Preface	vii	
List of Tables and Figures	xvii	
Part I Introduction to Information Technology Investment Decision-Making Methodology		
Chapter 1 Introduction to Information Technology Investment		
Decision-Making	3	
Introduction	4	
Types of IT Investment Decision-Making Problems	5	
What are IT Investment and Decision-Making Methodologies?	8	
Limitations of Methodologies	10	
Why Study IT Investment and Decision-Making Methodologies?	13	
Organizational Strategic Planning in IT Investment Decision	14	
How This Book is Organized to Help You Learn	21	
Summary	24	
Chapter 2 Needs Analysis and Alternative Information Technology Investment Strategies		29
Introduction	30	
What is Needs Analysis?	32	
Determining IT Processing Capacities and Specifications	35	
Alternative IT Investment Strategies	40	
What is IT Outsourcing?	42	
An IT outsourcing strategy	45	
Final comment on IT outsourcing	47	
Summary	47	

Chapter 3 Measuring Information Technology Investment

Performance	53
Introduction	54
The Economics of Information	54
Examples of economic theories of information	55
Why Measure IT Performance?	57
Measures of IT Business Value	59
Financial Performance Measures of IT	60
Business performance measures of IT	62
Strategic performance measures of IT	64
Costs of IT	65
Measures of IT effectiveness value	66
Measures of IT efficiency value	73
Summary	75

Part II Financial Information Technology Investment Methods**Chapter 4 Basic Financial Methods**

Chapter 4 Basic Financial Methods	83
Introduction	84
What are the Basic Financial Methods?	84
What is Breakeven Analysis?	86
A statistical approach to non-quantifiable benefits	89
What is Payback Period Methodology?	90
What is Accounting Rate of Return Methodology?	95
Summary	99

Chapter 5 Other Financial Methodologies

Chapter 5 Other Financial Methodologies	109
Introduction	110
What Types of Methodologies Support IT Investment	
Decision-Making?	110
Financial techniques for IT investment	
decision-making	111
Operations research/management science techniques	
for IT investment decision-making	112
Techniques specifically designed for IT investment	
decision-making	114
Other techniques for IT investment decision-making	119
What is Present Value Analysis Methodology?	121
Net present value analysis methodology	123
Computer-based solutions	126
Unequal investment sizes	126
Unequal investment lives	127

What is Return on Investment Methodology?	129
ROI strategy for enterprise resource planning systems	130
What is Internal Rate of Return?	132
Computer-based solutions	135
A word about cash flows	136
Summary	136
Chapter 6 Cost/Benefit Analysis	143
Introduction	144
What is Cost/Benefit Analysis?	144
Define problem	145
Identification and quantification of cost and benefit	146
Compare alternatives	150
Sensitivity analysis	156
What is Cost/Effectiveness Analysis?	158
Summary	158
Part III Multi-Criteria Information Technology Decision-Making Methods	
Chapter 7 Critical Success Factors, Delphi Method and the Balanced Scorecard Method	167
Introduction	168
What are Critical Success Factors?	168
What is the Delphi Method?	174
What is the Balanced Scorecard Method?	176
Balanced scorecard components	177
Illustration of the balanced scorecard method	184
Final word on balanced scorecards	187
Summary	189
Chapter 8 Multi-Factor Scoring Methods and the Analytic Hierarchy Process	193
Introduction	194
What are Multi-Factor Scoring Methods?	195
Types of multi-factor scoring methods	196
Summary of multi-factor scoring methods solution procedures	198
Sensitivity analysis of multi-factor scoring methods	199
Spreadsheet and computer solutions	201

What is the Analytic Hierarchy Process?	202
The AHP procedure	203
Summary of AHP solution procedure	225
Spreadsheet and computer solutions	225
Summary	227

Chapter 9 Decision Analysis and Multi-Objective Programming

Methods	237
Introduction	238
What is Decision Theory?	238
Decision theory problem/model elements	239
Types of decision environments	240
Decision Theory Formulation and Solution Methodologies	241
A decision theory problem/model formulation procedure	241
Decision-Making Under Certainty	245
Maximax criterion	245
Maximin criterion	245
Decision-Making Under Risk	247
Origin of probabilities	247
Expected value criterion	248
Expected opportunity loss criterion	249
Decision-Making Under Uncertainty	250
Laplace criterion	251
Maximin criterion	253
Maximax criterion	253
Hurwicz criterion	253
Minimax criterion	254
Multi-Objective Programming Methodology	255
What is Goal Programming?	257
Goal programming problem/model elements	258
Goal Programming Problem/Model Formulation	268
GP problem/model formulation procedure	268
GP problem/model formulation problems	269
Computer-based solutions for goal programming	277
Goal Programming Complications and Model Assumptions ...	282
GP complications	282
GP model assumptions	283
Summary	284

Part IV Other Information Technology Investment Methods

Chapter 10 Benchmarking Techniques and Game Theory	295
Introduction	296
What is Benchmarking?	296
A benchmarking procedure	298
A benchmarking methodology: Gap analysis	300
What is Game Theory?	303
Basic structure of game theory problem/model	304
Objectives and assumptions	306
Game theory problem/model formulation procedure	307
Solution Procedures for Game Theory Problems	310
Rational choice method: A saddle point solution	310
The minimax solution method	315
A minimax solution for a mixed strategy problem	317
A computer-based solution for a mixed strategy problem	319
Summary	321
 Chapter 11 Investment Portfolio Methodologies	 329
Introduction	330
What are Investment Portfolio Methodologies?	330
Ward's Portfolio Approach	331
Evaluating individual investments	335
Setting priorities	337
Investment Mapping Methodology	343
Mapping the investment portfolio	343
Evaluating IT investments	348
Managing benefits	351
Other Investment Portfolio Methodologies	352
Summary	353
 Chapter 12 Value Analysis and Benefit/Risk Methodologies	 357
Introduction	358
What is Value Analysis Methodology?	358
What is Benefit/Risk Analysis Methodology?	363
Summary	371
 Part V Implementing IT Decision-Making	
 Chapter 13 Research Suggestions on Implementing IT Investment Methodology	 377
Introduction	378

Organizational Impact of Information Technology	
Investment	378
Previous research on IT's impact on organizations	378
Measures of IT investment	379
Organizational impact of IT investment	381
Understanding Value and Instinct in IT Investment	
Decisions	383
Determining what's important	383
Defining value in IT investment	384
The role of intuition	386
Making the Best of IT Investment	387
IT investments: Goal and problem	387
Managerial causes	388
Strategies to solve the paradox	390
Summary	392
Chapter 14 Implementing the Outsource or Insource Decision	397
Introduction	398
What is Outsourcing?	399
Why Use Outsourcing?	399
Why Use Inourcing?	401
Strategic Planning with Outsourcing and Inourcing	402
Outsourcing Methodologies	404
Outsourcing evaluation framework	405
Cost/benefit analysis	406
Critical success factors	407
Investment portfolio methodologies	407
Other methodologies	408
Post Outsourcing Decision Considerations	409
Service level agreement	410
Summary	410
Epilogue: The Costs of Not Making the Right Information Technology Decision (and Strategies on How to Avoid Them)	415
Macro Economic View	415
Micro Economic View	417
Strategies for Making the Right IT Investment Decisions and Avoiding IT Costs	422
“So What's the Good News?”	425
Index	433
