

## CONTENTS

Foreword	v
Existence of the Fock Representation for Current Algebras of the Galilei Algebra	1
<i>L. Accardi, A. Boukas and J. Misiewicz</i>	
Modular Structures and Landau Levels	34
<i>F. Bagarello</i>	
Stochastic Schrödinger Equations and Memory	52
<i>A. Barchielli, P. Di Tella, C. Pellegrini and F. Petruccione</i>	
On Spectral Approach to Pascal White Noise Functionals	68
<i>A. Barhoumi, H. Ouerdiane and A. Riahi</i>	
Quantum White Noise Analysis and Quantum Stochastic Equations	90
<i>V. P. Belavkin, J. Heo and U.-C. Ji</i>	
Spectral Analysis for Twisted Waveguides	125
<i>P. Briet</i>	
The Decoherence-free Subalgebra of a Quantum Markov Semigroup on $\mathcal{B}(h)$	131
<i>A. Dhahri, F. Fagnola and R. Rebolledo</i>	
A Sufficient Condition for all Invariant States of a QMS to be Diagonal	148
<i>J. C. García, R. Quezada and L. Pantaleón-Martínez</i>	
State Estimation Methods Using Indirect Measurements	163
<i>K. M. Hantos and L. Ruppert</i>	

On the Classification of Invariant State of Generic Quantum Markov Semigroups: The Gaussian Gauge Invariant Case	181
<i>S. Hachicha</i>	
Independence Generalizing Monotone and Boolean Independences	190
<i>T. Hasebe</i>	
Roles of White Noise in Stochastic Analysis and Some of Future Directions	202
<i>T. Hida</i>	
On Difficulties Appearing in the Study of Stochastic Volterra Equations	214
<i>A. Karczevska</i>	
Entanglement Protection and Generation in a Two-atom System	227
<i>M. Orszag</i>	
Introduction to Quantum Fisher Information	261
<i>D. Petz and C. Ghinea</i>	
Complementary Subalgebras in Finite Quantum Systems	282
<i>D. Petz and A. Szántó</i>	
On the Long-time Asymptotics of Quantum Dynamical Semigroups	288
<i>G. A. Raggio and P. R. Zangara</i>	
Hilbert Modules—Square Roots of Positive Maps	296
<i>M. Skeide</i>	
Multiparameter Quantum Stochastic Processes	323
<i>W. J. Spring</i>
