<i>Preface</i>	v
<i>Acknowledgments</i>	ix
<i>List of Figures</i>	xvii
<i>List of Tables</i>	xxi
1. Examples of curious curves	1
1.1 Variations of the Koch curve . . . . .	2
1.1.1 Koch curve . . . . .	2
1.1.2 Modified Koch curve . . . . .	2
1.1.3 Basics of complex numbers . . . . .	4
1.2 More examples of curious curves . . . . .	6
1.2.1 The unit square is a curve . . . . .	6
1.2.2 Iterated function systems produce curves . . . . .	7
1.3 Construction of a family of Cantor sets . . . . .	10
1.3.1 Middle-thirds Cantor set . . . . .	11
1.3.2 Construction of generalized Cantor sets . . . . .	12
1.3.3 The length of the Cantor set $C_0$ . . . . .	13
1.3.4 The sets $C_h$ . . . . .	15
1.4 What is not a curve? . . . . .	15
2. The Koch curve and tangent lines	19
2.1 Construction of the Koch curve . . . . .	19
2.1.1 Representation in base 4 . . . . .	20
2.1.2 Formulas for $f_k$ . . . . .	21
2.1.3 Convergence of the sequence $\{f_k\}$ . . . . .	24

2.1.4	An equation for $f$ . . . . .	25
2.1.5	Length of the Koch curve . . . . .	26
2.2	Tangent lines to simple curves in $\mathbb{C}$ . . . . .	26
2.2.1	Definition of a tangent line to a simple curve . . . . .	27
2.2.2	Another construction of the Koch curve . . . . .	28
2.2.3	Tangent lines to graphs of continuous maps from $I$ to $\mathbb{R}$ . . . . .	30
	2.2.3.1 Modified Cantor functions . . . . .	34
	2.2.3.2 The graph $G_\phi$ of the Cantor function . . . . .	34
2.3	Problems . . . . .	35
3.	Curves and Cantor sets . . . . .	37
3.1	A square is a curve! . . . . .	37
3.2	Simple curves . . . . .	40
3.2.1	A homeomorphism $g$ with $C \times C \subset g(I)$ . . . . .	42
3.2.2	Simple curves with positive area . . . . .	44
3.2.3	Proofs of Propositions 3.1 and 3.2 . . . . .	48
	3.2.3.1 Proof of Proposition 3.1 . . . . .	48
	3.2.3.2 Proof of Proposition 3.2 . . . . .	49
3.3	Continuous images of the Cantor set . . . . .	52
3.4	Subsets of $\mathbb{C}$ that are not curves . . . . .	55
3.5	Generalized curves . . . . .	56
3.6	More examples of curves . . . . .	57
3.7	Problems . . . . .	63
4.	Generalizations of the Koch curve . . . . .	67
4.1	Construction of generalizations . . . . .	67
4.1.1	The iteration process . . . . .	70
4.1.2	A decomposition of $K_{a,\theta}$ . . . . .	70
4.2	Double points in $K_{a,\theta}$ with $\theta = \pi/3$ and $a = 1/4$ . . . . .	71
4.2.1	The pivotal value $a(\theta) = 1/4$ for $\theta = \pi/3$ . . . . .	75
4.3	Investigation of $K_{a,\pi/4}$ . . . . .	76
4.3.1	Verifying $a(\theta) = 1 - \frac{\sqrt{3}}{2}$ for $\theta = \pi/4$ . . . . .	78
4.3.2	Double points form Cantor sets . . . . .	80
4.4	Problems . . . . .	81
5.	Metric spaces and the Hausdorff metric . . . . .	83
5.1	Metric spaces . . . . .	83
5.1.1	Equivalent metrics . . . . .	84

5.1.2	Topological properties of metric spaces . . . . .	85
5.1.3	Complete metric spaces . . . . .	89
5.2	The Hausdorff metric . . . . .	90
5.3	Metrics and norms . . . . .	92
5.4	Problems . . . . .	94
6.	Contraction maps and iterated function systems	101
6.1	Contraction maps . . . . .	101
6.2	Iterated function systems . . . . .	104
6.3	An iterated function system defines a curve . . . . .	106
6.4	Implementation of iterated function systems . . . . .	108
6.5	Problems . . . . .	112
7.	Dimension, curves and Cantor sets	115
7.1	Intervals, squares and cubes . . . . .	115
7.2	Hausdorff dimension of a bounded subset of $\mathbb{R}^2$ . . . . .	117
7.2.1	Basic facts about dimension . . . . .	117
7.3	Tent maps and Cantor sets with prescribed dimension . . . . .	118
7.3.1	Dimension of Cantor sets . . . . .	122
7.3.2	Dimension of Cantor sets in the plane . . . . .	123
7.4	Dimension and simple curves . . . . .	123
7.4.1	Simple curves with prescribed dimension . . . . .	123
7.4.2	Dimension of the Koch curve . . . . .	123
7.4.3	Functions with prescribed dimension of points of non-tangency . . . . .	124
7.5	Symmetric Cantor sets (optional section) . . . . .	125
7.5.1	Construction of a symmetric Cantor set . . . . .	125
7.5.2	Definition of dimension of symmetric Cantor sets . . . . .	126
7.6	Saw tooth maps . . . . .	127
7.7	Problems . . . . .	127
8.	Julia sets and the Mandelbrot set	129
8.1	Theory of Julia sets . . . . .	129
8.1.1	Observations . . . . .	130
8.1.2	Visual images . . . . .	131
8.1.3	Two facts about Julia sets . . . . .	132
8.2	The Mandelbrot set . . . . .	132
8.2.1	Fixed points of $f_c$ . . . . .	133

8.2.2	The central cardioid . . . . .	136
8.2.3	The great circle . . . . .	136
8.2.3.1	Period two points . . . . .	136
8.2.3.2	Description of the great circle . . . . .	137
8.2.4	Super-attracting fixed points . . . . .	138
8.2.5	The two large bulbs adjoining the central cardioid . . . . .	139
8.3	Generalized curves and Julia sets . . . . .	140
8.4	Problems . . . . .	140
Appendix A Points on a line		143
A.1	Labeling points on a line . . . . .	143
A.1.1	base $b$ representations . . . . .	143
A.2	Convergence . . . . .	144
A.2.1	The geometric series . . . . .	145
A.3	The special nested interval property . . . . .	147
A.4	Bounds on subsets of a line . . . . .	147
A.4.1	Bounded sequences have convergent subsequences . . . . .	149
A.5	The real numbers $\mathbb{R}$ . . . . .	150
A.6	Eventually periodic base $b$ representations . . . . .	150
A.7	Problems . . . . .	151
Appendix B Length and area		155
B.1	Intervals and length . . . . .	155
B.2	Lengths of subsets of intervals . . . . .	157
B.3	Intervals and rectangles in the plane . . . . .	158
B.4	Length of a curve . . . . .	159
B.5	Areas of subsets of the plane . . . . .	159
B.5.1	Areas of rectangles . . . . .	160
B.5.2	Areas of general subsets of the plane . . . . .	162
B.6	Problems . . . . .	163
Appendix C Maps and sets in the plane		165
C.1	Definition of a map . . . . .	165
C.2	Properties of points in the plane . . . . .	166
C.3	Continuity and limits . . . . .	168
C.4	Topological properties of subsets of $\mathbb{R}^2$ . . . . .	169
C.4.1	Closed sets . . . . .	170
C.4.2	Compact sets . . . . .	171

C.4.3	Connected sets . . . . .	174
C.4.4	Fixed points of maps . . . . .	176
C.4.5	Uniform continuity of maps . . . . .	177
C.5	Convergence of maps . . . . .	178
C.6	Linear maps from $\mathbb{R}^2$ to $\mathbb{R}^2$ . . . . .	182
C.7	Homeomorphisms: Inverse maps on compact subsets of $\mathbb{R}^2$ . . . . .	184
C.8	Problems . . . . .	185
Appendix D	Infinite sets	191
D.1	Countable and uncountable sets . . . . .	191
D.1.1	The positive rational numbers are countably infinite . . . . .	192
D.1.2	The Cantor set is not a countable set . . . . .	192
D.1.3	The continuum question . . . . .	193
D.2	Problems . . . . .	193
<i>Bibliography</i>		195
<i>Solutions to selected problems</i>		197
<i>Index</i>		207
