

CONTENTS

| | |
|--|----------|
| Organizing committee | v |
| Preface | vii |
| Advanced Detectors and Particle Identification | 1 |
| Development of photodetection system based on multipixel avalanche Geiger photodiodes with WLS for LXe low- background detectors | 3 |
| <i>D. Yu. Akimov, A.V. Akindinov, I.S. Alexandrov, A.A. Burenkov, M.V. Danilov, A.G. Kovalenko and V.N. Stekhanov</i> | |
| Employing carbon nano-tubes in new nano-structured radiation detectors | 8 |
| <i>A. Ambrosio, M. Ambrosio, C. Aramo, V. Carillo, F. Guarino, P. Maddalena, V. Grossi, M. Passacantando, S. Santucci and A. Valentini</i> | |
| The rich detector of the Na62 experiment at CERN | 15 |
| <i>P. Cenci</i> | |
| Status and perspectives of Cherenkov imaging counters | 22 |
| <i>S. Dalla Torre</i> | |
| Study of biological samples with detector Medipix2 | 32 |
| <i>J. Dammer, V. Sopko, J. Jakubek, D. Vavrik and F. Weyda</i> | |
| New possibilities in medical x-ray imaging with photon counting pixel detectors | 37 |
| <i>J. Durst, P. Bartl, E. Guni, W. Haas, A. Ritter, P. Takoukam Talla, T. Weber, T. Michel and G. Anton</i> | |
| Cherenkov light detection for the LHCb RICH Upgrade | 44 |
| <i>C. Arnaboldi, E. Fanchini, C. Gotti, M. Maino and G. Pessina</i> | |
| The timing counter of the MEG experiment | 49 |
| <i>K. Fratini</i> | |
| dE/dx measurements in large volume TPCs | 54 |
| <i>A. Kalweit and M. Ivanov</i> | |

| | |
|--|-----|
| New approach in phase contrast X-ray imaging using coded aperture | 59 |
| <i>F. Krejci, J. Jakubek and M. Kroupa</i> | |
| Measurements of the photon detection efficiency done for Geiger-mode avalanche photodiodes (G-APD) | 64 |
| <i>S. Gentile, F. Meddi and E. Kuznetsova</i> | |
| Large volume and high efficiency neutron detector for nuclear physics and nuclear astrophysics measurements | 70 |
| <i>A. Lavagno, G. Gervino and C. Marino</i> | |
| Comparative measurements of the performances on four super bialkali large area photomultipliers | 75 |
| <i>E. Leonora</i> | |
| The effect of pulse rate on vacuum phototriodes response and the use of an LED pulser to improve stability | 80 |
| <i>D. E. Leslie</i> | |
| Test for upgrading RPCs at very high counting rate | 85 |
| <i>G. Aielli, P. Camarri, R. Cardarelli, A. Di Ciaccio, L. Di Stante, B. Liberti, E. Pastori and R. Santonico</i> | |
| A scintillating bar tracking detector for the ASACUSA – trap group experiment at the CERN AD | 90 |
| <i>V. Mascagna, D. Bolognini, M. Corradini, M. Leali, D. Lietti, E. Lodi Rizzini, M. Prest, L. Stoppani, E. Vallazza, L. Venturelli and N. Zurlo</i> | |
| First characterization of 8X8 monolithic silicon photomultipliers matrices for PET application | 96 |
| <i>M. Melchiorri, A. Piazza, C. Piemonte, A. Tarolli, N. Zorzi, M.G. Bisogni, A. Del Guerra, G. Llosa and S. Marcatili</i> | |
| Recent advances in the development of radiation tolerant silicon detectors for the super-LHC | 101 |
| <i>M. Moll</i> | |
| Precise measurement of the gas gain of a multi-wire proportional chamber with cosmic rays | 111 |
| <i>M. Avalle, I. Bernava, F. Brazzi, A. Iannone, M. Piesanti, G. Penso, D. Pinci, M. Anelli, P. Campana, A. Di Virgilio and R. Rosellini</i> | |

| | |
|--|------------|
| The ALICE Time-Of-Flight detector: Status and expected performance at the LHC startup | 116 |
| <i>A. Akindinov, A. Alici, P. Antonioli, S. Arcelli, M. Basile, G. Cara Romeo, L. Cifarelli, F. Cindolo, A. De Caro, D. De Gruttola, S. De Pasquale, M. Fusco Girard, B. Guerzoni, D. Hatzifotiadou, H.T. Jung, W.W. Jung, D.S. Kim, D.W. Kim, H.N. Kim, J.S. Kim, S. Kiselev, G. Laurenti, K. Lee, S.C. Lee, D. Malkevich, A. Margotti, R. Nania, A. Nedosekin, F. Noferini, P. Pagano, A. Pesci, O. Pinazza, R. Preghenella, M. Ryabinin, E. Scapparone, G. Scioli, A. Silenzi, M. Tchoumakov, K. Voloshin, M.C.S. Williams, B. Zagreev, C. Zampolli and A. Zichichi</i> | |
| Continuous scintillator detector blocks for simultaneous PET-MR imaging of the human brain | 121 |
| <i>P. Rato Mendes</i> | |
| Calibration of the ATLAS muon chambers | 128 |
| <i>F. Rauscher</i> | |
| Improved imaging in low energy electron microscopy and photo emission electron microscopy using MEDIPIX2 pixel detector | 133 |
| <i>I. Sikharulidze, R. van Gastel, S. Schramm, J.P. Abrahams, B. Poelsema, R.M. Tromp and S.J. van der Molen</i> | |
| Application of the PIN diode as a dosimeter for DOSE measurement of several radiation sources | 140 |
| <i>V. Sopko, J. Dammer, D. Chren, B. Sopko and F. Latal</i> | |
| Low temperature thermal conductivity of PVC | 145 |
| <i>G. Ventura and V. Martelli</i> | |
| Identification of high momentum charged hadrons in ALICE: Detector performance and perspectives | 150 |
| <i>G. Volpe</i> | |
| Perspectives with the MEDIPIX2-based detectors network in ATLAS | 155 |
| <i>J. Bouchami, A. Gutierrez, C. Leroy, T. Holy, S. Pospisil, M. Suk, J. Solc, D. Turecek and Z. Vykydal</i> | |
| Astroparticle and Underground Experiments | 163 |
| EXO-200 and R&D prospects | 165 |
| <i>M. Auger</i> | |

| | |
|--|-----|
| Direct detection of dark matter particles | 170 |
| <i>R. Bernabei, P. Belli, F. Montecchia, F. Nozzoli,</i> | |
| <i>F. Cappella, A. d'Angelo, A. Incicchitti, D. Prosperì,</i> | |
| <i>R. Cerulli, C.J. Dai, H.L. He, H.H. Kuang, X.H. Ma,</i> | |
| <i>X.D. Sheng and Z.P. Ye</i> | |
| Cosmic ray physics with the OPERA Detector | 180 |
| <i>T. Brugiere</i> | |
| The AEGIS experiment (Antimatter Experiment: Gravity, Interferometry, Spectroscopy) | 185 |
| <i>C. Canali</i> | |
| KM3NeT a cubic-kilometre-scale deep water neutrino telescope for the mediterranean sea | 190 |
| <i>G. de Bonis</i> | |
| Calibration of the ANTARES neutrino telescope | 195 |
| <i>U. Fritsch</i> | |
| Search for solar Axions with the CAST experiment | 200 |
| <i>J. Galan</i> | |
| Search for a possible spontaneous emission of muons from heavy nuclei | 205 |
| <i>M. Giorgini</i> | |
| Galactic cosmic rays modulation and prediction for the AMS-02 mission | 210 |
| <i>P. Bobik, M.J. Boschini, S. Della Torre, M. Gervasi,</i> | |
| <i>D. Grandi, K. Kudela and P.G. Rancoita</i> | |
| The CNGS facility: performance and operational experience | 220 |
| <i>E. Gschwendtner, K. Cornelis, I. Efthymiopoulos, A. Ferrari,</i> | |
| <i>A. Pardons, H. Vincke, J. Wenninger, P. Sala and</i> | |
| <i>A. Guglielmi</i> | |
| Measurement of radio emission from extensive air showers | 226 |
| <i>J. R. Hörandel</i> | |
| Design and data analysis method of HSRL receivers for atmospheric monitoring in ultra high energy cosmic ray experiments | 236 |
| <i>S. Maltezos, E. Fokitis, P. Fetfatzis, A. Georgakopoulou,</i> | |
| <i>V. Gika, G. Koutelieris, I. Manthos and A. Aravantinos</i> | |

| | |
|--|-----|
| Recent progress in PICASSO | 242 |
| <i>S. Kumaratunga</i> | |
| Development of bolometer matrices with NbSi TES sensors for the study of the cosmic microwave radiation (CMB) | 248 |
| <i>S.-C. Liu, S. Marnieros, L. Dumoulin, Y. Dolgorouki, L. Berge and S. Collin</i> | |
| Nitrogen molecular spectra of air fluorescence emulation using a LN ₂ cooled CCD | 253 |
| <i>S. Maltezos, E. Fokitis, V. Gika, P. Fetfatzis, G. Koutelieris, E. Galanis and N. Maragos</i> | |
| The OPERA experiment: A direct search of the $\nu_\mu \rightarrow \nu_\tau$ oscillations | 259 |
| <i>J. Marteau</i> | |
| Proposed wiring for CUORE experiment: A radiative solution . . . | 269 |
| <i>G. Ventura and V. Martelli</i> | |
| Photographic emulsions in the OPERA long baseline experiment status and first results | 274 |
| <i>F.W. Meisel</i> | |
| The gamma-ray sky under a “new” light | 279 |
| <i>M.J. Boschini, M. Gervasi, D. Grandi, E. Memola and P.G. Rancoita</i> | |
| The BOREXINO detector | 286 |
| <i>D. Montanari</i> | |
| An FPGA based second level trigger for the H.E.S.S. 28 meter telescope | 293 |
| <i>Y. Moudeden, P. Venault, D. Calvet, J.-F. Glicenstein and M. Vivier</i> | |
| From CUORICINO to CUORE: The bolometric path to the inverted hierarchy region of the neutrino mass | 298 |
| <i>C. Nones</i> | |
| Search for neutrino bursts from gravitational collapse of stars at the Baksan Underground Scintillation Telescope | 308 |
| <i>Yu. F. Novoseltsev, M.M. Boliev, I.M. Dzaparova, S.P. Mikheyev, R.V. Novoseltseva, V.B. Petkov, P.S. Striganov, G.V. Volchenko, V.I. Volchenko and A.F. Yanin</i> | |

| | |
|---|-----|
| Pi of the Sky: Modelling of the detector response for more effective search for optical GRB counterparts | 313 |
| <i>L.W. Piotrowski and A.F. Żarnecki</i> | |
| The sound of neutrinos | 319 |
| <i>C. Richardt, G. Anton, K. Graf, J. Höfl, U. Katz, R. Lahmann and M. Neff</i> | |
| Recent results from the ANTARES experiment | 329 |
| <i>M. Vecchi</i> | |
| Calorimetry | 335 |
| Silicon photomultipliers in calorimetric applications | 337 |
| <i>A. Berra, D. Bolognini, V. Bonvicini, D. Gauz, A. Driutti, S. Hasan, D. Iugovaz, D. Lietti, V. Mascagna, A. Mattera, G. Pauletta, A. Penzo, M. Prest, I. Rashevskaya, S. Reia, F. Scarpino and E. Vallazza</i> | |
| Combined studies of the EM calorimeter and the inner detector in the 2004 ATLAS combined testbeam | 342 |
| <i>R. Froeschl</i> | |
| The MEG Liquid Xenon calorimeter | 347 |
| <i>G. Gallucci</i> | |
| Commissioning of the ATLAS liquid argon calorimeter | 352 |
| <i>A. Gibson</i> | |
| The CMS-HF calorimeter readiness for data taking | 357 |
| <i>E. Gülmez</i> | |
| The performance of the CMS hadron calorimeter with cosmic muons | 362 |
| <i>V. Hagopian</i> | |
| Calibration studies and the investigation of track segments within showers with an imaging hadronic calorimeter | 367 |
| <i>S. Lu</i> | |
| Test of a LYSO matrix with an electron beam between 100 and 500 MeV for KLOE-2 | 372 |
| <i>M. Cordelli, F. Happacher, M. Martini, S. Miscetti, I. Sarra, M. Schioppa, S. Stucci and G. Xu</i> | |

| | |
|---|-----|
| The Low Energy Tagger for the KLOE-2 experiment | 377 |
| <i>D. Babusci, P. Ciambrone, G. Corradi, M. Iannarelli,</i> | |
| <i>S. Miscetti, C. Paglia, D. Tagnani, E. Turri, C. Bini,</i> | |
| <i>A. De Santis, G. De Zorzi, A. Di Domenico, S. Fiore</i> | |
| <i>and P. Gauzzi</i> | |
| Beam test results with a highly granular Analog Hadron Calorimeter Prototype (AHCAL) | 382 |
| <i>S. Morozov</i> | |
| Validation of the hadronic calibration of the ATLAS calorimeter with testbeam data corresponding to the pseudorapidity range $2.5 < \eta < 4.0$ | 387 |
| <i>G. Pospelov</i> | |
| ATLAS liquid argon endcap calorimeter R&D for sLHC | 392 |
| <i>P. Schacht</i> | |
| QCALT: a tile calorimeter for the KLOE-2 experiment | 404 |
| <i>M. Cordelli, G. Corradi, F. Happacher and M. Martini</i> | |
| High Energy Physics Experiments | 409 |
| Trigger data quality monitoring in the CMS experiment | 411 |
| <i>L. Agostino</i> | |
| Reconstruction and identification of electrons and photons with the ATLAS detector | 415 |
| <i>A. Ahmad</i> | |
| Low energy Weinberg angle determination by present and future accelerator neutrino experiments | 421 |
| <i>V. Antonelli</i> | |
| Performance of the resistive plate chambers as LVL1 ATLAS muon trigger detectors | 426 |
| <i>M. Bianco</i> | |
| The CMS electromagnetic calorimeter status: Performance with cosmic and first LHC data | 431 |
| <i>C. Biino</i> | |

| | |
|--|-----|
| Muon reconstruction and selection at the last trigger level of the ATLAS experiment | 438 |
| <i>R. Crupi</i> | |
| The ATLAS beam condition and beam loss monitors | 443 |
| <i>I. Dolenc</i> | |
| The high energy tagger for $\gamma\gamma$ physics at KLOE2 | 449 |
| <i>F. Archilli, F. Gonnella, L. Iafolla, R. Messi,</i> <i>D. Badoni, D. Moricciani, D. Babusci, M. Beretta and</i> <i>L. Quintieri</i> | |
| Commissioning of the ATLAS trigger and data acquisition system with single beam and cosmic rays | 454 |
| <i>R. Hauser</i> | |
| Performance of the readout electronics chain of the MICE electron muon ranger | 459 |
| <i>D. Lietti, A. Berra, D. Bolognini, S. Hasan, A. Mattera,</i> <i>M. Prest, A. Blondel, F. Cadoux, J.S. Graulich,</i> <i>F. Masciocchi, H. Wisting, G. Giannini, D. Iugovaz,</i> <i>S. Reia, V. Mascagna and E. Vallazza</i> | |
| Commissioning of the muon track reconstitution in the ATLAS experiment | 465 |
| <i>S.X. Oda</i> | |
| Readiness of the CMS computing for the data taking | 470 |
| <i>M. Paganoni</i> | |
| The $\mu^+ \rightarrow e + \gamma$ decay from the MEG experiment: Results from the first physics run | 474 |
| <i>A. Papa</i> | |
| QUARTIC – a precise time-of-flight counter for the ATLAS forward physics project | 484 |
| <i>J.L. Pinfold</i> | |
| Readout of the LHCb muon system with the TELL1 board | 491 |
| <i>A. Salamon</i> | |
| Associative memory design for fast tracker at LHC | 496 |
| <i>L. Sartori, P. Giannetti, M. Dell’Orso, E. Bossini,</i> <i>A. Annovi, M. Beretta and R. Tripiccion</i> | |

| | |
|--|------------|
| ATLAS cosmic ray results | 501 |
| <i>C. Schmitt</i> | |
| Optimization and performance of the ATLAS tau trigger with cosmics data | 511 |
| <i>M. Shamim</i> | |
| Trigger monitoring in ATLAS | 516 |
| <i>A. Sidoti</i> | |
| The tracker-muon optical alignment system of CMS | 521 |
| <i>M. Sobrón</i> | |
| ATLAS muon spectrometer status and performance | 526 |
| <i>Y. Takahashi</i> | |
| Cosmic muons probing the CMS RPC system | 531 |
| <i>S.A. Tupputi</i> | |
| The muon conditions data management: Database architecture and software infrastructure | 536 |
| <i>M. Verducci</i> | |
| Radiation Damage | 541 |
| Effect of gamma irradiation on ALKALI BORATE glasses by EPR spectroscopy | 543 |
| <i>N. Catallo, S. Baccaro, S. Colacicchi, G. Gualtieri,</i> <i>G. Ferrara and G. Sharma</i> | |
| Radiation effects on power semiconductor devices for distributes power systems for electromagnetic calorimeters | 548 |
| <i>C. Abbate, G. Busatto, F. Iannuzzo, A. Porzio,</i> <i>A. Sanseverino, F. Velardi and S. Baccaro</i> | |
| Results from silicon photo-multiplier neutron irradiation test | 555 |
| <i>R. Faccini, D. Pinci, W. Baldini, R. Calabrese,</i> <i>G. Cibirnetto, A. C. Ramusino, R. Malaguti, M. Pozzati,</i> <i>M. Angelone and M. Pillon</i> | |
| Induced damages in power mosfets after heavy ions irradiation | 560 |
| <i>G. Busatto, F. Iannuzzo, A. Porzio, A. Sanseverino,</i> <i>F. Velardi and G. Curró</i> | |

| | |
|--|------------|
| Irradiation resistance of novel scintillating glass with SNO ₂ as emission center | 565 |
| <i>C. Shen, S. Baccaro, Y. Ou, S. Wang and G. Chen</i> | |
| Comparison of measurements of charge transfer inefficiencies in a CCD with high-speed column parallel readout | 572 |
| <i>A. Sopczak and K. Bekhouche</i> | |
| Hall coefficient dependence on resistivity down to cryogenic temperatures in silicon samples irradiated with neutrons and ¹² C-ions | 577 |
| <i>C. Consolandi, S. Pensotti, P.G. Rancoita and M. Tacconi</i> | |
| Performance of irradiated CMS forward pixel detector | 585 |
| <i>S. Taroni</i> | |
| Radiotherapy and Medical Instrumentations | 591 |
| Monte Carlo simulations on neutron transport and absorbed dose in tissue-equivalent phantoms exposed to high-flux epithermal neutron beams | 593 |
| <i>G. Bartesaghi, G. Gambarini, A. Negri, M. Carrara, J. Burian and L. Viererbl</i> | |
| Scientific and technological development of hadrontherapy | 598 |
| <i>S. Braccini</i> | |
| Fricke gel dosimeters for the measurement of the anisotropy function of a HDR Ir-192 brachytherapy source | 610 |
| <i>M. Carrara, S. Tomatis, G. Zonca, G. Gambarini, G. Bartesaghi, C. Tenconi, A. Cerrotta and C. Fallai</i> | |
| Funding 3D-CBS: Changing the role of PET for cancer screening | 615 |
| <i>D.B. Crosetto</i> | |
| A new method to measure ¹⁰ B uptake in lung adenocarcinoma in hospital BNCT | 621 |
| <i>E.M. Donegani, F. Basilio, D. Bolognini, P. Borasio, E. Capelli, P. Cappelletti, P. Chiari, M. Frigerio, S. Gelosa, G. Giannini, S. Hasan, A. Mattera, P. Mauri, A. F. Monti, A. Ostinelli, M. Prest, E. Vallazza and A. Zanini</i> | |

| | |
|---|------------|
| Nuclear emulsion film detectors for proton radiography: Design and test of the first protopotype | 626 |
| <i>S. Braccini, A. Ereditato, I. Kreslo, U. Moser, C. Pistillo, S. Studer and P. Scampoli</i> | |
| Non-contact electron optics system for coincidence imaging analysis | 631 |
| <i>M. Kroupa, J. Jakubek and F. Krejci</i> | |
| AX-PET, a demonstrator for PET imaging using long axially oriented scintillating crystals | 636 |
| <i>P. Beltrame, A. Braem, V. Fanti, C. Joram, T. Schneider, J. Séguinot, C. Casella, G. Dissertori, L. Djambazov, W. Luster mann, F. Nessi-Tedaldi, F. Pauss, D. Schinzel, P. Solevi, J. F. Oliver, M. Rafecas, R. de Leo, E. Nappi, E. Chesi, E. Cochran, K. Honscheid, H. Kagan, A. Rudge, S. Smith, P. Weilhammer, I. Johnson, D. Renker, N. Clinithorne, S. Huh, E. Bolle, S. Stapnes and F. Meddi</i> | |
| Somewhat different applications of hybrid photon counting pixel detectors | 641 |
| <i>T. Michel, G. Anton, P. Bartl, F. Bayer, M. Böhnel, J. Durst, U. Gebert, T.K. Rügheimer, P. Sievers and P. Takoukam-Talla</i> | |
| Software Applications | 651 |
| The evolution of FTK, a real-time tracker for the hadron collider experiments | 653 |

| <i>G. Croci</i> | |
| Readout electronics of the NA62 gigatracker system | 834 |
| <i>G. Dellacasa, S. Garbolino, F. Marchetto, S. Martou, G. Mazza, A. Rivetti, R. Wheadon, A. Ceccucci, M. Fiorini, P. Jarron, J. Kaplon, A. Kluge, M. Noy, P. Riedler, S. Tiuraniemi, V. Carassiti, A. Cotta Ramusino, S. Chiozzi, F. Petrucci, E. Cortina and E. Martin</i> | |
| Status of the cylindrical-GEM project for the KLOE-2 inner tracker | 839 |
| <i>A. Balla, G. Bencivenni, S. Cerioni, P. Ciambrone,</i> | |

*E. De Lucia, D. Domenici, G. Felici, M. Gatta,
M. Jacewicz, M. Pistilli, L. Quintieri, G. De Robertis,
N. Lacalamita, R. Liuzzi, F. Loddo, A. Ranieri,
V. Valentino, G. Morello and M. Schioppa*

| | |
|---|-----|
| The upgrade of the CMS tracker for super-LHC | 845 |
| <i>F. Hartmann</i> | |
| A near beam silicon microstrip tracking system to test the crystal based collimation | 853 |
| <i>S. Hasan, A. Berra, D. Bolognini, S. Grigioni, A. Mattera, M. Prest, M. Veronelli, I. Rashevskaya and E. Vallazza</i> | |
| Beam test results for fine pitched multigeometry silicon strip detectors | 858 |
| <i>W. Kiesenhofer, T. Bergauer, Z. Dolezal, M. Dragicevic, Z. Drasal, M. Friedl, S. Hansel, J. Hrubec, C. Irmeler, M. Krammer and P. Kvasnicka</i> | |
| Test beam measurements with 3D silicon strip detectors | 864 |
| <i>M. Kohler, S. Eckert, K. Jakobs, S. Kuhn, G. Pahn, U. Parzefall, G.-F. Dalla Betta, A. Zoboli, M. Boscardin, S. Ronchin, N. Zorzi, J. Harkonen, P. Luukka, T. Maenpaa, H. Moilanen, R. Bates, S. Houston and C. Parkes</i> | |
| First alignment of the complete CMS silicon tracking detector | 869 |
| <i>A. Lucaroni</i> | |
| The alignment of the ALICE inner tracking system: Present status in view of the first LHC P-P data taking | 874 |
| <i>M. Lunardon</i> | |
| Operation experience with the ALICE silicon pixel detector with cosmics and first beams | 879 |
| <i>A. Mastroserio</i> | |
| Performance of the LHCb silicon tracker with first data | 884 |
| <i>M. Needham</i> | |
| Commissioning of the ATLAS pixel detector with cosmics ray data | 889 |
| <i>V. Perez-Reale</i> | |

| | |
|--|-----|
| LEPIX: Monolithic detectors for particle tracking in standard very deep submicron CMOS technologies | 894 |
| <i>A. Rivetti, M. Caselle, K. Kloukinas, W. Snoeys, P. Chalmet, H. Mugnier, J. Rousset and A. Dorokhov</i> | |
| Results from the first beam-induced reconstructed tracks in the LHCb vertex locator | 899 |
| <i>E. Rodrigues</i> | |
| Commissioning of the CMS pixel detector with cosmic rays | 904 |
| <i>R. Rougny</i> | |
| The ATLAS tracker upgrade: Short strips detectors for the sLHC | 910 |
| <i>U. Soldevila, M. Miñano, C. Garcia, C. Lacasta and S. Marti</i> | |
| List of participants | 917 |
