

## CONTENTS

<i>Preface</i>	v
<i>Chapter 1</i>	
Thoughts on Localization P. W. Anderson	1
<i>Chapter 2</i>	
Anderson Localization in the Seventies and Beyond D. Thouless	7
<i>Chapter 3</i>	
Intrinsic Electron Localization in Manganites T. V. Ramakrishnan	27
<i>Chapter 4</i>	
Self-Consistent Theory of Anderson Localization: General Formalism and Applications P. Wölfle and D. Vollhardt	43
<i>Chapter 5</i>	
Anderson Localization and Supersymmetry K. B. Efetov	73
<i>Chapter 6</i>	
Anderson Transitions: Criticality, Symmetries and Topologies A. D. Mirlin, F. Evers, I. V. Gornyi and P. M. Ostrovsky	107
<i>Chapter 7</i>	
Scaling of von Neumann Entropy at the Anderson Transition S. Chakravarty	151

<i>Chapter 8</i>	
From Anderson Localization to Mesoscopic Physics M. Büttiker and M. Moskalets	169
<i>Chapter 9</i>	
The Localization Transition at Finite Temperatures: Electric and Thermal Transport Y. Imry and A. Amir	191
<i>Chapter 10</i>	
Localization and the Metal–Insulator Transition — Experimental Observations R. C. Dynes	213
<i>Chapter 11</i>	
Weak Localization and its Applications as an Experimental Tool G. Bergmann	231
<i>Chapter 12</i>	
Weak Localization and Electron–Electron Interaction Effects in thin Metal Wires and Films N. Giordano	269
<i>Chapter 13</i>	
Inhomogeneous Fixed Point Ensembles Revisited F. J. Wegner	289
<i>Chapter 14</i>	
Quantum Network Models and Classical Localization Problems J. Cardy	301
<i>Chapter 15</i>	
Mathematical Aspects of Anderson Localization T. Spencer	327
<i>Chapter 16</i>	
Finite Size Scaling Analysis of the Anderson Transition B. Kramer, A. MacKinnon, T. Ohtsuki and K. Slevin	347

*Chapter 17*

- A Metal–Insulator Transition in 2D: Established Facts  
and Open Questions 361  
S. V. Kravchenko and M. P. Sarachik

*Chapter 18*

- Disordered Electron Liquid with Interactions 385  
A. M. Finkel'stein

*Chapter 19*

- Typical-Medium Theory of Mott–Anderson Localization 425  
V. Dobrosavljević

*Chapter 20*

- Anderson Localization vs. Mott–Hubbard Metal–Insulator  
Transition in Disordered, Interacting Lattice Fermion Systems 473  
K. Byczuk, W. Hofstetter and D. Vollhardt

*Chapter 21*

- Topological Principles in the Theory of Anderson Localization 503  
A. M. M. Pruisken

*Chapter 22*

- Speckle Statistics in the Photon Localization Transition 559  
A. Z. Genack and J. Wang
