<b>Part I: China's Exchange Rate System Reform</b>	<b>1</b>
<b>Chapter 1 Macroeconomic Conditions and Debates Before the Reform</b>	<b>3</b>
1.1 Macroeconomic Conditions Before the Reform	3
1.1.1 The Beginning of China's Persistent Trade Surplus	3
1.1.2 The Asian Financial Crisis: The Beginning of the Peg to US Dollar	6
1.1.3 The Weakening US Dollar Since Early 2002: Reasons and Impact	8
1.1.4 Other Macroeconomic Performance Before the Reform	11
1.2 Debate Before the Reform: Risk of Various Proposals	13
<b>Chapter 2 Transitional and Medium-Term Designs of the Reform</b>	<b>17</b>
2.1 The Proposed Transitional Reform	17
2.1.1 Gradual Appreciation, No Major or Medium Jump in Exchange Rate and No Widening of Band	17
2.1.2 A Basket of Currencies with Special Care to the Exchange Rate Against the US Dollar at the Early Stage	19
2.1.3 A Narrow Exchange Rate Band at the Early Stage	20

2.2	The Proposed Medium-Term Arrangements	20
2.2.1	The Debating Process Before the Medium-Term Recommendation	20
2.2.2	The Medium-Term Recommendation	26
<b>Chapter 3</b>	<b>Supplementary Measures</b>	<b>31</b>
3.1	Prolonged Asset Inflation and Then Economic Crisis: A Major Potential Threat to China's Economic Development	31
3.2	Supplementary Measures	32
3.2.1	Banking Reform	33
3.2.2	Control of Asset Inflation	34
3.2.3	Variable Wage Component	36
3.2.4	Capital Control	38
<b>Chapter 4</b>	<b>The Transitional Reform in 2005</b>	<b>39</b>
4.1	The Reform Announced in July 2005	39
4.2	Market Response at the Early Stage	41
4.3	Two Important Characteristics That Contribute to the Initial Success	43
4.4	Proposed Measures to Deal with the Speculative Inflows	44
4.4.1	Measures That Discourage Speculative Inflows	45
4.4.2	Measures That Offset the Impacts of Speculative Inflows	46
4.5	Further Discussions on the Offsetting Measures	48
4.5.1	Importance of Maintaining Capital Control at That Time	48
4.5.2	The Moderate Speculative Inflows Was Still within the Central Bank's Sterilization Capacity	49
4.5.3	Two Other Important Sources of Inflows	49
4.5.4	Some Basic Principles to Guide the Direction of the Offsetting Measures	50
4.5.5	Ways to Build in More Controllability and Adjustability on Potential Outflows	54
4.6	More Following-Up Comments on the Offsetting Measures	60
4.6.1	Need to Scale Up the Offsetting Measures and Maintain a Trade Surplus	60

4.6.2	An Accounting Hurdle on the Recommended Sterilization	61
4.7	Actions Taken by the Chinese Government	63
4.8	The Moderate Mistake Committed by China's Central Bank Between Mid-2006 and Early 2008	65
<b>Chapter 5</b>	<b>Further Proposals on Supplementary Measures After the Transitional Reform</b>	<b>71</b>
5.1	The Potential Disaster of Developing the Renminbi Forward or Futures Market at That Time	71
5.1.1	The Chinese Central Bank's Initial Proposal to Develop the Renminbi Forward Market	71
5.1.2	The Potential Damage	72
5.1.3	The Central Bank's Decision to Freeze the Development of the Renminbi Futures Market	80
5.1.4	Hong Kong's Intention to Establish the Renminbi Futures Market	80
5.2	Further Proposals to Increase China's Immunity and Resilience Against Financial Crisis	81
5.2.1	Law to Increase Speculators' Non-Economic Risk	82
5.2.2	Development of the Renminbi Forward or Futures Market Should Be the Last Step of the Reform	84
5.3	Further Proposals on the Banking Reform	89
5.3.1	Non-Performing Loans in Chinese Banks Were Huge	90
5.3.2	The Three-Step Injections Had Strengthened the Capital Adequacy Ratio of the Chinese Banks	90
5.3.3	The Keys Would Still Be Proper Internal Control, Proper Lending Criteria and Proper Lending Behaviors	91
5.3.4	The Strategy of Inviting Foreign Strategic Participation Had Helped Avoid an Immediate Crisis	92
5.3.5	Not All the Products or Services in Foreign Banks Are Worth Importing	95
5.3.6	Why Foreign Strategic Partners Have Strong Incentives to Help Establish Internal Control within the Banks	96
5.3.7	Starting the Anti-Corruption from the Banking Industry	99

Appendix 5.1	The Speculative Attack on Hong Kong's Financial Markets in 1997–1998	101
Step 1:	Preparation	103
Step 2:	Formal Attack	105
Step 3:	Profit Taking	106
Appendix 5.2	Impacts of the Speculative Attack, the Proposed Solutions and the HKMA's Stock Market Intervention	107
A5.2.1	The Immediate Impacts of the Speculative Attack	107
A5.2.2	Source of the Problem: Interest Rate Hike and Absence of Covered Interest Arbitrage	109
A5.2.3	The HKMA's Stock Market Intervention and the Subsequent Currency Board Reform	111
A5.2.4	Which Measure Had Saved Hong Kong from the Speculative Attack: The Stock Market Intervention or the Revitalization of Covered Interest Arbitrage?	112
Appendix 5.3	Summary of Proposals to Deal With the Speculative Attack	117
<b>Chapter 6</b>	<b>The Second-Stage Transitional Reform and Potential Choices on the Long-Term System</b>	<b>123</b>
6.1	The First Following-Up Article on the Second Stage of the Transitional Reform	123
6.1.1	The Monitoring Target Should Be the NEER Instead of the Renminbi-US Dollar Rate	124
6.1.2	Complete the Reform on the NEER Before Shifting the Market Attention from the Renminbi-US Dollar Rate to the NEER	125
6.1.3	Still Need to Monitor the Renminbi-US Dollar Rate	126
6.1.4	Better to Complete the Reform on the NEER and Then Shift the Market Attention Before Any Major Nominal Swing in the US Dollar	127
6.1.5	The Appropriate Arrangement in the Subsequent Years: Add a Bit Fluctuations Along a Gradually Appreciating Path	128

6.1.6	A Possible Arrangement in the Case of Diplomatic Need	129
6.1.7	China's Choice of No Widening of Exchange Rate Band at That Time	130
6.2	The Second Following-Up Article	130
6.2.1	No More "Unanticipated" Revaluation	131
6.2.2	Alternative Ways of Making Concession to the US	132
6.2.3	China's Announcement of No More "Unanticipated" Revaluation	134
6.3	The Third Set of Policy Articles	135
6.3.1	No Speeding Up of Appreciation	135
6.3.2	Further Suggestions on the Details of the Second-Stage Reform	137
6.3.3	Proper Control on Monetary Growth Was Crucial to the Success of the Exchange Rate System Reform	141
6.4	Direction of the Reform in the Long Term	146
6.4.1	Further Discussions on the Medium-Term Exchange Rate Arrangements	146
6.4.2	Two Possible Long-Term Arrangements	147
	<b>Part II: Macroeconomic Policies, the Stock Market and the Property Market</b>	<b>151</b>
<b>Chapter 7</b>	<b>China's Foreign Reserves, Trade Surplus, Outward Investments and Overseas Assets</b>	<b>153</b>
7.1	Foreign Reserves and Holdings of Foreign Assets: Some Misconceptions and Policy Implications	153
7.2	Increasing Domestic Demand to Attain Trade Balance: A Misleading Proposal	157
7.2.1	The External Balance Curve	157
7.2.2	The Internal Balance Curve	157
7.2.3	The Swan Diagram and Its Policy Implications in 2007	159
7.3	Another Application for the Case in 2008–2009	162
7.4	Limitation of the Swan Diagram: A Static Analysis	165

<b>Chapter 8</b>	<b>China's Stock Market Bubble and Lessons from the Bubble Squeezing Strategy</b>	<b>167</b>
8.1	Excessive Asset Inflation: The More Likely Cause of a Failed Reform	167
8.2	The Formation of a Stock Market Bubble in 2006–2007	168
8.2.1	The Sharp Rise of Share Prices in 2006	168
8.2.2	The Moderate Corrections in Early 2007	175
8.2.3	The Sharp Rise in March–May 2007	177
8.2.4	The Correction in May–June 2007	178
8.2.5	The Surge Since July 2007	181
8.3	The Economic and Political Risks of a Bursting of Asset Bubble: China's Last Chance to Gradually Squeeze the Bubble?	182
8.3.1	The Risk of Being Kidnapped by the High Share Price	182
8.3.2	Two Types of Bubble Bursting	183
8.3.3	The Curbing Measures Engineered by the Party Leader	186
8.4	The Gradual Bubble Squeezing Strategy	188
8.4.1	Early 2008: Low Risk of Second Type of Bubble Bursting, But Still High Risk of First Type of Bursting	188
8.4.2	The Strategy: Squeeze Only Part of the Bubble	189
8.4.3	Stock Price in Early 2008 Was Still Substantially Over-Valued	189
8.4.4	The Danger of Selective Listening and Unrealistic Trusting-To-Luck	193
8.4.5	The Need to Squeeze Another Part of the Bubble	195
8.5	The Correction in 2008: From Bubble Squeezing to Avoidance of Over-Correction	196
8.5.1	Further Corrections in 2008Q1 to a Less Vulnerable Level	196
8.5.2	The Shift from Bubble Squeezing to Avoidance of Over-Correction	197
8.5.3	The Global Recession and Further Plunges in Share Price in 2008H2	200

8.5.4	The Stabilization and Then Gradual Recovery of the Stock Market Since November 2008	201
<b>Chapter 9</b>	<b>China's Property Inflation I: Root Causes and Consequences</b>	<b>203</b>
9.1	Movements of Property Price in Recent Years: The Rapid Rise Since 2004	204
9.2	Microeconomic Reasons: Why It Could Be Disastrous to Let "Free" Market Force to Guide China's Property Market	206
9.2.1	High Income Inequality	207
9.2.2	Huge Barriers of Entry	208
9.2.3	High Fixed Development Cost and Hoarding of Lands	211
9.2.4	The Market Structure Problem: Asymmetries Between Buyers and Sellers, No Supply Curve in China's Property Market	212
9.2.5	Speculative and Panic Demand	214
9.2.6	Other Undesirable Effects	218
9.2.7	Implications of the Above Analysis	223
9.3	Macroeconomic Costs and Systemic Risk	225
9.3.1	Excessive Rise in Property Price	226
9.3.2	Macroeconomic Consequences of the Excessive Property Inflation	231
9.4	Lessons From Hong Kong	232
9.5	Summary on the Costs and Risk of Letting "Free" Market Force to Guide China's Property Market Under the Imperfect Settings	237
<b>Chapter 10</b>	<b>China's Property Inflation II: Recommended Solution</b>	<b>239</b>
10.1	The Recommended Solution	239
10.1.1	The Basic Structure of the Proposal	239
10.1.2	How "Substantial" Is Sufficient?	242
10.1.3	What Price Should the Government Choose?	243
10.1.4	Why It Has to Be Profitable to the Government?	245

10.1.5	Use the Substantial Public Housing Construction to Offset the Soon Arriving Recession	248
10.1.6	Impacts of the Proposal	248
10.2	The Proposal in September 2008	250
10.3	The Warning and More Detailed Proposals in March 2010	251
10.3.1	A Summary on the Undesirable Consequences of Just Relying on Market Force to Do the Allocation Job in China's Property Market	252
10.3.2	Adding the Necessary Competition into China's Property Market	253
10.3.3	Containing the Potential Correction of Private Property Price: More Classes of Public Flats With Price as the Hard Target	255
10.3.4	Risk of Just Relying on Standard Tightening Measures	259
10.4	The Tightening Measures Since April 2010 and the Subsequent Developments	260
10.4.1	The Tightening Measures in April 2010	260
10.4.2	The Dangerous Counter-Proposal in July 2010	262
10.4.3	The Proper Policy Mix	263
10.4.4	Other Dimensions of the Proposal	264
10.4.5	Further Comments in August 2010	265
10.4.6	The Administrative Restriction on Flat Purchase	268
10.4.7	Remarks on the Administrative Restrictions	270
10.5	Continuing the Anti-Corruption Strategy From the Housing Sector	272
10.5.1	The Strategy of Cleaning Corruption Sector-by-Sector	272
10.5.2	The Strategy of Cleaning-and-Consolidation Followed by Another Cleaning-and-Consolidation	273
10.5.3	Why the Banking Sector and Then the Housing Sector	273
10.5.4	Importance of Proper Implementation and Counter-Checking	275

10.5.5	The Most Capable General Is the One Who Could Make His Army Grow	276
<b>Chapter 11</b>	<b>Fiscal and Monetary Policies During the Global Financial Tsunami</b>	<b>277</b>
11.1	Signs of an Economic Slowdown in 2007H2 and Early 2008	277
11.2	Potential Consequences of the Anticipated Plunge in US Property Prices	285
11.2.1	Somebody Had to Absorb the Loss	286
11.2.2	No Painless Solution to the Bursting of Property Bubble	288
11.2.3	The Global Economy Was Still at the Beginning and Deepening Stage of the Great Recession	291
11.3	The Debate With the Central Bank in 2008Q2-Q3	295
11.4	The Ultra Expansionary Fiscal Policies	298
11.4.1	Tax Rebate Instead of Tax Reduction	303
11.4.2	Substantial Public Housing Constructions	305
11.4.3	Huge Infrastructural Constructions	309
11.4.4	The Four-Trillion-Yuan Fiscal Expansion	309
11.5	The Interest Rate Policy	314
11.5.1	Better to Start the Interest Rate Cuts Before the Slowdown	314
11.5.2	China's Failure to Cut the Interest Rate Before the Slowdown	316
11.5.3	First Interest Rate Cuts and Fiscal Expansion, Then Quantity Easing	316
11.6	The Substantial Quantity Easing in Credit and Money Supply	319
11.6.1	Time for Substantial Quantity Easing	319
11.6.2	Some Preliminary Points Before the Discussion	319
11.6.3	Why Necessary to Use Ultra Expansionary Fiscal and Monetary Policies?	323

<b>Chapter 12</b>	<b>Macroeconomic Outlook: Risk of Severe Asset and CPI Inflation, Exchange Rate Cycle and Then a Crisis Outside the US After the Recovery</b>	<b>331</b>
12.1	US's QE1 Helped Avoid a Great Depression, But Raised the Risk of Subsequent Global Asset Inflation and Exchange Rate Cycle	331
12.1.1	The US's QE1 Had Helped the Global Economy Avoid a Great Depression Similar to That in the 1930s	332
12.1.2	The Risk of a Severe Global Asset Inflation and Then CPI Inflation	336
12.1.3	The Possibility of a Huge Exchange Rate Cycle	338
12.2	The Global Stock Market During and After the Financial Tsunami	339
12.2.1	The Plunge and Then the Rebound: Some Lessons for Share Investments	341
12.2.2	Why It Could be Judged in March–April 2009 That the Global Financial Market Had Probably Passed Its Worst Time	358
12.2.3	Recession but No Great Depression in the Global Economy	360
12.2.4	The US Dollar Carry Trade and Early Signs of Asset Inflation in Some Asian Economies	361
12.3	The US's QE2 and Its Potential Impacts	363
12.3.1	The Debate on the Effect of QE2 on US's Output and Inflation	363
12.3.2	Misconceptions Related to the Liquidity Trap	370
12.3.3	Monetary Policy Has Many Other Transmission Channels	373
12.3.4	Potential Impacts of QE2 on US Inflation	377
12.4	The Risk of a Bubble and Then a Crisis in Economies Outside the US During the Overheated Phase of the Recovery	379
12.5	The Likelihood of a Huge Property Bubble and Then a Crisis in Singapore, Hong Kong and China	382
