

CONTENTS

| | | |
|---|--|------------|
| Preface | | vii |
| Chapter 1. Photovoltaic Materials and Phenomena | | 1 |
| 1.1. Overview | | 1 |
| 1.2. Applications of Photovoltaics | | 12 |
| 1.3. Types of Semiconductor Junctions | | 16 |
| 1.4. More Detailed Photovoltaic Models | | 25 |
| 1.5. Photovoltaic Materials | | 32 |
| Chapter 2. Crystalline Silicon | | 34 |
| 2.1. Overview | | 34 |
| 2.2. Doping and Lifetime | | 36 |
| 2.3. Major Sources of Recombination | | 37 |
| 2.4. Development of Single Crystal Silicon Solar Cells | | 41 |
| 2.5. Increasing the Efficiency of Silicon Cells | | 53 |
| 2.6. Novel Structures | | 56 |
| 2.7. Thin Multicrystalline Silicon Solar Cells | | 57 |
| 2.8. Microcrystalline Silicon | | 66 |
| Chapter 3. Amorphous Silicon | | 68 |
| 3.1. Overview | | 68 |
| 3.2. Electronic Structure and Dangling Bond Defects in a-Si:H | | 71 |
| 3.3. Modes of Defect Generation | | 74 |
| 3.4. Models for Dangling Bond Defects | | 79 |
| 3.5. Overview of a-Si:H Solar Cells | | 91 |
| 3.6. Variations in Deposition Techniques | | 96 |
| 3.7. Material Transport Properties Important for Solar Cells | | 97 |
| 3.8. Solar Cell Stability | | 100 |
| 3.9. Amorphous Silicon Alloys | | 106 |
| 3.10. Hybrid Solar Cells Involving a-Si:H | | 109 |
| Chapter 4. Gallium Arsenide and Other III-V Materials | | 111 |
| 4.1. Overview | | 111 |
| 4.2. GaAs Fabrication Techniques | | 115 |
| 4.3. GaAs-based Solar Cell Development | | 116 |
| 4.4. InP-based Solar Cells | | 126 |
| 4.5. Hybrid Multijunction Cells | | 131 |
| 4.6. Radiation Resistance | | 132 |
| Chapter 5. Cadmium Telluride and Other II-VI Materials | | 135 |
| 5.1. Overview | | 135 |

| | |
|---|------------|
| 5.2. Surface and Contact Properties | 141 |
| 5.3. Doping of <i>p</i> -type CdTe | 149 |
| 5.4. Post-deposition Processing and Interface Properties | 154 |
| 5.5. SIS Junctions | 159 |
| 5.6. Grain Boundary Effects | 160 |
| 5.7. Film Deposition by Vacuum Evaporation | 164 |
| 5.8. Film Deposition by Close-Spaced Vapor Transport (CSVT) [or Close-Spaced Sublimation (CSS)] | 167 |
| 5.9. Film Deposition by Spray Pyrolysis | 171 |
| 5.10. Other Film Deposition Methods | 175 |
| 5.11. CdTe Alloys | 181 |
| 5.12. Other II–VI Junctions | 183 |
| Chapter 6. Copper Indium Diselenide and Other I–III–VI Materials | 184 |
| 6.1. Overview | 184 |
| 6.2. Materials Properties of CuInSe ₂ | 190 |
| 6.3. Fabrication Techniques | 196 |
| 6.4. Solar Cell Developments | 201 |
| 6.5. Related Alloys and Materials | 206 |
| 6.6. Multijunction Cells | 213 |
| 6.7. General Materials Considerations | 213 |
| Chapter 7. Other Materials of Interest for Solar Cells | 215 |
| 7.1. Overview | 215 |
| 7.2. Cuprous Oxide | 215 |
| 7.3. Zinc Phosphide | 216 |
| 7.4. Tungsten Diselenide | 218 |
| 7.5. Polymers and Organic Materials | 219 |
| 7.6. Semiconductor/Liquid Junctions | 222 |
| 7.7. New Materials and Structures | 223 |
| References | 225 |
| Bibliography | 268 |
| Review Publications | 270 |
| Index | 277 |
