

CONTENTS

Foreword

Keynotes

- K1. Beach Erosion Arising from Anthropogenic Factors** 3
Takaaki Uda
- K2. How Do Bedforms Respond to Changing Conditions? A Study Using Abstracted Models** 21
David Huntley and Giovanni Coco
- K3. Nearshore Remote Sensing** 37
Rob Holman

Papers (The title and authors of 142 full papers are listed with two page abstracts by the order of the Paper Number. Full papers are in the CD-ROM.)

1. **Real-Time Wave Prediction Using Hourly Analyzed Atmospheric GPV**
Tracey H. Tom, Hajime Mase and Tomohiro Yasuda
2. **Multiscale Simulations Using Unstructured Mesh SWAN Model for Wave Hindcasting in the Dutch Wadden Sea**
Marcel Zijlema
3. **A Distributed Collinear Triad Approximation in SWAN**
N. Booij, L.H. Holthuijsen and M.P. B nit
4. **Improved MPS Methods for Wave Impact Calculations**
Abbas Khayyer and Hitoshi Gotoh
5. **3D-CMPS Method for Improvement of Water Surface Tracking in Breaking Waves**
Hitoshi Gotoh, Abbas Khayyer, Hiroyuki Ikari and Chiemi Hori
6. **SPH Method for Simulation of Wave Breaking with Experimental Validation**
Zhigang Bai and Jinjing Zhao
7. **Using a Particle Hybrid Method to Model Coastal Bluff Collapse during Extreme Events**
Johan Vandamme, Qingping Zou, Dominic Reeve and Shan Zou
8. **Bound Wave Release Induced by Short Wave Breaking – True or False?**
Tom E. Baldock
9. **Mechanisms of Formation and Dynamics of Secondary Waves in Coastal Zone**
Sergey Kuznetsov and Yana Saprykina
10. **Resonant Evolution of Long Period Waves by Periodically Fluctuating Wind Velocity**
Takashi Izumiya, Satoshi Watanabe and Kunihiko Ishibashi

11. **Analytical Description of Transient Long Waves like Storm Surges, Tsunami and Surf Beat**
Peter Nielsen
12. **Modeling of Waves & Currents around Porous Submerged Breakwaters**
Roshan Suminda Ranasinghe, Shinji Sato and Yoshimitsu Tajima
13. **A Model of Wave and Current Fields around Coastal Structures**
Pham Thanh Nam and Magnus Larson
14. **Artificial Neural Network Modelling of Wave-Induced Current over Submerged Breakwaters**
Mojtaba Tajziehchi and Amir Sharif-Ahmadian
15. **Model-Data Comparisons of Wave Shape Changes over Low-Crested Breakwaters**
Zhong Peng and Qingping Zou
16. **Failure Mode against Impact and Solitary Waves of Armoured Caisson Breakwaters Protected by a Partially Failed Armour Layer**
Miguel Esteban, Hiroshi Takagi and Tomoya Shibayama
17. **Interaction Model of Moored Buoy and Breaking Wave Based on Lagrangian Particle Method**
Hiroyuki Ikari and Hitoshi Gotoh
18. **Investigation of the Influence of a Low-Tide Terrace on Wave Loads Using the Boussinesq-Type Model Triton**
Sofia Caires and Marcel R.A. van Gent
19. **Numerical Analysis of Harbor Oscillation in Harbors of Various Shapes**
Taro Kakinuma, Taishi Toyofuku and Taisuke Inoue
20. **Uncertainty of Numerical Simulations on Storm Surges by Use of Best Track Data of Tropical Cyclone**
Hisamichi Nobuoka
21. **Storm Surge Hindcast in Tosa Bay of Japan Using a Coupled Model of Surge, Wave and Tide**
Soo Youl Kim, Tomohiro Yasuda, Hajime Mase and Yoshiharu Matsumi
22. **Effects of Wave Radiation Stress and Vertical Mixing on Storm Surge**
Nobuhito Mori, Rie Takada, Tomohiro Yasuda, Hajime Mase and Soo Youl Kim
23. **Effects of Ocean Environments upon Storm Surge around Korean Peninsula**
Young Hyun Park and Kyung-Duck Suh
24. **Alongshore Variation in Nonlinearities in Swash Hydrodynamics over Beach Cusps**
K.R. Bryan and Giovanni Coco
25. **Bed-Shear Stress in Bore-Generated Swash on Steep Beaches**
Gustaaf Kikkert, Dubravka Pokrajac and Tom O'Donoghue
26. **Waves In and Just Outside the Swash Zone during a Storm**
Masaru Mizuguchi

27. **Field Measurements of Net Sediment Flux from Individual Swashes on a Sandy Beach**
Chris E. Blenkinsopp, Ian L. Turner, Gerd Masselink and Paul E. Russel
28. **Dynamic Changes of Waves and Currents over the Collapsing Sandbar of the Tenryu River Mouth Observed during Typhoon T0704**
Yoshimitsu Tajima, Haijiang Liu and Shinji Sato
29. **Process-Based Modeling for the Yangtze Estuary**
A. Chu, Z.B. Wang and H.J. de Vriend
30. **Seasonal Variation of Residual Currents in the Meghna Estuary of Bangladesh**
Mohammad Asad Hussain, Mohammed Abed Hossain and Anisul Haque
31. **Modeling of Long-Term Time Series of Wave and Wind - Case Study at Joetsu Coast –**
Hajime Mase, Tomohiro Yasuda and Nobuhito Mori
32. **Experimental Study of Sediment Transport caused by Tsunami**
Takumi Yoshii, Masaaki Ikeno and Masafumi Matsuyama
33. **Real-Time Tsunami Prediction Employing Offshore Observed Data**
Tomohiro Yasuda, Tomotsuka Takayama and Hajime Mase
34. **Modeling Time-Varying Tsunami Sediment Deposition**
Alex Apotsos, Bruce Jaffe, Guy Gelfenbaum and Edwin Elias
35. **A Study for the Sediment Transport by the 2004 Indian Ocean Tsunami along the Natural Coast of Hambantota, Sri-Lanka**
Takeshi Nishihata, Kazuhisa Goto, Yoshimitsu Tajima, Tomoyuki Takahashi and Fumihiko Imamura
36. **A Mechanism Inhibiting Rip Channel Formation for Oblique Waves**
Roland Garnier, Nick Dodd, Albert Falqués and Daniel Calvete
37. **3D Computations of Wave-Driven Longshore Currents in the Surf Zone**
Roald B. Treffers, Jebbe J. van der Werf, Maarten van Ormondt and Dirk-Jan Walstra
38. **Littoral Drift Behavior around a Small Island Port**
Takayuki Sasaki, Kentaro Hayashi, Akihiro Yamamoto, Hiroyuki Bessyo, Akira Kawamori and Hideo Kondo
39. **Prediction of Development of Sand Body and Movement of Fine Sand Offshore of Detached Breakwaters**
Masaya Fukuhama, Takaaki Uda, Koji Yamada, Masumi Serizawa, Toshiro San-nami and Toshinori Ishikawa
40. **Modeling of Flow through a Vertical Perforated Pipe in the Beach, and the Morphodynamic Interpretation: The Pressure Equalization Module System**
Jørgen Fredsøe, Peter Engesgaard and Per Sørensen
41. **Examination of Efficacy of Submerged Groin System against Beach Erosion through Numerical Simulation**
Yoshimi Goda, Nobuyuki Ono and Yoshiyuki Uno

42. **Physical Environment Change of Long Sandy Beach by Headland System for Erosion Control**
Akio Okayasu and Takashi Nemoto
43. **Numerical Modeling of Hydrodynamics on a Salt Marsh**
Tomohiro Suzuki, Taro Arikawa and Marcel J.F. Stive
44. **Numerical Examination on Countermeasure against Wave Overtopping Disaster around Road Revetment using Two-Dimensional Numerical Wave Flume based on VOF Method**
Koji Kawasaki and Masami Kiku
46. **Wave Amplification and Air-Gap Response under a Multi-Column Platform**
Jing Li, Soon Keat Tan, Zhenhua Huang and Adi Kurniawan
47. **Research and Development of Flap Gate-Type Wave Breaker for Protection against Tsunami and Storm Surge**
Hideyuki Niizato, Yuichiro Kimura, Kyouichi Nakayasu, Takashi Fujita and Osamu Kiyomiya
48. **Tsunami Flow Velocity behind the Coastal Forest with an Open Gap– Effects of Tsunami and Tree Condition**
Nguyen Ba Thuy, Norio Tanaka, Katsutoshi Tanimoto, Kenji Harada and Kosuke Imura
49. **Direct Bed Stress Measurements under Solitary Tsunami-Type Waves and Breaking Tsunami Wave Fronts**
Jaya Kumar Seelam and Tom E. Baldock
50. **Numerical Model for Bar Migration at Hasaki, Japan**
Yoshiaki Kuriyama
51. **Conceptual Modelling of a Double Crescentic Barred Coast (Leucate Beach, France)**
Pierre Ferrer, Raphael Certain, Jean-Paul Barousseau and Mathieu Gervais
52. **Models and Scales for Nearshore Sandbar Behavior**
Leo Pape, Gerben Ruessink and Yoshiaki Kuriyama
53. **The Use of Linear Stability Analysis to Characterize the Variability of Multiple Sandbar Systems**
Giovanni Coco and Daniel Calvete
54. **Process-Based Modeling of Cyclic Bar Behavior on Yearly Scales**
Dirk-Jan Walstra and Gerben Ruessink
55. **The Role of Surface Rollers on the Formation of Surfzone Transverse Sand Bars**
Francesca Ribas, H.E. de Swart, Daniel Calvete and Albert Falqués
56. **Modelling Transitions Between Barred Beach States on a Straight Coast**
Darrell Strauss and Rodger Tomlinson
57. **Longshore Sediment Movement along the Enshunada Coast Inferred from Feldspar Thermoluminescence**
Haijiang Liu, Yuuki Ogawa, Tomohiro Takagawa and Shinji Sato

58. **Optically Stimulated Luminescence Dating of a Sandy Tidal Flat in the Danish Wadden Sea – Towards Establishing a Sediment Budget**
Anni T. Madsen
59. **Field Investigation of Strategic Borrow Sites off the Mediterranean Coast of Spain**
Luis Moreno, Ana Garcia Fletcher and G. Díez
60. **Combining Geological and Numerical Models to Assess Sand Resources on the Inner Continental Shelf of Northeast Florida**
Gary A. Zarillo
61. **One-Line Model Using the Combination of Polar and Cartesian Coordinates for Crenulate Shaped Bay**
Thamnoon Rasmeemasuang and Sutat Weesakul
62. **A Beach Profile Change Model including Three Transport Processes**
Shingo Sasaoka, Kenji Noguchi, Yoshio Suwa, Hidetaka Kobayashi,
Akira Watanabe and Toshimitsu Takagi
63. **Beach Profile Modeling at Different Scales**
Pieter Koen Tonnon, Claartje Hoyng and Leo van Rijn
64. **A Predictive Model for Beach Profile Evolution**
Bradley Johnson, Mark Gravens, Ty Wamsley and Nobuhisa Kobayashi
65. **A Model for Predicting Medium to Long Term Morphodynamic Response of Estuaries**
Harshinie Karunarathna, Dominic E. Reeve and Mark Spivack
66. **Modelling of Sediment Transport at Exe Estuary, Devon, UK**
Shunqi Pan, Yongping Chen, Yanliang Du, Sam Reed and Judith Wolf
67. **Sediment Movement Under Combined Waves, Tide and River Discharge in a River Mouth**
Xiaojing Niu, Satoshi Ueyama, Shinji Sato, Yoshimitsu Tajima and
Haijiang Liu
68. **Modeling Processes Controlling Sediment Transport at the Mouth of the Columbia River**
Edwin Elias and Guy Gelfenbaum
69. **Anthropogenic Reduction of the Natural Supply of Sediments to the Coasts of Washington, Oregon, and California**
Orville T. Magoon and Donald D. Treadwell
70. **Shoreline Rotation on Pocket Beaches caused by Anthropogenic Factors**
Takaaki Uda, Mitsuo Takamura, Kazuo Fujimoto, Fumihito Nakanishi,
Shinji Iki and Toshinori Ishikawa
71. **Comprehensive Management of Sand Considering Grain Size on Shonan Coast**
Toshinori Ishikawa, Takaaki Uda, Toshiro San-nami, Genji Aoshima and
Atsushi Yoshioka
72. **Coastal Erosion due to Anthropogenic Impacts on Sediment Transport in Douro River – Portugal**
Carlos Coelho, Tony Conceição and Bruno Ribeiro

- 73. Profile Equilibration and Longshore Spreading associated with Beach Nourishment: A Case Study along West-Central Florida Coast**
Ping Wang, Nicole A. Elko and Tiffany M. Roberts
- 74. Physical Performance of Beach Nourishment Projects along a Microtidal Low-Energy Coast, West-Central Florida, USA**
Tiffany M. Roberts, Ping Wang and Nicole A. Elko
- 75. Theory and Field Test of Beach Nourishment Using Coarse Sand and Gravel**
Takayuki Kumada, Takaaki Uda and Toshinori Ishikawa
- 76. Experimental Flume Simulation of Shoreface Nourishments under Storm Conditions**
Florent Grasso, Hervé Michallet and Eric Barthélemy
- 77. On the Role of Impulsive Pressures induced by Plunging Breakers acting on Gravel Beaches**
Adrián Pedrozo-Acuña, Alec Torres-Freyermuth, Qingping Zou, Tian-Jian Hsu and Dominic E. Reeve
- 78. Storm Response and Beach Rotation on a Gravel Beach**
Amaia Ruiz de Alegria-Arzaburu, Gerhard Masselink and Jon Williams
- 80. Effects of Groundwater Table on Wave Breaking in a Gravel Beach**
Kwang-Ho Lee, Norimi Mizutani and Toshiaki Fujii
- 81. Dune Erosion and Overwash**
Nobuhisa Kobayashi and Ali Farhadzadeh
- 82. MICORE: Dune Erosion and Overwash Model Validation with Data from Nine European Field Sites**
Ap van Dongeren, Annelies Bolle, Michalis I. Vousdoukas, Theocharis Plomaritis, Petya Eftimova, Jon Williams, Clara Armaroli, Deborah Idier, Pieter van Geer, Jaap van Thiel de Vries, Piet Haerens, Rui Taborda, Javier Benavente, Ekaterina Trifonova, Paolo Ciavola, Yann Balouin and Dano Roelvink
- 83. Washover Development on Mixed-Energy, Mesotidal Barrier Island Systems**
Piet Hoekstra, Miriam ten Haaf, Pieter Buijs, Albert Oost, Ralf Klein Breteler, Kevin van der Giessen and Maarten van der Vegt
- 84. Measurements on the Interaction between Dunes and Dikes during Extreme Storm Events**
Pieter van Geer, Marien Boers and Marcel van Gent
- 85. Historical Morphological Development of the Eastern Scheldt Tidal Basin (The Netherlands)**
M. Eelkema, Z.B. Wang and M.J.F. Stive
- 86. Forecasting and Uncertainty Estimation of Nearshore Bathymetric Evolution over Annual Timescales**
Jose M. Horrillo-Caraballo, Vanesa Magar and Dominic E. Reeve
- 87. Interactions between Sandbanks – The Great Yarmouth Banks, UK**
Karen Thurston, Chris Vincent and Tony Dolphin

- 88. Sediment Transport Module for a B-Grid Coastal Shelf Ocean Model**
Laurent O. Amoudry, Alejandro J. Souza and Jason T. Holt
- 89. Modeling the Effect of Wave Shape on Sediment Transport**
Tom J.J. van den Berg, B.G. Ruessink and Leo C. van Rijn
- 90. Numerical Simulation for Vertical Sorting of Graded Particles in Sheetflow by Two-Phase Turbulent Flow Model**
Eiji Harada and Hitoshi Gotoh
- 91. The Role of the Depth-averaged Concentration in Coastal Morphodynamics**
Daniel Calvete, Albert Falqués, Huib E. de Swart, Nicholas Dodd, Francesca Ribas and Roland Garnier
- 92. A Sedimentation Process of a Group of Blocks by DNS**
Eiji Harada, Hitoshi Gotoh and Naoki Tsuruta
- 93. Numerical Simulation of Rapid Erosion of Seisho Coast Triggered by Storm Waves during Typhoon 0709**
Masumi Serizawa, Takaaki Uda, Kenji Suzuki, Shogo Maruyama, Hiroyuki Takano, Toshiro San-nami and Toshinori Ishikawa
- 94. Hydro- and Sediment- Dynamics in the German Bight: A Focus on Observations and Numerical Modelling**
Joanna Staneva
- 95. Numerical Calculation of the Sediment Transports along the Lagoonal Coast on Majuro Atoll**
Daisaku Sato and Hiromune Yokoki
- 96. Empirical Relationships between Inlet Cross-Section and Tidal Prism: A Review**
Marcel J.F. Stive, J. van de Kreeke, Nghiem T. Lam, Tran T. Tung and Roshanka Ranasinghe
- 97. Seasonal Closure of Chilaw Inlet, Sri Lanka: Physical Processes and Mathematical Modeling**
Magnus Larson, Nalin Wikramanayake, Hans Hanson and Roshanka Ranasinghe
- 98. Influences of Channel Dredging on Flow and Sedimentation Patterns at Microtidal Inlets, West-Central Florida, USA**
Tanya M. Beck and Ping Wang
- 100. A Two-Dimensional Horizontal Model for Propagation of Irregular Waves over Fluid Mud Seabed**
Ali Oveysy and Kevin Hall
- 102. Dynamic Thermal Response of Urban Heat Release into Coastal Area - Heat Island Reduction in Osaka Region, Japan**
Nobuhito Mori, Yasuaki Sachi, Takaaki Shigematsu and Masaki Nakao
- 103. Temporal and Spatial Variations of a Hypoxic Water Mass in Tokyo Bay, Japan**
Hiroshi Yagi, Tanuspong Pokavanich, Susumu Yasui, Kazuo Nadaoka, Yasuyuki Nakagawa, Ryuichi Ariji, Shoichi Matsuzaka, Nobuaki Suzuki and Kazunobu Morohoshi

- 104. Pollutant Dispersion around the Perimeter of a Coastal Headland**
Fu Ee Tang
- 105. Sediment Dynamics in the Bay of Marseille**
Michalis I. Vousdoukas, Romaric Verney, Francois Dufois, Christel Pinazo,
Didier Sauzade, Samuel Meule and Philippe Cann
- 106. Novel Methodology for One Line Model Calibration using Impoundment on Mixed Beach**
Inés Martín-Grandes, Jason Hughes, David J. Simmonds,
Andrew J. Chadwick and Dominic E. Reeve
- 107. A Two-Dimensional Spatial Statistical Model for Morphodynamic Seabed Modelling and Prediction**
Anna Bakare, Serge Guillas, Jeremy Morley and Richard Simons
- 108. Spatially-Varying Morphodynamics over a Shore-Parallel Transgressive Shoal, South-Central Louisiana, U.S.A.**
Daijiro Kobashi and Gregory W. Stone
- 109. Modeling Sediment Transport and Delta Morphology on the Dammed Elwha River, Washington State, USA**
Guy Gelfenbaum, Andrew Stevens, Edwin Elias and Jonathan Warrick
- 110. Experimental Study of Transformations of Irregular Waves in Coastal Zone**
Yana Saprykina and Sergey Kuznetsov
- 111. Spray Size Distributions at Flip-Through Wave Overtopping**
Yasunori Watanabe and Sin-ichiro Ishizaki
- 112. Sprays and Finger Jets Evolving from Splashing Jets**
Ayumi Saruwatari and Yasunori Watanabe
- 113. Comparison between Analytical Water Wave Theories and Measurements Made in Mexican Ports**
Guillermo Cardoso-Landa
- 114. Remote Sensing of Swash Zone Boundary Conditions using Video and ARGUS**
Hannah E. Power, Meg Palmsten, Rob A. Holman and Tom E. Baldock
- 115. Observation of Nearshore Processes using Network Camera**
Kojiro Suzuki and Shinichi Yanagishima
- 116. Observation of Morphology and Flow Motion at the River Mouth of Tenryu with X-Band Radar**
Satoshi Takewaka, Yu Takahashi, Yoshimitsu Tajima and Shinji Sato
- 117. Shoreline Identification using Satellite Images**
Gabriela García-Rubio, David Huntley, Kenneth Kingston and
Luciana Esteves
- 118. Preliminary Application of the HHT to Analyze the Characteristics of Nonlinear Wave Decay over a Fluidized Bed**
Yung-Lung Chen, Shiaw-Yih Tzang and Shan-Hwei Ou

- 119. Measuring Suspended Sediment and Its Wave and Turbulence Forcing in the Dee Estuary**
Rodolfo Bolanos, Benjamin D. Moate and Alejandro Souza
- 120. Oscillatory Turbulent Flow inside and around Porous Media**
Sota Nakajo, Takaaki Shigematsu, Naoya Sakashita, Gozo Tsujimoto and Kosei Takehara
- 121. The Characteristics of Wind-Blown Sand in the Nakatajima Dune**
Junaidi, Shin-ichi Aoki, Shigeru Kato and Naoto Wakae
- 122. A Large-Scale Laboratory Experiment of Rip Current Circulations over a Moveable Bed: Drifter Measurements**
Bruno Castelle, Hervé Michallet, Vincent Marieu, Fabien Leckler, Benjamin Dubardier, Adrien Lambert, Céline Berni, Eric Barthélemy, Frédéric Bouchette, Philippe Bonneton, Olivier Kimmoun, Damien Sous and Rafael Almar
- 123. Sand Transport under Full-Scale Surface Waves**
Jolanthe J.L.M. Schretlen, Jan S. Ribberink and Tom O'Donoghue
- 125. Suspended Sediment Fluxes in the Inner Surf and Swash Zones - Large Scale Data under Erosive Wave Conditions**
José M Alsina, Agustín Sánchez-Arcilla and Iván Cáceres
- 126. Degree of Experience for Extreme Wave Statistics**
Toshikazu Kitano, Wataru Kioka and Rinya Takahashi
- 127. Wave-Induced Morphodynamic Risks - Characterization of Extremes**
Agustín Sánchez-Arcilla, José A. Jiménez and Carlos Peña
- 128. Foreshore Erosion of Kashima Coast by 2006 Autumn Storms and Its Alongshore Dynamics**
Elsayed M. Galal and Satoshi Takewaka
- 129. Field Survey of Storm Surge Disaster due to Cyclone SIDR in Bangladesh**
Tomoya Shibayama, Yoshimitu Tajima, Taro Kakinuma, Hisamichi Nobuoka, Tomohiro Yasuda, Raquib Ahsan, Mizanur Rahman and M. Shariful Islam
- 130. A French Project to Understand and Predict the Short-Term Dynamics of Sandy Coast: ECORS**
Thierry Garlan and Fabrice Ardhuin
- 131. Acoustical Observations of Velocity and Suspended Sediment Structures due to Oscillatory Flow over a Rippled Bed**
Peter D. Thorne and David Hurther
- 132. Bedload Sediment Transport Budget Using CT-Scanning**
Stephane Montreuil and Bernard Long
- 133. Sheet Flow Sand Transport Processes in Oscillatory Flow with Acceleration Skewness**
Dominic A. van der A, Tom O'Donoghue and Jan S. Ribberink
- 134. A Process Based Approach to Derive Probabilistic Estimates of Coastal Recession due to Sea Level Rise**
Roshanka Ranasinghe, David Callaghan and Marcel, J.F. Stive

- 135. Impact of Global Climate Change on Wave Climate**
Nobuhito Mori, Ryota Iwashima, Tomohiro Yasuda, Hajime Mase,
Tracey Tom and Yuichiro Oku
- 136. Influences of Global Climate on Peak Wave Height in the Typhoon Season**
Hajime Tanji and Hirohide Kiri
- 137. Formation and Long-Term Evolution of Beach Cusps with Tracking Particle Movement**
Anurak Sriariyawat and Nicholas Dodd
- 138. Morphology and Stratigraphy of a Degrading Delta**
M.M. Hillen, N. Geleynse, J.E.A. Storms, D.J.R. Walstra and M.J.F. Stive
- 139. Long-Term Observations of Flow and Suspended Sediment in a Tidally-Dominated Estuary**
Mahdi Razaz and Kiyoshi Kawanishi
- 140. Migration of Multiple Sandbars on Chirihama Beach, Japan**
Kazuhiro Hayakawa, Masatoshi Yuhi and Hajime Ishida
- 141. Flow and Turbulence around an Offshore Wind Turbine Pile in Tidal Currents using Particle Image Velocimetry**
David McGovern, Suzana Ilic, Andrew Folkard, Stuart McClelland and
Brendan Murphy
- 142. Application of Digital Image Process on Observing the Motions of Wave and a series of Poro-Elastic Submerged Breakwaters**
Jian-Wu Lai, Yuan-Jyh Lan, Tai-Wen Hsu, Chia-Huan Ting and
Chen-Chen Chang
- 143. PIV Measurements of a Turbulent Round Jet in Wave Environment**
Shih-Chun Hsiao, Tai-Wen Hsu, Jian-Feng Lin and Kuang-An Chang
- 144. DCIV Derived Flow Fields for Waves Breaking over a Bar**
K. Govender, H. Michallet, M.J. Alport, G.P. Mocke and M. Mory
- 145. Improving Bypass and Increasing Navigation Depth: A Vision for Hvide Sande Harbour, Denmark**
Nicholas Grunnet, Ida Brøker, Erik Clausen and Per Sørensen
- 146. Hydrodynamic Response of a Transgressive Shoal to the Proposed Mining for Restoring Adjacent Beaches and Barriers: Sabine Bank, Off Louisiana-Texas Coast, United States**
Felix Jose, Gregory W. Stone, Daijiro Kobashi, Seyed M. Siadatmousavi and
Baozhu Liu
- 147. Modeling Morphologic Responses to Proposed Engineering Modifications at Sebastian Inlet, FL**
Florian G. Brehin and Gary A. Zarillo
