

# Contents

<b>1</b>	<b>INTRODUCTION</b>	<b>1</b>
1.1	Scope of the Book . . . . .	1
1.2	A Summary of Wave Mechanics . . . . .	4
1.3	Beyond Introductory Wave Mechanics . . . . .	9
<b>2</b>	<b>VECTOR SPACES</b>	<b>13</b>
2.1	Representations of Probabilities . . . . .	13
2.1.1	The Mathematical Representation of Classical Probabilities . . . . .	13
2.1.2	The Origin of Quantum Probabilities . . . . .	15
2.2	From Wave Functions to State Vectors . . . . .	17
2.3	The Definition of a Vector Space . . . . .	20
2.3.1	The Concept of a Group . . . . .	20
2.3.2	The Basic Idea of a Vector Space . . . . .	22
2.3.3	Linear Maps and Isomorphisms . . . . .	26
2.3.4	Subspaces of a Vector Space . . . . .	27
2.4	Basis Vectors . . . . .	29
2.4.1	The Key Definitions . . . . .	29
2.4.2	Expansion Theorems . . . . .	30
2.5	Scalar Products . . . . .	32
2.5.1	Motivation for the Idea . . . . .	32

2.5.2	The Basic Definitions . . . . .	34
2.5.3	Some Associated Geometrical Concepts . . . . .	37
2.5.4	The Expansion Theorems in Infinite Dimensions . . . . .	39
<b>3</b>	<b>LINEAR OPERATORS</b>	<b>45</b>
3.1	The Basic Definitions . . . . .	45
3.2	Projection Operators . . . . .	53
3.3	Spectral Theory for Self-Adjoint Operators . . . . .	57
<b>4</b>	<b>PROPERTIES IN CLASSICAL PHYSICS</b>	<b>63</b>
4.1	What is a Thing? . . . . .	63
4.2	The State Space of Classical Physics . . . . .	67
4.2.1	General Concepts . . . . .	67
4.2.2	The Example of a Point Particle . . . . .	71
4.3	The Logical Structure of Classical Physics . . . . .	73
4.4	Towards Quantum Theory . . . . .	77
<b>5</b>	<b>THE GENERAL FORMALISM OF QUANTUM THEORY</b>	<b>79</b>
5.1	The Rules of Quantum Theory . . . . .	79
5.1.1	Prolegomenon . . . . .	79
5.1.2	Statement of the Rules . . . . .	84
5.1.3	Some Comments on Rules 1, 2 and 3 . . . . .	85
5.2	Quantisation of a Given Classical System . . . . .	89
5.2.1	Preservation of Classical Structure . . . . .	89
5.2.2	The Definition of $\mathcal{F}(\hat{A})$ . . . . .	97
5.3	The Alternative Form of Rule 3 . . . . .	98
5.3.1	The Main Theorem . . . . .	98

5.3.2	A Simple Example . . . . .	102
<b>6</b>	<b>TECHNICAL DEVELOPMENTS</b>	<b>105</b>
6.1	Mixed States and Density Matrices . . . . .	105
6.1.1	The Main Ideas . . . . .	105
6.1.2	A Simple Example . . . . .	109
6.2	Operators With a Continuous Spectrum . . . . .	111
6.3	Compatible Observables . . . . .	114
6.4	Time Development . . . . .	120
6.4.1	The Deterministic Evolution . . . . .	120
6.4.2	A Simple Example . . . . .	123
6.4.3	Conserved Quantities . . . . .	125
6.4.4	The Time Development of a Mixed State . . . . .	126
<b>7</b>	<b>UNITARY OPERATORS IN QUANTUM THEORY</b>	<b>127</b>
7.1	Unitary Operators . . . . .	127
7.2	Some Applications in Quantum Theory . . . . .	132
7.2.1	The Basic Role of Unitary Operators . . . . .	132
7.2.2	Displaced Observers and the Canonical Commutation Relations . . . . .	134
7.3	The Uncertainty Relations . . . . .	140
7.3.1	Some Ideas From Elementary Statistics . . . . .	140
7.3.2	The Schwarz Inequality . . . . .	141
7.3.3	The Generalised Uncertainty Relations . . . . .	143
7.3.4	A Simple Example . . . . .	145
7.3.5	Some Conceptual Issues . . . . .	147

<b>8</b>	<b>CONCEPTUAL ISSUES IN QUANTUM THEORY</b>	<b>149</b>
8.1	A Quaternity of Problems . . . . .	149
8.2	The Meaning of Probability . . . . .	150
8.3	Reduction of the State Vector . . . . .	154
8.3.1	Mathematical Aspects . . . . .	154
8.3.2	The Role of Conditional Probability . . . . .	160
8.3.3	The Problem for a Realist . . . . .	165
8.4	Quantum Entanglement . . . . .	166
8.4.1	The Tensor Product of Two Hilbert Spaces . . . . .	166
8.4.2	The Idea of Quantum Entanglement . . . . .	171
8.5	The Measurement Problem . . . . .	175
8.5.1	The Nature of the Problem . . . . .	175
8.5.2	The Pragmatic View . . . . .	177
8.5.3	Some Conventional Resolutions . . . . .	178
8.5.4	Many Worlds . . . . .	183
8.5.5	Hidden Variables? . . . . .	187
<b>9</b>	<b>PROPERTIES IN QUANTUM PHYSICS</b>	<b>189</b>
9.1	The Kochen–Specker Theorem . . . . .	189
9.2	The Logic of Quantum Propositions . . . . .	198
9.2.1	The Meaning of ‘True’ . . . . .	198
9.2.2	Is ‘False’ the Same as ‘Not True’? . . . . .	203
9.2.3	The Logical Connectives . . . . .	204
9.2.4	Gleason’s Theorem . . . . .	209
9.3	Non-Locality and the Bell Inequalities . . . . .	211
9.3.1	EPR and the Incompleteness of Quantum Theory . . . . .	211
9.3.2	The Bell Inequalities . . . . .	215
9.4	Epilogue . . . . .	219
