

CONTENTS

Preface	v
Introduction	1
1 The Energy Crisis	9
1.1 The need for energy	9
1.2 Wood	16
1.3 Coal	17
1.4 Oil	18
1.5 Natural Gas	21
1.6 The energy crisis	22
1.7 Energy conservation	23
2 The Renewable Energy Sources	27
2.1 Introduction	27
2.2 World energy consumption	28
2.3 Hydroelectric power	32
2.4 Solar power	33
2.5 Wind power	37
2.6 Tidal power	43
2.7 Wave and ocean thermal power	44
2.8 Biomass	45
2.9 Geothermal energy	46
2.10 The renewables	47
3 Nuclear Power	51
3.1 Introduction	51
3.2 Nuclear reactors	53
3.3 Nuclear radiations	59

3.4	Nuclear waste	70
3.5	Applications of nuclear power	73
3.6	Fusion power	75
4	The Safety of Nuclear Reactors	79
4.1	Introduction	79
4.2	Brown's Ferry	81
4.3	Three Mile Island	81
4.4	Chernobyl: The disaster	82
4.5	The lessons of Chernobyl	92
5	Choosing the Best Energy Sources	95
5.1	Introduction	95
5.2	Capacity	96
5.3	Cost	102
5.4	Safety	108
5.5	Reliability	112
5.6	Comparison of energy sources	114
6	Effects on the Environment	117
6.1	Energy and health	117
6.2	Pollution of the atmosphere	119
6.3	Pollution of the earth	122
6.4	Visual and aural pollution	125
6.5	Electromagnetic pollution	127
6.6	Global warming and the greenhouse effect	128
6.7	Chemical pollution	134
7	Energy Scenarios	139
7.1	Sustainable development	139
7.2	Low energy scenarios	141
7.3	High energy scenarios	144
7.4	Intermediate scenarios	145
7.5	Conclusion	146
8	Political Aspects of the Energy Crisis	151
8.1	Introduction	151
8.2	Politics	152

8.3	The responsibility of scientists	154
8.4	Some case histories	161
8.5	The media	165
8.6	Public opinion	167
8.7	Organising the technological future	170
9	Moral Aspects of the Energy Crisis	175
9.1	Responsibility for the earth	175
9.2	Practical applications	179
9.3	The problems of developing countries	180
9.4	The threat of nuclear weapons	186
9.5	Conclusion	188
Appendices:		
1	Energy Units	193
2	Radiation Units	195
Further Reading		197
Author Index		199
Subject Index		201
