	i
<i>Preface</i>	vii
<i>Introduction</i>	xiii
<i>Acknowledgements</i>	xv
1. Spaces of Functions	1
1.1 The space $\mathcal{C}(\Omega)$	1
1.2 The space $\mathcal{E}^m(\Omega)$	2
1.3 The space $\mathcal{E}(\Omega)$	3
1.4 The space $\mathcal{D}_K^m(\Omega)$	4
1.5 The space $\mathcal{D}_K(\Omega)$	4
1.6 The space $\mathcal{D}^m(\Omega)$	5
1.7 The Topology of $\mathcal{D}^m(\Omega)$	6
1.8 Density results	11
2. Distributions	17
2.1 Definitions and characterizations	17
2.2 Examples	19
2.3 Embedding of $\mathcal{L}_{loc}^1(\Omega)$ in $\mathcal{D}'(\Omega)$	22
2.4 Support of a distribution	23
2.5 Pasting principle	25
2.6 Distributions with compact support	26
2.7 Operations on distributions	27
2.8 Topology in $\mathcal{D}'(\Omega)$	33
2.9 Continuity of differential operators	34

3.	Tensor Product	37
3.1	Tensor product of functions	37
3.2	Tensor product of distributions	38
3.3	Properties of tensor product	43
4.	Convolution of Distributions	47
4.1	Regular distributions case	47
4.2	Convolution of distributions	48
4.3	Properties of the convolution product	52
4.4	Convolution algebras	56
4.5	Convolution equations	57
5.	Fourier Transformation in $L^1(\mathbb{R}^n)$	67
5.1	Definitions and first properties.	67
5.2	Inversion Theorem	71
6.	Tempered Distributions	79
6.1	The space $\mathcal{S}(\mathbb{R}^n)$	79
6.2	Multiplication operators	86
6.3	Fourier transformation in $\mathcal{S}(\mathbb{R}^n)$	89
6.4	Tempered distributions	89
6.5	Convolution operators	94
6.6	Fourier transformation of tempered distributions	98
6.7	Ultradistributions	102
7.	Structure of Distributions	113
7.1	Local structure	113
7.2	Global structure	115
7.3	Structure of tempered distributions	120
8.	Fourier Ranges of Some Subspaces of $\mathcal{S}'(\mathbb{R}^n)$	125
8.1	Fourier range of $L^2(\mathbb{R}^n)$	125
8.2	Fourier range of $L^1(\mathbb{R}^n)$	128
8.3	Fourier range of $\mathcal{O}_M(\mathbb{R}^n)$	128
8.4	Fourier range of $\mathcal{D}(\mathbb{R}^n)$	131
8.5	Fourier range of $\mathcal{E}'(\mathbb{R}^n)$	133

9.	Laplace Transformation	139
9.1	Laplace transforms of functions of real variables	139
9.2	Laplace transforms of distributions	146
10.	Introduction to the Theory of Kernels	157
10.1	The notion of a kernel	157
10.2	Regular kernels	159
10.3	Regularizing kernels	162
10.4	Very regular kernels	163
10.5	Fundamental kernels of partial differential operators . . .	164
10.6	Hypoelliptic operators	167
11.	Sobolev Spaces	175
11.1	The spaces $H^m(\Omega)$, $m \in \mathbb{N}$	175
11.2	The spaces $H_0^m(\Omega)$, $m \in \mathbb{N}$	180
11.3	The spaces $L^2(\mu_s)$, $s \in \mathbb{R}$	185
11.4	The spaces $H^s(\mathbb{R}^n)$, $s \in \mathbb{R}$	188
11.5	Injection theorem of Sobolev	190
11.6	The compact injection theorem	192
	<i>Bibliography</i>	197
	<i>List of Symbols</i>	199
	<i>Index</i>	201
