Preface	v
About Yoseph Imry	xi
Introduction	xiii
1. The Kondo Screening Cloud: What It Is and How to Observe It <i>I. Affleck</i>	1
2. Plasmonics, Nanoplasmonics, and SPASER's <i>D. J. Bergman</i>	45
3. Entanglement, Bunching, and Counting Statistics <i>C. Bruder and W. Belzig</i>	57
4. Transport Currents and Persistent Currents in Solids: Orbital Magnetism and Hall Effect of Dirac Electrons <i>H. Fukuyama, Y. Fuseya and A. Kobayashi</i>	69
5. Bloch and Josephson Oscillations in a Ring of an Ideal Bose Gas <i>L. Gunther</i>	79
6. Exploring Decoherence in Cavity QED <i>S. Haroche, I. Dotsenko, S. Gleyzes, M. Brune, and J.-M. Raimond</i>	95

7. Fractional Charge Determination via Quantum Shot Noise Measurements 115
M. Heiblum
8. Fabry-Perot Interferometer and Non-Abelian Quantum Hall States 137
R. Ilan, E. Grosfeld, K. Schoutens and A. Stern
9. Molecular Conduction Junctions: Intermolecular Effects 159
A. Landau, L. Kronik and A. Nitzan
10. Mesoscopic Effects in the Electron-Glass 183
Z. Ovadyahu
11. Electron Coherence and Dephasing in Metal Films, Wires and Rings 201
D. E. Prober
12. The Third Moment of Current Fluctuations in a Tunnel Junction: Experiments in the Classical and Quantum Regimes 211
B. Reulet, J. Gabelli, L. Spietz and D. E. Prober
13. Magnetic Avalanches in Molecular Nanomagnets 223
M. P. Sarachik and S. McHugh
14. Mesoscopics and the High T_c Problem 239
D. J. Scalapino, E. Berg and S. A. Kivelson
15. An Effective Theory of Pulse Propagation in a Nonlinear and Disordered Medium in Two Dimensions 249
G. Schwiete and A. M. Finkel'stein
16. Fluctuations Effects in Small Superconducting Rings 265
G. Schwiete and Y. Oreg

17. Phase-Coherent Electron Transport through Double Dots <i>M. Sigrist, T. Ihn, K. Ensslin, V. Puller and Y. Meir</i>	305
18. Spin-Hall Effect in Chiral Electron Systems: From Semiconductor Heterostructures to Topological Insulators <i>P. G. Silvestrov and E. G. Mishchenko</i>	317
19. The Aharonov-Bohm Effect and its Applications to Magnetic Field Observation <i>A. Tonomura</i>	345
20. Dimensional Crossover of the Dephasing Time in Disordered Mesoscopic Rings: From Diffusive through Ergodic to 0D Behavior <i>M. Treiber, O. M. Yevtushenko, F. Marquardt, J. von Delft and I. V. Lerner</i>	371
21. Single-Electron Tunneling and Fluctuation Theorem <i>Y. Utsumi, D. S. Golubev, M. Marthaler, T. Fujisawa, and G. Schön</i>	397
22. Phase Relaxation of Electrons in Disordered Thin Ferromagnetic Films <i>P. Wölfle and K. A. Muttalib</i>	415
Subject Index	433
