Foreword	v
Preface	vii
Acknowledgments	xi
1. Introduction to Stochastic Simulation Optimization	1
1.1 Introduction	1
1.2 Problem Definition	7
1.3 Classification	10
1.4 Summary	13
2. Computing Budget Allocation	15
2.1 Simulation Precision versus Computing Budget	15
2.2 Computing Budget Allocation for Comparison of Multiple Designs	17
2.3 Intuitive Explanations of Optimal Computing Budget Allocation	19
2.4 Computing Budget Allocation for Large Simulation Optimization	26
2.5 Roadmap	28

3.	Selecting the Best from a Set of Alternative Designs	29
3.1	A Bayesian Framework for Simulation Output Modeling	30
3.2	Probability of Correct Selection	36
3.3	Maximizing the Probability of Correct Selection . . .	40
3.4	Minimizing the Total Simulation Cost	51
3.5	Non-Equal Simulation Costs	55
3.6	Minimizing Opportunity Cost	57
3.7	OCBA Derivation Based on Classical Model	64
4.	Numerical Implementation and Experiments	69
4.1	Numerical Testing	69
4.2	Parameter Setting and Implementation of the OCBA Procedure	88
5.	Selecting An Optimal Subset	93
5.1	Introduction and Problem Statement	94
5.2	Approximate Asymptotically Optimal Allocation Scheme	96
5.3	Numerical Experiments	106
6.	Multi-objective Optimal Computing Budget Allocation	117
6.1	Pareto Optimality	118
6.2	Multi-objective Optimal Computing Budget Allocation Problem	120
6.3	Asymptotic Allocation Rule	128
6.4	A Sequential Allocation Procedure	132
6.5	Numerical Results	133
7.	Large-Scale Simulation and Optimization	141
7.1	A General Framework of Integration of OCBA with Metaheuristics	144
7.2	Problems with Single Objective	147
7.3	Numerical Experiments	152
7.4	Multiple Objectives	156
7.5	Concluding Remarks	159

8.	Generalized OCBA Framework and Other Related Methods	161
8.1	Optimal Computing Budget Allocation for Selecting the Best by Utilizing Regression Analysis (OCBA-OSD)	164
8.2	Optimal Computing Budget Allocation for Extended Cross-Entropy Method (OCBA-CE)	167
8.3	Optimal Computing Budget Allocation for Variance Reduction in Rare-event Simulation	169
8.4	Optimal Data Collection Budget Allocation (ODCBA) for Monte Carlo DEA	171
8.5	Other Related Works	173
Appendix A: Fundamentals of Simulation		175
A.1	What is Simulation?	175
A.2	Steps in Developing A Simulation Model	176
A.3	Concepts in Simulation Model Building	178
A.4	Input Data Modeling	181
A.5	Random Number and Variables Generation	183
A.6	Output Analysis	188
A.7	Verification and Validation	192
Appendix B: Basic Probability and Statistics		195
B.1	Probability Distribution	195
B.2	Some Important Statistical Laws	199
B.3	Goodness of Fit Test	199
Appendix C: Some Proofs in Chapter 6		201
C.1	Proof of Lemma 6.1	201
C.2	Proof of Lemma 6.2	204
C.3	Proof of Lemma 6.3	204
C.4	Proof of Lemma 6.5 (Asymptotic Allocation Rules)	206

Appendix D: Some OCBA Source Codes	213
References	219
Index	225
