

Contents

1	Nonlinear and Chaotic Maps	1
1.1	One-Dimensional Maps	1
1.1.1	Exact and Numerical Trajectories	3
1.1.2	Fixed Points and Stability	15
1.1.3	Invariant Density	16
1.1.4	Liapunov Exponent	21
1.1.5	Autocorrelation Function	24
1.1.6	Discrete One-Dimensional Fourier Transform	26
1.1.7	Fast Fourier Transform	28
1.1.8	Logistic Map and Liapunov Exponent for $r \in [3, 4]$	33
1.1.9	Logistic Map and Bifurcation Diagram	34
1.1.10	Random Number Map and Invariant Density	35
1.1.11	Random Number Map and Random Integration	38
1.1.12	Circle Map and Rotation Number	40
1.1.13	One-Dimensional Newton Method	41
1.1.14	Feigenbaum's Constant	44
1.1.15	Symbolic Dynamics	45
1.1.16	Chaotic Repeller	48
1.1.17	Chaos and Encoding	48
1.1.18	Chaotic Data Communication	53
1.2	Two-Dimensional Maps	57
1.2.1	Introduction	57
1.2.2	Phase Portrait	60
1.2.3	Fixed Points and Stability	67
1.2.4	Liapunov Exponents	68
1.2.5	Correlation Integral	70
1.2.6	Capacity	71
1.2.7	Hyperchaos	73
1.2.8	Domain of Attraction	77
1.2.9	Newton Method in the Complex Domain	78
1.2.10	Newton Method in Higher Dimensions	80
1.2.11	Ruelle-Takens-Newhouse Scenario	81
1.2.12	Melnikov Analysis for Maps	83

1.2.13	Periodic Orbits and Topological Degree	84
1.2.14	JPEG file	86
2	Time Series Analysis	89
2.1	Introduction	89
2.2	Correlation Coefficient	90
2.3	Liapunov Exponent from Time Series	91
2.3.1	Jacobian Matrix Estimation Algorithm	92
2.3.2	Direct Method	93
2.4	Hurst Exponent	99
2.4.1	Introduction	99
2.4.2	Implementation for the Hurst Exponent	102
2.4.3	Random Walk	106
2.5	Higuchi's Algorithm	110
2.6	Complexity	110
3	Autonomous Systems in the Plane	115
3.1	Classification of Fixed Points	115
3.2	Homoclinic Orbit	117
3.3	One-Dimensional Pendulum	119
3.4	Limit Cycle Systems	120
3.5	Lotka-Volterra Systems	124
4	Nonlinear Hamilton Systems	127
4.1	Hamilton Equations of Motion	127
4.1.1	Hamilton System and Variational Equation	130
4.2	Integrable Hamilton Systems	131
4.2.1	Hamilton Systems and First Integrals	131
4.2.2	Lax Pair and Hamilton Systems	134
4.2.3	Floquet Theory	136
4.3	Chaotic Hamilton Systems	139
4.3.1	Trajectories and Hénon-Heiles Hamilton Function	139
4.3.2	Surface of Section Method	141
5	Nonlinear Dissipative Systems	147
5.1	Fixed Points and Stability	147
5.2	Trajectories	152
5.3	Phase Portrait	156
5.4	Liapunov Exponents	159
5.5	Generalized Lotka-Volterra Model	161
5.6	Hyperchaotic Systems	163
5.7	Hopf Bifurcation	166
5.8	Time-Dependent First Integrals	169

6	Nonlinear Driven Systems	171
6.1	Introduction	171
6.2	Driven Anharmonic Systems	174
6.2.1	Phase Portrait	174
6.2.2	Poincaré Section	175
6.2.3	Liapunov Exponent	177
6.2.4	Autocorrelation Function	178
6.2.5	Power Spectral Density	181
6.3	Driven Pendulum	182
6.3.1	Phase Portrait	182
6.3.2	Poincaré Section	184
6.4	Parametrically Driven Pendulum	186
6.4.1	Phase Portrait	186
6.4.2	Poincaré Section	187
6.5	Driven Van der Pol Equation	188
6.5.1	Phase Portrait	188
6.5.2	Liapunov Exponent	190
6.6	Parametrically and Externally Driven Pendulum	192
6.7	Torsion Numbers	194
7	Controlling of Chaos	199
7.1	Introduction	199
7.2	Ott-Yorke-Grebogi Method	199
7.2.1	One-Dimensional Maps	199
7.2.2	Systems of Difference Equations	203
7.3	Time-Delayed Feedback Control	207
7.4	Small Periodic Perturbation	209
7.5	Resonant Perturbation and Control	212
8	Synchronization of Chaos	213
8.1	Introduction	213
8.2	Synchronization of Chaos	213
8.2.1	Synchronization Using Control	213
8.2.2	Synchronizing Subsystems	216
8.3	Synchronization of Coupled Dynamors	219
8.4	Phase Coupled Systems	220
9	Fractals	227
9.1	Introduction	227
9.2	Iterated Function System	229
9.2.1	Introduction	229
9.2.2	Cantor Set	230
9.2.3	Heighway's Dragon	233
9.2.4	Sierpinski Gasket	235
9.2.5	Koch Curve	237

9.2.6	Fern	239
9.2.7	Grey Level Maps	241
9.3	Mandelbrot Set	242
9.4	Julia Set	244
9.5	Fractals and Kronecker Product	246
9.6	Lindenmayer Systems and Fractals	250
9.7	Weierstrass Function	253
9.8	Lévy-Flight Random Walk	255
10	Cellular Automata	257
10.1	Introduction	257
10.2	A Spin System and Cellular Automata	260
10.3	Sznajd Model	261
10.4	Conservation Laws	264
10.5	Two-Dimensional Cellular Automata	265
10.6	Button Game	269
10.7	Langton's Ant	272
11	Solving Differential Equations	275
11.1	Introduction	275
11.2	Euler Method	276
11.3	Lie Series Technique	278
11.4	Runge-Kutta-Fehlberg Technique	282
11.5	Ghost Solutions	283
11.6	Symplectic Integration	286
11.7	Verlet Method	291
11.8	Störmer Method	292
11.9	Invisible Chaos	293
11.10	First Integrals and Numerical Integration	294
12	Optimization	297
12.1	Lagrange Multiplier Method	297
12.2	Coordinate Systems	302
12.3	Differential Forms	304
12.4	Karush-Kuhn-Tucker Conditions	307
12.5	Support Vector Machine	311
12.5.1	Introduction	311
12.5.2	Linear Decision Boundaries	311
12.5.3	Nonlinear Decision Boundaries	315
12.5.4	Kernel Fisher Discriminant	319
13	Neural Networks	323
13.1	Introduction	323
13.2	Hopfield Model	327
13.2.1	Introduction	327

13.2.2	Synchronous Operations	329
13.2.3	Energy Function	331
13.2.4	Basins and Radii of Attraction	332
13.2.5	Spurious Attractors	333
13.2.6	Hebb's Law	334
13.2.7	Hopfield Example	335
13.2.8	Hopfield C++ Program	337
13.2.9	Asynchronous Operation	341
13.2.10	Translation Invariant Pattern Recognition	342
13.3	Similarity Metrics	344
13.4	Kohonen Network	348
13.4.1	Introduction	348
13.4.2	Kohonen Algorithm	349
13.4.3	Kohonen Example	351
13.4.4	Traveling Salesman Problem	357
13.5	Perceptron	360
13.5.1	Introduction	360
13.5.2	Boolean Functions	362
13.5.3	Linearly Separable Sets	363
13.5.4	Perceptron Learning	364
13.5.5	Perceptron Learning Algorithm	367
13.5.6	One and Two Layered Networks	371
13.5.7	XOR Problem and Two-Layered Networks	372
13.6	Multilayer Perceptrons	375
13.6.1	Introduction	375
13.6.2	Cybenko's Theorem	376
13.6.3	Back-Propagation Algorithm	377
13.7	Radial Basis Function Networks	384
13.8	PERCEPTRON NEURAL NETWORKS	387
13.9	Chaotic Neural Networks	389
13.10	Neuronal-Oscillator Models	390
13.11	Neural Network, Matrices and Eigenvalues	392
14	Genetic Algorithms	395
14.1	Introduction	395
14.2	Sequential Genetic Algorithm	396
14.3	Schemata Theorem	400
14.4	Bitwise Operations	402
14.4.1	Introduction	402
14.4.2	Assembly Language	405
14.4.3	Floating Point Numbers and Bitwise Operations	407
14.4.4	Java Bitset Class	408
14.4.5	C++ Bitset Class	409
14.5	Bit Vector Class	411
14.6	Penna Bit-String Model	414

14.7	Maximum of One-Dimensional Maps	416
14.8	Maximum of Two-Dimensional Maps	421
14.9	Finding a Fitness Function	428
14.10	Problems with Constraints	435
	14.10.1 Introduction	435
	14.10.2 Knapsack Problem	436
	14.10.3 Traveling Salesman Problem	441
14.11	Simulated Annealing	449
15	Gene Expression Programming	453
15.1	Introduction	453
15.2	Example	456
15.3	Numerical-Symbolic Manipulation	467
15.4	Multi Expression Programming	472
16	Wavelets	479
16.1	Introduction	479
16.2	Multiresolution Analysis	482
16.3	Pyramid Algorithm and Discrete Wavelets	485
16.4	Biorthogonal Wavelets	489
16.5	Two-Dimensional Wavelets	494
17	Discrete Hidden Markov Processes	497
17.1	Introduction	497
17.2	Markov Chains	499
17.3	Discrete Hidden Markov Processes	503
17.4	Forward-Backward Algorithm	507
17.5	Viterbi Algorithm	510
17.6	Baum-Welch Algorithm	511
17.7	Distances between Hidden Markov Models	512
17.8	C++ Program	513
17.9	Application of Hidden Markov Models	521
18	Fuzzy Sets and Fuzzy Logic	525
18.1	Introduction	525
18.2	Operators for Fuzzy Sets	533
	18.2.1 Logical Operators	533
	18.2.2 Algebraic Operators	536
	18.2.3 Defuzzification Operators	538
	18.2.4 Fuzzy Concepts as Fuzzy Sets	539
	18.2.5 Hedging	540
	18.2.6 Quantifying Fuzzyness	542
	18.2.7 C++ Implementation of Discrete Fuzzy Sets	542
18.3	Fuzzy Numbers and Fuzzy Arithmetic	566
	18.3.1 Introduction	566

18.3.2	Algebraic Operations	567
18.3.3	LR-Representations	570
18.3.4	Algebraic Operations on Fuzzy Numbers	572
18.3.5	C++ Implementation of Fuzzy Numbers	574
18.3.6	Applications	580
18.4	Fuzzy Rule-Based Systems	580
18.4.1	Introduction	580
18.4.2	Fuzzy If-Then Rules	584
18.4.3	Inverted Pendulum Control System	585
18.4.4	Fuzzy Controllers with B-Spline Models	587
18.4.5	Application	589
18.5	Fuzzy C-Means Clustering	591
18.6	T-Norms and T-Conorms	595
18.7	Fuzzy Logic Networks	597
18.8	Fuzzy Hamming Distance	599
18.9	Fuzzy Truth Values and Probabilities	602
Bibliography		603
