

Contents

Preface	vii
Biographies of Editors and Contributors	xiii
Part One — Theoretical and Modeling Aspects	1
Turbulent Dispersion: How Results for the Zero Molecular Diffusivity Case Can Be Used in the Real World	3
Nils Mole, Philip Christopher Chatwin and Paul J. Sullivan	
Hierarchy and Interactions in Environmental Interfaces Regarded as Biophysical Complex Systems	25
Dragutin T. Mihailovic and Igor Balaz	
Some Recent Advances in Modeling Stable Atmospheric Boundary Layers	49
Branko Grisogono	
Modelling of Stratified and Turbulent Flow	67
Vladimír Fuka, Josef Brechler and Aleš Jirk	
The Environmental Hydraulics of Turbulent Boundary Layers	87
Robert J. Schindler and Josef Daniel Ackerman	
Reynolds Number Effect on Spatial Development of Viscous Flow Induced by Wave Propagation over Bed Ripples	127
Athanassios A. Dimas and Gerasimos A. Kolokythas	
Calculation of Aggregated Albedo in Rectangular Solid Geometry on Environmental Interfaces	145
Darko Kapor, Ana Cirisan and Dragutin T. Mihailovic	

Part Two — Applicative, Software and Experimental Issues	165
Locating a Possible Source of Air Pollution Using a Combination of Measurements and Inverse Modeling	167
Borivoj Rajković, Mirjam Vujadinović and Zoran Gršić	
Long-Term Measurements of Energy Budget and Trace Gas Fluxes Between the Atmosphere and Different Types of Ecosystems in Hungary	185
Tamás Weidinger, László Horváth, Zoltán Nagy and András Zénó Gyöngyösi	
Integration of Spatio-Temporal Data for Fluid Modeling in the GIS Environment	209
Lubos Matejcek	
Modeling Pathogen Intrusion on Safe Drinking Water: CFD versus Physical Models	229
P. Amparo López-Jiménez, J. Jesús Mora-Rodríguez, Vicente S. Fuertes-Miquel and F. Javier Martínez-Solano	
Numerical Simulation of Mass Exchange Processes in a Dead Zone of a River	249
Carlo Gualtieri	
Modeling Mercury Fate and Transport in Aquatic Systems	275
Arash Massoudieh, Dušan Žagar, Peter G. Green, Carlos Cabrera-Toledo, Milena Horvat, Timothy R. Ginn, Tammer Barkouki, Tess Weathers and Fabian A. Bombardelli	
3D Ecological Modelling of the Aveiro Coast (Portugal)	309
J.F. Lopes and Ana C. Cardoso	
Experimental Calibration of a Simplified Method to Evaluate Absolute Roughness of Vegetated Channels	327
Sergio De Felice, Paola Gualtieri and Guelfo Pulci Doria	
Index	345
