

Contents

Preface	v
Honorary Committee and International Scientific Committee	vi
Keynote Talks	viii
The Influence of Machine Saturation on Bifurcation and Chaos in Multimachine Power Systems	1
<i>Majdi M. Alomari and Jian Gue Zhu</i>	
Chaos in Multiplicative Systems	9
<i>Dorota Aniszewska and Marek Rybaczuk</i>	
Deterministic Chaos Machine: Experimental vs. Numerical Investigations	17
<i>Jan Awrejcewicz and Grzegorz Kudra</i>	
Some Issues and Results on the EnKF and Particle Filters for Meteorological Models	27
<i>Christophe Baehr and Olivier Pannekoucke</i>	
Local and Global Lyapunov Exponents in a Discrete Mass Waterwheel	35
<i>David Becerra Alonso and Valery Tereshko</i>	
Complex Dynamics in an Asset Pricing Model with Updating Wealth	43
<i>Serena Brianzoni, Cristiana Mammanna, and Elisabetta Michetti</i>	
Chaotic Mixing in the System Earth: Mixing Granitic and Basaltic Liquids	51
<i>Cristina De Campos, Werner Ertel-Ingrisch, Diego Perugini, Donald B. Dingwell, and Giampero Poli</i>	
Multiple Equilibria and Endogenous Cycles in a Non-Linear Harrodian Growth Model	59
<i>Pasquale Commendatore, Elisabetta Michetti, and Antonio Pinto</i>	
Hick Samuelson Keynes Dynamic Economic Model with Discrete Time and Consumer Sentiment	67
<i>Loretti I. Dobrescu, Mihaela Neamțu, and Dumitru Opreș</i>	
On the Entropy Flows to Disorder	75
<i>C. T. J. Dodson</i>	

Linear Communication Channel Based on Chaos Synchronization <i>Victor Grigoras and Carmen Grigoras</i>	85
Maxwell-Bloch Equations as Predator-Prey System <i>A. S. Hacinliyan, O. Ö. Aybar, İ. Kuşbeyzi, İ. Temizer, and E. E. Akkaya</i>	93
Identifying Chaotic and Quasiperiodic Time-Series Candidates for Efficient Nonlinear Projective Noise Reduction <i>Nada Jevtic and Jeffrey S. Schweitzer</i>	101
Chaos from the Observer's Mathematics Point of View <i>Dmitriy Khots and Boris Khots</i>	111
New Models of Nonlinear Oscillations Generators <i>Alexander A. Kolesnikov</i>	119
Nonlinear System's Synthesis – The Central Problem of Modern Science and Technology: Synergetics Conception. Part II: Strategies of Synergetics Control <i>Anatoly A. Kolesnikov</i>	128
Synergetic Approach to Traditional Control Laws Multi-Machine Power System Modification <i>Anatoly A. Kolesnikov and Andrew A. Kuzmenko</i>	134
Dynamic Stability Loss of Closed Circled Cylindrical Shells Estimation Using Wavelets <i>V. A. Krysko, J. Awrejcewicz, M. Zhigalov, V. Soldatov, E. S. Kuznetsova, and S. Mitskevich</i>	139
The Application of Multivariate Analysis Tools for Non-Invasive Performance Analysis of Atmospheric Pressure Plasma <i>V. J. Law, J. Tynan, G. Byrne, D. P. Dowling, and S. Daniels</i>	147
Chaos Communication: An Overview of Exact, Optimum and Approximate Results Using Statistical Theory <i>Anthony J. Lawrance</i>	155
Dynamics of a Bouncing Ball <i>Shiuan-Ni Liang and Boon Leong Lan</i>	165
Symmetry-Break in a Minimal Lorenz-Like System <i>Valerio Lucarini and Klaus Fraedrich</i>	170

Sub-Critical Transitions in Coupled Map Lattices <i>P. Manneville</i>	185
Quantum Scattering and Transport in Classically Chaotic Cavities: An Overview of Old and New Results <i>Pier A. Mello, Víctor A. Gopar, and J. A. Méndez-Bermúdez</i>	191
Parametric Excitation of a Longwave Marangoni Convection <i>Alexander B. Mikishev, Alexander A. Nepomnyashchy, and Boris L. Smorodin</i>	207
Symmetry Broken in Low Dimensional N -Body Chaos <i>David C. Ni and Chou Hsin Chin</i>	215
On Markov Processes: A Survey of the Transition Probabilities and Markov Property <i>Gabriel V. Orman</i>	224
Qualitative Dynamics of Interacting Classical Spins <i>Leonidas Pantelidis</i>	232
A Transmission Line Model for the Spherical Beltrami Problem <i>C. D. Papageorgiou and T. E. Raptis</i>	241
Two Aspects of Optimum CSK Communication: Spreading and Decoding <i>Theodore Papamarkou</i>	249
A Numerical Exploration of the Dynamical Behaviour of q -Deformed Nonlinear Maps <i>Vinod Patidar, G. Purohit, and K. K. Sud</i>	257
Spatiotemporal Chaos in Distributed Systems: Theory and Practice <i>George P. Pavlos, A. C. Iliopoulos, V. G. Tsoutsouras, L. P. Karakatsanis, and E. G. Pavlos</i>	268
An Enhanced Tree-Shaped Adachi-Like Chaotic Neural Network Requiring Linear-Time Computations <i>Ke Qin and B. John Oommen</i>	284
Clustering of Inertial Particles in 3D Steady Flows <i>Themistoklis Sapsis and George Haller</i>	294

A Two Population Model for the Stock Market Problem <i>Christos H. Skiadas</i>	302
Electron Quantum Transport through a Mesoscopic Device: Dephasing and Absorption Induced by Interaction with a Complicated Background <i>Valentin V. Sokolov</i>	309
Composing Chaotic Music from a Varying Second Order Recurrence Equation <i>Anastasios D. Sotiropoulos and Vaggelis D. Sotiropoulos</i>	320
Music Composition from the Cosine Law of a Frequency-Amplitude Triangle <i>Vaggelis D. Sotiropoulos and Anastasios D. Sotiropoulos</i>	327
Chaos in a Fractional-Order Jerk Model Using Tanh Nonlinearity <i>Banlue Srisuchinwong</i>	338
Nonlinear Systems in Brunovsky Canonical Form: A Novel Neuro-Fuzzy Algorithm for Direct Adaptive Regulation with Robustness Analysis <i>Dimitris C. Theodoridis, Yiannis Boutalis, and Manolis A. Christodoulou</i>	346
Routh-Hurwitz Conditions and Lyapunov Second Method for a Nonlinear System <i>Ömür Umut</i>	362
Atomic de Broglie-Wave Chaos <i>V. O. Vitkovsky, L. E. Konkov, and S. V. Prants</i>	369
Chaotic Behavior of Plasma Surface Interaction. A Table of Plasma Treatment Parameters Useful to the Restoration of Metallic Archaeological Objects <i>C. L. Xaplanteris and E. Filippaki</i>	377
Simulation of Geochemical Self-Organization: Acid Infiltration and Mineral Deposition in a Porous Ferruginous Limestone Rock <i>Farah Zaknoun, Houssam El-Rassy, Mazen Al-Ghoul, Samia Al-Joubaily, Tharwat Mokalled, and Rabih Sultan</i>	385
Author Index	395
