G. LeLay</i>	171
Development of Scanning Probe Microscopy Electronic Control at ISM <i>M. Luce, M. Rinaldi, R. Generosi, A. Cricenti</i>	197
Nanostructures induced by the absorption of Fullerenes: Structural and electronic properties <i>R. Felici, M. Pedio</i>	209
