Preface	xiii
Self-Testing Kit	xix
List of Abbreviations	xxiii
Acknowledgement	xxv
1. Introduction: A Brief History of Entropy and the Second Law of Thermodynamics	1
1.1. The Non-Atomistic Formulations of the Second Law	1
1.2. The Atomistic Formulation of the Second Law	6
1.3. Entropy as a Measure of Information	10
1.4. Popular Metaphoric Descriptions of Entropy	13
2. All You Need to Know but Never Dared to Admit that You Already Know	17
2.1. Grouping of Objects and Assigning Measures	18
2.2. Events and Their Probabilities	27
2.3. Information and its Shannon Measure	38

3. Discover the Uniform Spatial Distribution	73
3.1. Initial Warm-Up: Two Marbles in Two Cells	73
3.2. Two Cells and a Varying Number of Marbles	80
3.3. Ten Marbles and Varying Number of Cells	91
3.4. Some Simple Experiments Using Two Systems at Equilibrium	96
3.4.1. A Process of Expansion	96
3.4.2. Combination of Two Non-Empty Games	97
3.4.3. Pure Mixing of Two Types of Marbles	98
3.4.4. Pure Assimilation Process	100
3.4.5. Mixing and Expansion	100
3.4.6. Assimilation and Expansion	101
4. Discover the Boltzmann Distribution	109
4.1. Six Marbles in Three Cells	111
4.2. Nine Marbles in Varying Number of Cells	115
4.3. Ten Cells and Variable Number of Marbles	119
4.4. Some Simple Processes Involving Transferring of Marbles	122
4.4.1. Expansion	123
4.4.2. Pure Mixing	123
4.4.3. Pure Assimilation	123
4.5. Dependence of SMI and W on the String Length TL	124
4.6. A Process Involving Exchange of String Between Two Systems	128
4.7. A Spontaneous Transfer of String from the High-Value to a Lower-Value TL	132
4.8. Another Experiment Involving a Spontaneous Transfer of String	138
4.9. What Have We Learned in this Chapter?	143
5. Discover the Maxwell–Boltzmann Distribution	151
5.1. Six Marbles in Three Cells	153
5.2. Nine Marbles in Varying Number of Cells	154
5.3. Changing the Number of Marbles in a Fixed Number of Cells	157

5.4.	Dependence on the Total Cloth Area	163
5.5.	A Process Involving Exchange of Cloth Between Two Systems	166
5.6.	A Process Involving a Spontaneous Transfer of Cloth	168
5.7.	What Have We Learned in this Chapter?	170
6.	Entropy and the Second Law in the World of Marbles	173
6.1.	Summary of the Experiments with a Single System	173
6.1.1.	The Uniform Distribution: Shannon's First Theorem	174
6.1.2.	The Boltzmann Distribution: Shannon's Second Theorem	177
6.1.3.	The Maxwell–Boltzmann Distribution: Shannon's Third Theorem	179
6.2.	Summary and Conclusions Regarding the Processes Involving Two Systems	180
6.2.1.	Evolution of a Pair of Uniformly Distributed Games	181
6.2.2.	Evolution of a Pair of Boltzmann-Type Games	183
6.2.3.	Evolution of a Pair of Maxwell–Boltzmann Type Games	185
6.3.	Summary of Everything We Have Learned: What, Why, and How	186
7.	Entropy and the Second Law in the Real World	192
7.1.	The Dictionary	193
7.2.	Uniform Distribution: Shannon's First Theorem and the Second Law	194
7.2.1.	What Happens?	194
7.2.2.	Why it Happens?	198
7.2.3.	How it Happens?	201
7.3.	Some More Processes in the “Uniform” Class	202
7.3.1.	An Alternative View of the Expansion Process	202
7.3.2.	Pure Mixing	205
7.3.3.	Pure Assimilation	206
7.3.4.	Mixing and Expansion	207
7.3.5.	Assimilation and Expansion	209
7.3.6.	A Pure De-Assimilation Process	211

7.4. The Boltzmann Distribution: Shannon's Second Theorem and Clausius' Definition of Entropy	212
7.4.1. The Boltzmann Distribution	213
7.4.2. Clausius' Definition of Entropy	214
7.4.3. Energy Transfer Between Two Systems in Contact	217
7.4.4. Spontaneous Flow of Energy from One System to Another	217
7.5. The Maxwell–Boltzmann Distribution: Shannon's Third Theorem and Clausius' Formulation of the Second Law of Thermodynamics	219
7.5.1. Translation	220
7.5.2. Summary of What We Already Know	221
7.5.3. Spontaneous Heat Transfer from a Hotter to a Colder Body	222
7.6. The Conclusion of All Conclusions	224
8. Notes	232
Epilogue	254
References and Suggested Reading	257
Index	259
